

1973 FORD BRONCO

ALL PURPOSE 4-WHEEL-DRIVE VEHICLES

Sport Bronco with optional radio, rear seat, and special order solid exterior paint treatment (in addition to front winch)

'73 BRONCOS Have ALL THE RIGHT ANGLES

For '73, Ford Broncos combine all the right angles for off-road agility with important new power and dress-up options.

The durable 7-main bearing 200-cu. in. Six is standard with the big, performance-proven 302-cu. in. V-8 optional. And with this popular V-8, both SelectShift Cruise-O-Matic and power steering are optional. SelectShift Cruise-O-Matic gives you a choice of fully automatic or manual shifting

for driving ease in traffic with full off-road control. Ford's integral-type power steering gives quick steering response and easy handling even in the roughest terrain.

Inside, Bronco's uncluttered, functional interior is roomy and practical. Sporty front bucket seats with foam padding in seat cushion and back are standard. A two-passenger rear seat is available. Seats are upholstered with attractive, long-wearing vinyl. The convenient transmission shift lever is in the familiar steering-column location.

Bronco with optional wheel covers

Heavy-duty front axle. Bronco's exceptional ability to get up and over high obstructions is matched by its ability to take it when crashing down. Punishing shock loads are just routine off-road work for Bronco's heavy-duty front axle. And rugged Mono-Beam front suspension provides strong support for the big axle.

Superior maneuverability. Maneuvering around boulders and other off-road obstacles is a cinch with a nimble Bronco. Wide-track front axle with 37° turn angle provides best maneuverability of any 4-wheeler. Bronco can turn in a small 33.6-foot circle—tree to tree—sharper than anything in its class.

Slope-hugging stability. Bronco has the optimum track width. Wheels are set wide apart for excellent off-road stability, yet narrow enough to negotiate twisting paths and trails. And the identical track of Bronco's front and rear axles allows the rear wheels to follow in the same path made by the front wheels for easier trailblazing.

TO TAME MOST ANY TERRAIN...

Bronco is an adventuresome breed of four-wheeler that can get up, over, around or through all kinds of obstacles that might stop the others. The key angles of approach, breakover and departure (details on the back cover) are maximized to give optimum off-road freedom and mobility. High angles of approach and departure permit getting up and down steep inclines or into and out of deep ditches. Big breakover angle helps climbing over peaked projections without hanging up amidships. High ground clearance and tough, protected underside further aid in negotiating difficult obstructions.

Bronco's big Dana heavy-duty front axle with free-running hubs and forged-steel radius rods

provide great durability and reliability. A steering-linkage shock absorber is standard for added protection against violent jolts in off-road operations. Same wide stance, front and rear, helps when the going is tough. Front wheels break a trail through brush, snow or sand, and the rear wheels have a matching track so they can follow right through with minimum resistance. You get a smoother ride and have more power in reserve for the bad spots.

Ford's exclusive Mono-Beam front suspension with big coil springs smooths the ride while it reinforces durability. Bronco gives you a comfortable ride on the highway and is remarkably well-behaved on off-road jaunts. Wide-track axles provide

stability on the slopes and sharp-turning maneuverability. All in all, Bronco is the smooth, sure way to reach those difficult job sites or faraway recreation spots.

Spirited Six or V-8 engine puts plenty of power at each wheel for terrain-conquering performance through mud, snow or sand. The big 302-cu. in. V-8 is a popular option. 200-cu. in. Six is standard. Both engines are equipped for steep grades with special carburetor and fuel pump.

Engine specifications	200 Six (standard)	302 V-8 (optional)
Displacement	200 cu. in.	302 cu. in.
Bore and Stroke (in.)	3.68 x 3.126	4.0 x 3.0

BRONCO GVW PACKAGE SELECTOR

GVW Package Ratings:	4300*	4450*#	4500*	4900**
Maximum Load Rating:	940	1035	1105	1340
GVW Package Includes:				
Axle, Rear:	2780	2780	2780	3300
Springs, Rear—Rating @ Ground:	1240	1475	1475	1475
Tires:	E78-15 B	E78-15 B	G78-15 B	G78-15 B

*Optional GVW package and rating.
#Minimum GVW with rear seat.

*Standard GVW.

**Requires 302 V-8 engine.

Bronco GVW packages are designed to aid in selecting the proper vehicle for your needs. By determining the maximum load that will be carried (including the weight of driver and passengers, cargo, and any special equipment), you determine which package to choose. For example, a Bronco that will carry over 1,300 pounds requires the 4,900 lb. GVW package. This package includes higher-rated components to provide optimum dependability and durability.

Bronco interior with optional Ranger Package

Sport Bronco interior

AND OPTIONS FOR DRIVING EASE, COMFORT!

Sport Bronco features, in addition to or in place of standard, include: Vinyl door trim panels with bright moldings • Hardboard headliner with bright retainers • Parchment vinyl front floor mat with bright retainers (matching rear mat with optional rear seat) • Cigar lighter • Horn ring • Bright-metal windshield and window frames • Bright grille frame molding and tailgate release handle • Bright headlight, side marker light and rear reflector bezels • Argent painted grille • Bright bumpers,
