OVERSTIMULATION IS NOT A CRIME (IN SWEDEN).

With the high-performance five-cylinder turbo-charged T5 that brings 227 hp, a 6.2 second 0–60 with manual transmission, a top speed of 146 mph, and more styling options than showgirl on pay-day, the Volvo Car Corporation, with complete knowledge and forethought, is introducing this new Volvo C30 in America with no apologies. Mature adults, in some parts of the world, will not stand for the machinery of such merry-making. That's why Americans, such as yourself who believe in freedom, are being encouraged here to fight maturity at every turn (while wearing seatbelts, of course).
LIKE CAFFEINE AND SUGAR. ONLY SAFER.

A spark is all it takes and you’re off: Quick, determined, and ready for what the road may bring. The Volvo C30 delivers an inspired mix of performance and passion. This may be the smallest Volvo but it functions at a very high level. The premium Volvo feel is evident in every detail. Smooth running engines respond instantly, even at low revs, so overtaking is fast and safe. Of course, handling is exceptionally sweet. Long trips? No worries. Tuck into one of four great seats and enjoy the ride. Elevated levels of enthusiasm are common for all passengers but if your seat has the steering wheel, don’t let the music stop.
Geartronic transmission
Geartronic is a five-speed automatic that’s both smooth and responsive. It harmonizes perfectly with the Volvo C30 and allows you to enjoy the thrill of more activity or ease the strain to心头 when you desire a less active role. The lever shifts up or down with a precise feel for your touch.

Chassis and steering
The advanced chassis is designed for comfort and balanced handling. High torsional rigidity enables the Multi-link rear and McPherson spring strut front suspension to cope predictably and consistently with different types of road surfaces. Electro-hydraulic steering offers quick and crisp response, while the rear wheels turn slightly to help the car to corner neatly.

Manual transmission
The power of the T5 engine is harnessed by a short-throw six-speed manual that inspires a sportier style of driving.

Chassis and steering
The advanced chassis is designed for comfort and balanced handling. High torsional rigidity enables the Multi-link rear and McPherson spring strut front suspension to cope predictably and consistently with different types of road surfaces. Electro-hydraulic steering offers quick and crisp response, while the rear wheels turn slightly to help the car to corner neatly.

IS THIS MUCH ADRENALINE LEGAL IN ALL 50 STATES?

No one can hide the joy of instant gratification, especially when driving the Volvo C30. Its quick acceleration, balanced weight, rigid body, and advanced chassis can convinces anyone that exceptional road-holding does not have to come at the expense of first-class comfort.
IN THRUST WE TRUST.

The intercooled, turbocharged T5 is a five-cylinder powerplant built with the mandate to do more with less. This high performance 2.5 liter engine uses a light-pressure turbo and variable all-valve timing to deliver instant acceleration throughout the entire rev range. Wicked, yet wise, it also employs sophisticated engine management systems to use fuel efficiently. Here are some numbers for those keeping score at home: 227 hp. 0-60mph in 6.2 seconds. Top speed: 146 mph.
Like every Volvo, this car is built to provide an intelligent mix of performance and practicality. Whether you’re travelling light or taking all your kit onboard, the versatile Volvo C30 is ready to accommodate an active life. There are numerous seating and storage configurations for creating comfort for people and space for things.
The full loading capacity is 33.4 cubic feet. For a flat cargo space almost 60 inches long, fold down one or both rear seats. If this still isn’t enough, there are roof mounted carrying accessories.

With the seats in upright positions, four adults sit comfortably with room for luggage. An available retractable nylon cargo net makes sure things stay where you put them. To conceal your luggage, simply put the optional soft load cover in place. A hard cover is also available.

Loading is easy with the glass tailgate open and the seats folded flat. Wide door openings and easy entry front seats that quickly slide forward make it easy, too. Courtesy lights illuminate the cabin and cargo areas automatically or at your convenience.
WHATEVER HAPPENS IN THE BACK SEAT STAYS IN THE BACK SEAT.

This generous four-seater gives you and three of your friends the space and convenience to travel in comfort. The floating center console presents intuitive controls for the infotainment and climate systems with style. The front seats adjust to suit height, posture, lumbar support and memory—powered seats can even remember settings. The wide door openings and the easy entry feature—a sliding movement of the front seats—make getting in and out of the rear seat simple. With high-quality materials throughout the cabin fitted with millimetre precision, it’s easy to recognize the years of Volvo expertise, craftsmanship and dedication to safety in every detail.
Power windows
A quick press of the button in each door wall is all it takes to automatically raise or lower the front windows. Both of these windows can also be operated from the driver’s seat.

Front seat convenience
The multifunctional tunnel console accommodates an armrest, cupholders, space for CDs and other personal items while an illuminated compartment behind the center console is ideal for smaller items like a MP3 player, change or sunglasses. There's also a holder for your sunglasses.

Power seat styling
Rear seat passengers will appreciate the comfort of the separate full-size seats as well as the fold-down center armrest. They’re both rear seats enjoy improved sight lines because the center seat is foldable. The rear side panels have an armrest and two storage compartments in each rear seat.

Keyless Drive (Custom Build Option)
Keyless drive lets you lock, unlock and start the car without having the remote control in your hand. As long as you have the remote with you, grasping the door handle automatically unlocks the door. To start the engine, simply turn the control on the instrument panel. To lock the doors, just press the button in the door handle as you leave the car.

Electronic Climate Control (Custom Build Option)
In addition to air conditioning, the available Electronic Climate Control (ECC) maintains chosen temperatures for either side of the cabin, while the Interior Air Quality System (IAQS) ensures that the air you breathe is as clean as possible. These systems help keep the driver alert and the passengers comfortable.

Ambient lighting
There is a courtesy light, center console spot-light and two reading lamps located just above the center rear-view mirror, mounted on the roof. These lights, along with a courtesy light in the rear and foot well lights, illuminate the interior’s elegant Scandinavian design and set the stage for your adventures.
PREMIUM SOUND. DEBAUCHERY MEASURED IN DECIBELS.

With a choice of two audio levels—High Performance and Dynaudio Premium Sound—each configured to the cabin's ambient acoustics—the Volvo C30 has a sound system that makes the most of your music. The world-class components are mounted in the dashboard separately from the controls on the floating center stack and the control buttons on the steering wheel.
The ten Dynaudio high-end loudspeakers of the Dynaudio Premium Sound system are powered by a 5x130 W Alpine digital amplifier. There are two separate speakers—woofer and tweeter—in each door, and in the side panels at the rear seats there is a similar set-up. Each speaker has a crossover filter for maximum fidelity. The latest generation Dolby® surround system with a center loudspeaker and surround sound recreates authentic sound with a strong sense of presence for everyone in the car. A Volvo world first. The digital Class D amplifier features new technology to provide extremely high efficiency, enabling it to generate the most audio power from the least amount of current.

High Performance (Std Version 1.0)
A powerfully versatile system. Each loudspeaker is fitted with a more powerful magnet and a larger coil. In combination with the amplifier, this system promotes excellent transient reproduction and high power—quite simply superb sound. High Performance equipment includes:

- RDS radio
- MP3 and WMA compatible CD player
- 8 High Performance loudspeakers
- 4x40 W High Performance amplifier
- AUX input
- iPod®/USB Music Interface

Options: an MP3 and WMA compatible 6-CD changer (in place of the CD player), iPod®/USB Music Interface.

Dynaudio Premium Sound (Std Version 2.0)
Our top-of-the-line audio system designed for perfect sound dynamics, featuring 10 loudspeakers by Danish specialist Dynaudio. With Dolby® Pro Logic II surround sound for an authentic audio experience in all seats.

Premium Sound includes:

- SIRIUS satellite radio (N/A for Version 1.0 applications)
- RDS radio
- MP3 and WMA compatible CD player
- 10 Dynaudio loudspeakers
- 5x130 W digital Class D amplifier
- SIRIUS satellite radio
- AUX input
- iPod®/USB Music Interface

Options: an MP3 and WMA compatible 6-CD changer (in place of the CD player), iPod®/USB Music Interface.
THIS IS NOT A CAR. IT'S A MOVEMENT. A SCHOOL OF THOUGHT. A PLAN OF ACTION. OK, MAYBE IT IS JUST A CAR. BUT IT'S YOUR CAR, SO LET'S KEEP IT YOUR CAR.

While safety doesn't stop when you park your car, personal security is a full time job. For example, on your way to or from the car at night your path can be lit up. With keyless drive, the doors unlock as you grasp the handle. Should you encounter an emergency situation, the alarm can be activated with your hand-held remote control. The combination of sturdy door locks and an electronic immobilizer is an effective theft deterrent as are the available laminated side door windows.

Remote-controlled central locking
A button on the key fob enables the doors and the tailgate to be locked or unlocked. Both doors can be set to automatically lock just around the door handle, which prevents unauthorized use of the interior. Both doors are also equipped with an alarm system.

Alarms
Connected to the doors, hood, and tailgate, the available alarm has 10 sensors that constantly keep watch. Should you encounter an emergency situation on your way to or from the car, the alarm can be activated from your hand-held remote control.

Approach Light and Home Safe Lighting
On your way to and from your car at night, Approach Light and Home Safe Lighting enables you to light up the car and its immediate environment using your remote control. And with available puddle lights in the door mirrors, the pool of light around the car is further extended.

Door locks
The door locks feature an encapsulated cylinder that rotates freely if someone uses a screwdriver to try to get inside. If a thief does get inside, through a window perhaps, the doors cannot be unlocked from the inside without the key.

Electronic immobilizer
The ultra-modern immobilizer and the electromechanical steering lock make it almost impossible to start or drive the car without the key or your remote.
HERE, HIGH-SPEED CATAPULTS HELP US PUSH AN ENTIRE INDUSTRY FORWARD (DON'T TRY THIS AT HOME).

Inaugurated in 2000, the Volvo Cars Safety Center in Göteborg is the world’s most advanced crash laboratory. Here we crash our cars into other vehicles and obstacles at any angle and at speeds of up to 75 mph. We conduct over 400 full-scale crash tests each year. Many of these tests are based on what our Accident Research Team discovers at the scene of a real accident. Since 1970, our researchers have investigated over 32,000 such accidents. This gives us the unique ability to learn what works in real life and what doesn’t—knowledge that helps us improve, innovate and help save lives. The patented frontal structure of the Volvo C30 is a result of these efforts. Of course it takes more than catapults and lab coats to make some of the safest cars in the world—how a car behaves on the road in real life—as well as in an accident—is the ultimate test of a car’s safety. The way the chassis interacts with brakes, steering and different stability enhancing systems not only determines how fun a car is to drive—but is also crucial to help drivers maintain control in challenging situations. On the road is where innovation confronts reality.

A passion for safety
There’s an undeniable link between better cars and a Volvo C30’s sophisticated systems designed to help you avoid accidents as we explore the systems designed to help protect you when an accident does happen. For example, the Volvo C30’s stability and active yaw control help you maintain your course, enhance vehicle handling and provide a safer driving experience.

Visibility
One of the most important criteria for safe driving is good vision. The Volvo C30 offers good all-round visibility. This is partly due to its unique, tapered rear design. In addition to the glass tailgate, you can actually see more of what’s behind you through the rear side windows. The large, heated door mirrors and the height adjustable driver’s seat also help provide excellent visibility.

Testing the limits
To test our best, we journey to our proving ground in Hällered, Sweden with its 55 km of test tracks—including different road types from all over the world. This facility is where we scrutinise a car’s ability to actively support its driver in all imaginable (and unimaginable) situations. It’s also where we expose all new Volvo models to thousands of kilometres of extreme conditions to expose any weakness. This is also where we evaluate the interaction between the car and the driver. Because the most important safety feature in any car is the one we drive.
Life-saving innovations
Many of the safety features found in a Volvo are based on the findings from the Volvo Accident Research Team. A few recent examples are the collapsible steering column, the energy-absorbing frontal structure, the Side-Impact Protection System (SIPS) and the Whiplash Protection System (WHIPS).

Virtual crash testing
Super-computers make it possible for us to recreate and analyse different crash situations six times per second without crashing real cars. This lets us test new cars virtually even before they exist as prototypes. This makes the next step, full-scale testing, very effective and enables us to focus our resources where they are most useful.

Component testing
In addition to the hundreds of real cars we crash test every year, advanced crash simulators help us test individual components and full crash safety systems without crashing an entire car. For example, our crash sled can grip only the passenger cabin and recreate the exact movement a car makes in a collision. This is unique in the car industry and it has helped us develop front seats with the Whiplash Protection System (WHIPS).
THE SAFER YOU ARE,
THE SMARTER WE LOOK.

For eighty years, we have been dedicated to making cars that save lives in an accident. Today, our safety systems also help people avoid accidents in the first place and significantly help reduce injuries like whiplash when accidents occur. For many, Volvo is another word for safety. Proud as we are, we’re not satisfied.

Our passion for life means looking for new safety solutions that exceed current requirements and conventional testing. Our goal is to help make travel safer for every road user, for generations to come. That’s why our protective attitude has grown to include the air we breathe and the world at large. But then, we are ambitious people. At Volvo Cars, our overriding objective is to balance the needs of our company, our customers, society and future generations in a sustainable way. To find out more, please visit: www.volvocars.com/citizenship
Power windows
A quick press of the button in each door is all it takes to automatically raise or lower the front windows. Both of these windows can also be operated from the driver’s seat. What’s more, the central locking remote control can close the windows as it locks the doors.

Front seat convenience
The multifunctional tunnel console accommodates an armrest, cupholders, space for CDs and other personal things while an illuminated compartment behind the centre console with an Auxiliary mini-plug input is ideal for smaller items like an MP3 player. There’s also a holder for your spectacles or sunglasses.

Rear seat amenities
Rear seat passengers will appreciate the comfort of two separate full-size seats uncompromised by a centre seat. Without a centre seat, both rear seats enjoy improved sight lines ahead. A folding armrest for the middle is available and further enhances the lounge effect. The side panels have an armrest and two storage compartments in each side panel.

Keyless drive
Keyless drive lets you lock, unlock and start the car without having the remote control in your hand. As long as you have the remote with you, grasping the door handle automatically unlocks the door. To start the engine, simply turn the control on the instrument panel. To lock the doors, just press the button in the door handle as you leave the car.

Climate control
In addition to air conditioning, the available Electronic Climate Control (ECC) maintains chosen temperatures for either side of the cabin, while the Interior Air Quality System (IAQS) ensures that the air you breathe is as clean as possible. These systems help keep the driver alert and the passengers comfortable.

Ambient lighting
There is a courtesy light, centre console spot-light and two reading lamps located just above the centre rear-view mirror, mounted on the roof. These lights, along with a courtesy light in the rear and foot well lights, illuminate the interior’s elegant Scandinavian design and set the stage for your adventures.

Environmental care is a natural part of Volvo’s dedication to human safety. Considerable effort is invested in reducing harmful effects—in all their forms—of every Volvo car. From the earliest designs, materials are selected with respect for Earth’s finite resources and to their recyclability. As a result, up to 85% of every Volvo is designed to be completely recyclable. Interior materials are also tested for allergens and harmful substances and emissions from manufacturing.

Testing of materials for harmful substances
Making life more comfortable for people with allergies or asthma, upholstery and interior textiles comply with the Oeko-Tex Standard 100, an international benchmark ensuring that textiles and leathers are tested with regard to certain allergens or harmful emissions. Several interior metal details are tested with regard to nickel allergy, and comply with the same standards as high-quality jewellery.

Fuel efficiency
To increase fuel efficiency and to reduce carbon dioxide emissions, all Volvo engines feature advanced electronic management systems and low internal friction. Other contributors to fuel efficiency are efficient transmission systems, aerodynamic body design, and a trip computer displaying current and average fuel consumption.

Emission control
To reduce engine noise and to decrease exhaust emissions, all Volvo engines feature advanced electronic emission control systems, and are tested in emissions laboratories. Volvo contributes to fuel efficiency by developing electronic transmission systems, aerodynamic body design, and a trip computer displaying current and average fuel consumption.

Environmental care is a natural part of Volvo’s dedication to human safety. Considerable effort is invested in reducing harmful effects—in all their forms—of every Volvo car. From the earliest designs, materials are selected with respect for Earth’s finite resources and to their recyclability. As a result, up to 85% of every Volvo is designed to be completely recyclable. Interior materials are also tested for allergens and harmful substances and emissions from manufacturing.

Air quality control
A cabin filter prevents dust and pollen from entering the car through the ventilation system. For even cleaner air, request the option of active Air Quality System (AQS). This continuously monitors incoming air and actively neutralizes gases from odours and cigarette smoke. Without a centre seat as necessary, AQS also temporarily cleans other clean vents. In other locations, an active charcoal filter prevents odours from escaping and cleans the air coming in.

CUSTOM BUILD...

Polished or painted alloy wheels, Leather seats, 6-speed manual or 5-speed Geartronic transmissions, Dynaudio Sound system, Bi-Xenon Headlights and 4,999,995 additional ways to make the New C30 your customized mode of transport.

Bi-Xenon headlights
Foglights in front spoiler
Rain sensor wipers
Headlight washers
Tailgate spoiler
Power retractable mirrors, including puddle lights
Park assist, rear
Dynaudio Sound System
Dynamic chassis
In-dash 6-CD player
Cruise control
Trip computer
Power driver and passenger seat
Soft load cover
Hard load cover
Heated front seats
Load protection net
Keyless drive
Interior Air Quality System (IAQS)
Ash tray
You’ve grown up with the ability to personalize your world. From the jeans you wear, the gear you carry, the cell phones, iPods, computers and even tattoos you affix to your body, they all represent an important and personalized picture of you. So why not take the opportunity to create an All-New C30 that’s factory built to match your exact specifications. Volvo’s new Custom-Build Feature is all about “free will.” When you want your All-New C30 to look different than any other car on the road, talk to your Volvo retailer about a personalized C30...it has your name all over it.

POWER DRIVER’S SEAT
The adjustable power driver’s seat allows you to program three different memory settings.

VOLVO NAVIGATION SYSTEM (VNS)
Integrated in the dashboard and controlled from the steering wheel, VNS helps you find the quickest or shortest route to your destination. Audible guidance is provided when necessary. The display shows your current location, as well as the time and distance remaining to your destination. It's concealed when not in use and opens up at the touch of a button.

POWER SUNROOF
This makes the interior feel extra light and airy. The touch of a button fully opens and closes it, and, if the sun is too strong, you can always close the built-in sun-shade.

BI-XENON HEADLIGHTS
Bi-Xenon headlights provide twice the high and low beam illumination of conventional halogen headlights. These headlights self-adjust to maintain the correct angle to the road, even when the car is heavily loaded.
INTERIOR STYLING
- Sport floor mats
- Sport steering wheel in wood
- Sport steering wheel with aluminum inlays
- Gear knob wood
- Gear knob aluminum
- Sport gear shift gaiter
- Sport pedals
- Décor panel kits
- LED, Under-dash Lighting Kit

ACCESSORIES
FOR DRIVING FREEDOM
- Park assist rear
- Park assist front
- 6 Disc in dash CD changer/MP3 compatible
- Wireless hands-free with Bluetooth
- Volvo hands-free for iPhone®
- Rear view camera
- Strap in black leather
- USB and iPod Connectivity
- Sirius Satellite Radio

FOR YOUR INTERIOR COMFORT
- Load securing web cargo, compact-sized (rear)
- Luggage compartment net (medium)
- Luggage compartment net (small)
- Rear bumper cover
- Cargo compartment cover
- Net pocket side panel
- Floor mats/cabin
- Rear seat armrest
- Be the driver
- Cup holder
- Waste paper basket
- Ashtray
- Eye glass holder

FOR PRECIOUS CARGO
- Sun screen
- Booster cushion
- Booster cushion and adjustable headrest
- Sun visor assembly
- Warning triangle
- First aid kit

FOR YOUR LEISURE
- Roof mounted load carrier
- Ski carriers
- Snowboard carriers
- Surfboard carrier
- Canoe / kayak Carrier
- Cargo box
- Load basket (roof mounted)
- Car cover
- Snow chains

EXTERIOR STYLING
- Sport windshield visors
- Windshield and door mirrors
- Rear window wiper
- Windshield wiper arms
- Chrome and aluminum trim
- Inner and outer door handles
- Luggage compartment trim (metal)
- Side mirror caps
- Rearview mirror cover
- Flat pocket side panel
- Door handle trim
- Rear seat armrest
- Be the driver
- Cup holder
- Waste paper basket
- Ashtray
- Eye glass holder

FOR YOUR LEISURE

</table>
**Driveline**

- Front wheel drive. Transverse engine. Six-speed manual transmission. It is also available with a five-speed Geartronic automatic allowing manual shifting.
- The smooth six-speed transmission inspires an active driving style without the usual clutch operation, while the multiple ratios ensure efficient use of the engine power. The responsive automatic transmission delivers an exceptionally smooth and powerful response throughout the entire range of gear ratios, even at high speeds in automatic mode, where it can be shifted manually for added control and efficiency.
- For the best of both worlds, there’s the option of Geartronic—a responsive five-speed automatic for relaxed driving. It can also be shifted manually, or you can maintain a lower gear ratio to bring up the revs or provide the added assistance of engine braking.

**Chassis**

- Front suspension with spring struts (McPherson), anti-dive and anti-lift function. Multilink independent rear suspension. Anti-roll bars front and rear. Version 2.0 includes a sport tuned dynamic chassis for spirited driving. Dynamic Stability Control (DSTC) can help counteract a skid. The rigid body enables the suspension to perform optimally—enabling well-balanced handling and a high level of comfort. The front and rear suspensions interact to provide stable braking and smooth steering. The DSTC system assists if either of the drive wheels begins to lose traction, and adds the benefit of counteracting if a skid is imminent.

**Steering**

- Power-assisted electro-hydraulic rack and pinion steering. Tilts and telescopes the steering wheel column. 2.6–2.9 turns lock to lock (depending on wheel size). Turning circle 38.1 ft, depending on wheel size. Behind the wheel, you can enjoy responsive yet firm steering at all speeds. High steering precision and additional road feedback are ready in any operation.

**Brakes**

- Power-assisted anti-locking disc brakes (ABS), ventilated discs front. Electronic Brake Assistance (EBA). Electronic Brake Distribution (EBD) between the front and rear brakes. Diagonal-split braking system. Powerful anti-locking disc brakes help ensure a short stopping distance under all circumstances and withstand tough use without fading. EBA helps you use your brakes to the full in an emergency situation, while EBD distributes the braking effect between the front and rear wheels in order to achieve optimal results according to the car’s load and driving conditions.

**Fuel tank**

- 15.9 US gallons

---

**Engine**

- Five-cylinder in-line engine. Double overhead camshafts and 20 valves. The five-cylinder engine features continuously variable valve timing on both the inlet and exhaust sides. Electronic engine management system. Two-stage, sequential, electronically-controlled turbocharging on both the inlet and exhaust sides. Electronic engine management system. Cylinder deactivation is employed in the off-throttle area to enhance fuel efficiency. A high-pressure straight filling system enhances fuel atomization, improving fuel efficiency and reducing exhaust emissions. The electronic fuel injection system is calibrated to suit the vehicle’s performance and emissions needs. The five-cylinder engine is designed for low noise and vibration, providing a comfortable and quiet ride. Noise, vibration, and harshness (NVH) are minimized through advanced engineering and materials, ensuring a smooth and refined driving experience.

**Volvo C30 T5 (227 hp)**

- Engine type: 2.5-liter five-cylinder turbocharged engine
- Max. power output: 227 hp at 5000 rpm
- Max. torque: 236 lbs./ft. at 1500–5000 rpm
- Acceleration 0–60 mph: 6.2 sec
- Top speed: 146 mph
- Fuel consumption, mixed cycle, man/auto: 22/23 combined
- Environmental classification: ULEV II

**Transmission**

- Six-speed manual or five-speed Geartronic automatic
The new Volvo S40
The compact and energetic sedan.

Volvo S60
The sports sedan worth getting passionate about.

Volvo S80
The premier sedan, meticulously engineered for superior driving comfort.

Volvo XC90
The versatile SUV that takes you anywhere with grace.
