

1996 HONDA

A VERY GOOD YEAR

Ladies and gentlemen, introducing the full line of Honda vehicles for 1996. This is a breakthrough year in design, luxury and performance.

You can feel it in the fresh, striking, all-new Civic. You can also see it in the sophisticated lines of the newly styled Accord. And in the superb versatility of the Odyssey. Whether you're looking for a sporty car, a sport/utility vehicle, or something in between, there's a Honda waiting just for you. With Honda's legendary quality and reliability.

We have been manufacturing automobiles in America since 1982. Today, five out of seven Hondas

*sold in America are also manufactured here. Over the last decade, we've invested more than three billion dollars in U.S. operations. Over 14,000 men and women design, develop, manufacture and distribute Honda products right here in America. And Honda is currently America's number-one exporter of passenger cars to 39 countries worldwide.**

This year we're proud to celebrate 25 years of selling cars in the United States. In fact, the ten millionth Honda was sold in July 1995. You see, at Honda we don't believe in just offering you the standards. We believe in setting them and remaining a car ahead.
