When you open up it leads you higher.
Introducing a new dimension of all the down-to-earth things in life. The Volvo C70. A full four-seater convertible with retractable hardtop. Unique in many ways. From convertible to a beautiful coupe in less than 30 seconds. Loaded with comfort and convenience, powerful performance and safety. For opening up to life, here and now.
I'm cruising on the road of life. Smelling the grass along the roadside, saying hello to the clouds, listening to the crickets in the field. Blessing the comfy leather seat. Feeling better. I breathe, therefore I am. I am, therefore I will enjoy it. Come to think of it, every moment is a moment to sing the song of life.
Enjoying life on the outside starts with feeling good on the inside.

Comfort for four

The front seats offer a nearly infinite range of adjustment at several levels. The power driver’s seat offers a memory function—useful if there is more than one person who uses the car. Rear seat passengers can simply lean back and relax in the generously tilted (26 degrees) backrest, and there’s generous space for legs and shoulders. And getting in or out of the rear seat is made easier by the wide door opening and the Easy Entry feature—a single sliding movement of the backrest.
For starters, please note that it’s a retractable hardtop that comfortably seats four adults. Really comfortably, just as you would expect from a Volvo. Then there’s the ergonomically designed driver’s seat. It’s in a class of its own, with a wide range of adjustments for individually correct and comfortable driving position. Plenty of space for all four passengers to wiggle their toes. Even in the back. Ergonomic features in both front and rear seats. All together, the Scandinavian designed ambience really makes you feel good inside and out.

Storage compartments
Wherever you sit there’s a storage compartment close at hand. In the back, there are 9 storage compartments by the sillboard armrests.

Integrated cup holders
There are cup holders under a roll-top cover between the front seat occupants—or just a useful storage space if you prefer. And two such cup holders are similarly concealed at the rear of the tunnel console for occupants three and four.

Loading hatch
Long and awkward items, such as skis or snowboards, can be placed through the loading hatch between the rear seats. Add a ski bag, and rear seat passengers are protected from soiled equipment.

Load aid
For instance, C70 offers 6.0 to 12.8 cu. ft. of luggage space depending on whether you have the top down or up. And to access your gear more easily when the top is down, press the load aid button in the trunk, which raises the retracted hard top to enlarge the opening.

Climate control
With the rear glass, the rear seat Climate Control (ECC) maintains chosen temperatures for either side of the car. When the roof comes down, the ECC automatically adapts to provide the most pleasant cabin climate possible.

Power windows
When it’s time to let in or shut out the weather, all the side windows can be opened simultaneously with the press of a button.

Multifunctional front center armrest
The new multifunctional armrest takes care of cups, CDs, mobile phones, MP3 players and other vital goods. There’s also an auxiliary input for your MP3 player. There’s even a table for rear seat passengers. To the front console, integrated sage holders are hidden under a roll-top cover.
Designed to move you even when you’re standing still.
Take a seat inside the Volvo C70 and discover that every little detail is there with you in mind. Every choice of material, the placement of equipment and technical support, the touch of the leather wheel and the stylish dashboard, the smell of new leather combined with the spring breeze outside. The driver-oriented features for comfort and safety. And, behind the front seats, you can fit a windblocker to keep things calm. Then, when you turn up the world-class audio system, it simply blows your mind even when standing still.
The unique three-section retractable hardtop is fully automatic. While the car is stationary, simply step on the brake pedal and press the button on the center console and the top is down in less than 30 seconds. If you decide the weather’s not right, another press of a button quickly puts you back under cover. Beyond turning the convertible into an elegant coupe, the steel roof provides a quiet and cozy environment in any climate—thanks to first-class upholstery, multi-layer insulation and a heated, wide, glass rear window.

From hot convertible to beautiful coupe in less than 30 seconds. And vice versa.
The sensation of movement has taken another direction.
The Volvo C70 goes much further than moving you from A to B. It’s designed to move you forward, upward, or any way you’d like your mind to roam. Put the top down and your mind will automatically open up. Enjoy the feedback from the road. With the gear knob and the leather-clad steering wheel in your hands, the six-speed manual transmission does its job to enhance the sensation of movement. In any direction you desire.

Manual transmission
The Manual six-speed manual transmission improves a sporty style of driving and helps reduce fuel consumption.

Geartronic automatic transmission
The optional Geartronic is a responsive smooth-shifting five-speed automatic, perfectly harmonized with the Volvo C70 driving experience. And when you’re in the mood for more action, just shift the lever to manual mode.

Chassis and steering
The low chassis is designed for comfort and balanced handling. The body’s unusually high torsional rigidity enables the suspension system to cope predictably and consistently with different types of road surfaces. Electro-hydraulic steering provides a quick and distinctive response, while the rear wheels turn slightly to help the car to corner.

Dynamic Stability and Traction Control (DSTC)
Volvo’s DSTC includes a number of functions that help enhance the safety and pleasure of driving. It improves traction in slippery situations by controlling the rotational speed of the drive wheels. By reducing the engine’s power output or by braking one or more wheels, the system helps to maintain traction. It can also be set to allow a certain degree of wheel spin to provide better traction in snowy conditions.
The Dynaudio Sound System's high-end speakers are powered by a 5x130 watts digital amplifier. There are three separate drivers consisting of woofers and tweeters in each door, and in the side panels—at the rear seats a similar set-up with woofer and tweeter. Each speaker has its own crossover filter to harmonize with the others. The system also includes two 8” subwoofers with a 2x130 watts amplifier to ensure that the beat goes on. The latest generation Dolby® surround system with a center speaker and sound processor recreates authentic sound with a strong sense of presence for everyone in the car's entire travel world. The digital class D amplifier features new technology to provide extremely high efficiency, enabling it to generate the most audio power from the least amount of current. What's more, sound reproduction adapts automatically to whether the top is up or down. And using the menu in the center console, you can even choose between different audio settings to suit the kind of road you're driving on.

Push the right buttons and tune into the moment.
Music down to the core, within the inner you, in direct contact with your heart and soul. That's what a really excellent audio system can achieve for you. For the Volvo C70 we have developed a unique top-of-the-line system featuring Dynaudio Authentic Fidelity. You'll find it in our Premium Sound system. The Dolby Pro Logic II Surround ensures you'll feel the music in every pore. It's all very conveniently and stylishly operated from the center console. With the hardtop up on your Volvo C70, the audio system makes sure to connect you with the here-and-now sensation. Or open up the top and share the power with the rest of the world.
Your personal security is a general mission at Volvo.
Despite the fact that the Volvo C70 is an open car, the occupants and their belongings are provided with effective protection against theft and assault. With the hardtop up, the Volvo C70 provides a much higher level of anti-theft protection than a soft-top. But even with the roof down, the advanced locking system, including locking front storage compartments in the doors, affords secure storage of personal items. An alarm and ground lighting are other personal security features. It’s a treat to be safe.

Approach and Home Safe lighting

Approach and Home Safe lighting enables you to light up the car and its immediate environment. And with ground lighting in the door mirrors, this extends the pool of light around the car.

Remote-controlled central locking

A touch of a button, and you lock or unlock the doors, trunk lid and the door storage compartments. All doors can be automatically locked the moment you drive away. Alternatively, lock them quickly using the button beside the interior door handle.

Alarm

Connected to the doors, hood, trunk and ignition, the alarm reacts whether the roof is up or down. An optional feature can detect movement inside the car. Additionally, the alarm can be activated from the remote.
This is where life starts.

“It is our promise. People trust us, and that’s a big responsibility. This is what we think about daily when we make our safety decisions. We have to maintain this trust—not only with words, but with actions. That’s also why the safety in a Volvo always begins and ends in a real life situation.”

Ingrid Skogsmo, Director Volvo Car Safety Center

Inaugurated in 2000, the Volvo Car Safety Center in Göteborg is the world’s most advanced crash laboratory. All with the purpose to imitate traffic situations and crashes as they happen in real life. We can recreate crashes with all kinds of vehicles and road obstacles at any angle from 0 to 90 degrees and speeds up to 75 mph. We perform realistic roll-over tests and test cars in terrain as well as against genuine Swedish granite rock-face—we can even simulate impacts with wild animals such as a 1100 lbs Swedish moose. Of course, these crash tests also incorporate advanced crash test dummies representing a wide range of sizes and ages—from infants to full-grown adults.

Every crash is thoroughly documented using high-speed cameras and analyzed into fragments of thousands of seconds. We even store crashed cars for a period for future reference. Beyond countless computer simulations, we conduct over 400
Life-saving knowledge
Many of the safety features found in a Volvo are based on the findings from the Volvo Accident Research Team. A few recent examples are the collapsible steering column, the energy-absorbing frontal structure, Volvo’s child safety equipment, the Side-Impact Protection System (SIPS) and the Whiplash Protection System (WHIPS).

Recreating reality into its smallest details
Advanced crash simulations are an important means of conducting realistic crash tests of separate components and entire safety systems. Our crash sled can recreate the exact movement the car makes the moment of collision, which is unique in the car world. This tipping affects the way occupants are restrained and is normally only possible to analyze through expensive full-scale crash tests.

Virtual crash tests
Super-computers make it possible for us to recreate and analyze different crash situations six times a day without crashing real cars. We have the technology to test new cars virtually even before they exist as prototypes, and we can incorporate extremely detailed virtual crash test dummies—we’ve even developed the world’s first pregnant crash test dummy. This makes the full-scale testing very effective, and enables us to focus our resources where they are most useful.

Full-scale crash tests each year. These tests are based on what our Accident Research Team discovers on the road. Since 1970, our researchers have investigated over 36,000 real-life accidents. This gives us unique opportunities to learn what works in real life and what doesn’t—knowledge that actually helps save lives.
Sweden. Other car manufacturers come here for final car testing under harsh and capricious conditions. For us, it’s home. This is where we live and drive, 365 days a year. So no wonder Volvos are in a category of their own when it comes to active safety. Take, for example, our own proving ground Hällered with its 34 miles of test tracks—including different road types from all over the world. This is the top secret facility where we scrutinize our cars’ ability to support their driver in all imaginable (and unimaginable) situations. On tracks aimed to reveal any weak spots, we expose all new Volvo models to extreme forces and conditions during hundred thousands of miles. Not to mention the distances driven on ordinary Swedish roads. Here’s where innovation confronts reality. Here’s also where we evaluate the interaction between the car and the driver. Because the most important safety feature in a Volvo is the driver. And the more efficiently the car’s onboard systems support you as driver, the safer things are for you and your passengers.

This is living it.
TO SEE AND BE SEEN.

From the start we designed the Volvo C70 to make you look good. So it's no wonder we put as much effort into creating a car you'll be comfortable with in the mirror. Of course, you'll want to make sure that you're noticed, which you can do safely and enjoyable driving. But we also like to think the design is a way to make the world a safer place. To create the experience at Volvo cars and drivers, we have to make your car look good, and in the right light, it's an electronically balanced guide screen, allowing you to enjoy expert all-weather visibility for any season.

ABS brakes with Emergency Brake Assistance (EBA)

The anti-locking disc brakes are designed for optimal performance even during repetitive and intensive use. You can brake as hard as you like as you steer clear of trouble. EBA detects an attempted emergency braking and, when necessary, provides added assistance to bring the car to standstill in the shortest possible distance.

Bright lights

The headlights in a Volvo C70 combine separate reflectors to provide even and effective illumination in all conditions. For oncoming traffic, the low beam is highlighted by a single ring of light making it easier to judge the distance to your car.

Double your illumination – twice

Compared to conventional halogen headlights, optional Bi-Xenon headlights expand your vision range with about 230%. Driving at 60 mph, you'll be able to see approximately 150 ft farther. Regardless of the load, these headlights self-adjust to maintain the correct angle to the road—even during hard acceleration or braking.
"To me, safety is beautiful. Every detail in a Volvo—from the interior ergonomics and the fantastic seats, to the body’s powerful shoulders and softly rounded front—are there for safety reasons. This is functionality that goes hand in hand with distinctive design, and it sure looks good.”

Steve Mattin, Design Director, Volvo Car Corporation

It is the interaction between the different safety systems that determines how safe a car is. It’s the number of safety features itself. First, the driver must have the right conditions for well being behind the wheel. Seats, instruments, controls, visibility, lighting—these contribute to safety when they interact to support the driver. Then there’s how the car behaves on the road. The way the chassis interacts with brakes, steering and different stability enhancing systems not only determines how safe the car is to drive—but is also crucial to help the driver maintain control in challenging situations. Finally, if an accident can’t be avoided, you and your passengers are surrounded by a wealth of interacting protective systems. Hopefully, you’ll never have to experience them in action. But it can be reassuring to know they’re there to help protect you.

Designed for life.

IN A FRONTAL COLLISION — In a frontal collision, the outer deformation zones of the frontal structure will yield to help absorb crash energy. The zones closer to the cabin are more resilient to help maintain passenger compartment integrity. The compact powertrain is designed to help optimize interior volume. Major components in the engine bay have their own predetermined positions to help keep components separate from the cabin. A steel plate under the dashboard helps prevent components in the engine bay from intruding into the cabin. The door strut protects legs and feet.

The unique geometry of the frontal structure and longitudinal aluminum struts in the doors help disperse crash energy away from the driver to the rear of the car to further help to reduce the impact on the occupants. Inside, the seat is designed for protection by optimizing the functions of all safety restraint systems. The seat belts with pre-tensioners and load limiters interact with other safety features such as the steering column that can be deformed horizontally up to 140 mm and the dual-stage airbags that adapt inflation to the force of the collision. In this way, the occupant is also protected by the occupant restraint systems.

The unique geometry of the frontal structure and longitudinal aluminum struts in the doors help disperse crash energy away from the driver to the rear of the car to further help to reduce the impact on the occupants. Inside, the seat is designed for protection by optimizing the functions of all safety restraint systems. The seat belts with pre-tensioners and load limiters interact with other safety features such as the steering column that can be deformed horizontally up to 140 mm and the dual-stage airbags that adapt inflation to the force of the collision. In this way, the occupant is also protected by the occupant restraint systems.
IN A REAR IMPACT, the rear deformation zones will help absorb as much as possible of the crash energy before it reaches the cabin. Similar to the front, the rear safety structure features an optimized mix of different grades of steel to provide strength and carefully controlled deformation. The fuel tank is designed to remain well protected in front of the rear axle. Even the exhaust system and spare wheel is designed to not affect the energy absorption. Inside the cabin, the head restraints not only help protect the neck and spine, but also help protect the head from glass shattered. A rear impact also activates the retracted rear steel roll bars to help protect the occupants from glass and debris.

IN A TIP-OVER, the Roll-Over Protection System (ROPS) is activated by a gyroscopic sensor. Behind the rear seats, the retracted rear steel roll bars deploy instantly to form a safety cage together with the one-piece hydro-formed windshield pillars (these are strong enough to hold the weight of the car twice over). In the same instant, the door-mounted Inflatable Curtain (IC) and seat belts with pretensioners are activated to help keep occupants in their seats. The side airbags in the front seats help protect the occupants chest and hip, irrespective of seating position. The door-mounted Inflatable Curtain (IC) adds head protection for the front seat occupants and helps keep them inside the car.

IN A SIDE IMPACT, the distance between your chest and the colliding car is about 1 foot. So how can we best use this distance to help protect life? To provide strength and carefully controlled deformation in a side impact, the door and side structure in the Volvo C70 is composed of a combination of ultra high strength steel and more pliant grades of steel. The reinforced door pillars are formed such that, even after a strong collision, they absorb energy on a controlled deformation path. The reinforced pillars and the side rails reduce the risk of ejection and thus protect the passengers in case of rollover accidents. The car also begins to move and tries to help protect the occupants chest and hip, irrespective of seating position. The door-mounted Inflatable Curtain (IC) adds head protection for the front seat occupants and helps keep them inside the car.
Environmental care. Part of our commitment to safety and your well being.
At Volvo, the well being of people is at the core of every decision we make. And just like safety, we believe that environmental care requires a holistic approach from the very start. For this reason, Volvos are built in some of the cleanest automotive plants in the world.

**Air quality control**
A cabin filter helps to prevent dust and pollen from entering the car through its ventilation system.

**Testing materials for harmful substances**
To make life more comfortable for people with allergies or asthma, upholstery, and interior textiles comply with the Oeko-Tex Standard 100, an international benchmark ensuring that textiles and leathers are tested for certain allergy-inducing or harmful substances. All interior metal details are tested with regard to contact allergies—so parts such as keys, door handles, and seat belt buckles comply with the same standards for nickel leakage as high quality jewelry.

**Fuel efficiency**
To increase fuel efficiency and reduce carbon dioxide emissions, all Volvo engines have advanced electronic management systems and low internal friction. Other factors that contribute to fuel economy include efficient transmission systems, aerodynamic body design, the use of various grades of steel to minimize body weight, and a trip computer displaying current and average fuel consumption.

**Emission control**
Volvo engines meet stringent international emission requirements. Advanced emission control technology eliminates between 95 and 99% of the carbon monoxide, hydrocarbons, and nitrogen oxides in exhaust fumes. The emission control system is designed to provide full effect as rapidly as possible after a cool-down when emissions are at their highest. Right down to the fuel filler door, the fuel system is designed to reduce emissions through evaporation when the car is moving or at a standstill.

**Clean all its life**
Every Volvo begins its relationship with the environment at the earliest stage of its design. Volvos are built in some of the cleanest automotive plants in the world. What’s more, our Environmental Product Information (EPI) allows you to choose a Volvo model on the basis of its overall environmental performance.

To choose a Volvo model on the basis of its overall environmental performance, see our Environmental Product Information (EPI) guide at www.volvocars.com/EPI.
Life is full of options. Here are a few to consider.

Interior ski bag
The ski bag is an added convenience for rear seat passengers and protects the ski locker when you’re transporting skis, snowboards or other wet gear with the ski hatch open. (Retailer installed accessory.)

Wind blocker
This effectively reduces drafts for the front-seat occupants when the top is down, improving ride comfort at all speeds. It accommodates extra luggage in the rear seat, and is easy to install and remove. (Retailer installed accessory.)

Park Assist
This system makes it easier to park in tight spaces by providing an audible signal in the passenger compartment as a detected object gets closer to the sensors in the rear bumper. Park Assist can also be supplemented by sensors in the front bumper. (Front Park Assist is a retailer installed accessory.)

Bi-Xenon bright lights
As darkness descends, the effective low and high beam headlights make their presence known. A ring of light around the low beam’s projector lens helps oncoming traffic judge the distance to your vehicle. The optional Bi-Xenon headlights offer an even stronger, more focused beam of light.

*The 18” high performance optional or accessory wheel and tire combination is designed for sports and performance handling, is also available with the Zesty and also adds extra horsepower on wet roads. The tires are specially designed to work with the handling and performance of the model. The lower side walls and wider tires allow for enhanced grip and performance on a variety of road surfaces. The extra performance may result in a more responsive handling feel on curves, but may also make the ride feel firmer. This option is also available in the Volvo V60 Cross Country for added performance and capability in off-road settings. Drivers should consider these factors when choosing wheels and tires. Regular tire care and maintenance, including proper inflation pressure, is important to help ensure the tires are in good shape and perform as expected. The use of a mobile app with a built-in tire pressure monitoring system, to help ensure optimal inflation pressure, is recommended.
Volvo Navigation System (VNS)*
Integrated in the dashboard and controlled from the steering wheel, VNS helps you find the fastest route to your destination. Audible instructions provide guidance when necessary. The display shows where you are and the distance to your destination. It's concealed when not in use and closes with the touch of a button.

*Maps do not cover all areas or all routes within an area. Also, constant expansion and rebuilding of the road network mean that the digital map database is not always the latest road and traffic information. Always follow relevant regulations and road information.

Keyless drive
Keyless drive lets you lock, unlock and start the car without having the remote control in your hand. As long as you have the remote with you, grasping the door handle automatically unlocks the doors. To start the engine, simply turn the control on the instrument panel. To lock the doors, just press a button in the door handle as you leave the car.

Blind Spot Information System (BLIS)
The next best thing to having eyes in the back of your head, BLIS is there to help when you're changing lanes. Rear-facing cameras in the door mirrors help detect vehicles moving into your blind spot and alert you of their presence. BLIS doesn’t make any decisions for you, but it does help to keep you informed.

*BLIS is activated once the car exceeds 6 mph, and reacts to almost any type of vehicle from a motorcycle upwards. Day or night.

Car cover
If you have to park your Volvo C70 outdoors for extended periods, the soft car cover will protect it from the elements. This three-layer cover offers reinforced protection against snow, dirt and rain. (Retailer installed accessory.)

Draco 8x18 "alloy wheels* 235/40 R18 (Retailer installed accessory)
Mirzam 8x18 "alloy wheels* 235/40 R18 (Optional)
Sadira 7.5x17 "alloy wheels 235/45 R17 (Standard)
Start creating your Umbra interior here. The top of the dashboard is Offblack, and other interior sections are in contrasting Umbra and Quartz. Select the seat upholstery of your choice, available in different materials and color combinations.

The front center armrest and interior door panels are color-coordinated with the seats and upholstered in matching materials.

**Interior selection.**

- **Sovereign Hide Calcite Cream in Umbra interior (5E84)**
  - Nordic Light Oak center stack and door panel inserts.

- **Nordic Light Oak center stack and door panel inserts.**

- **Leather Calcite Cream in Umbra interior (5D84)**
  - Nordic Light Oak center stack and door panel inserts.

- **Haverdal Quartz Beige in Umbra interior (5681)**
  - Nordic Light Oak center stack and door panel inserts.

- **Leather Quartz Beige in Umbra interior (5D81)**
  - Nordic Light Oak center stack and door panel inserts.
The Volvo C70 offers exclusive interior options to go with your personality. All our leather and fabric upholsteries are approved by Oeko-Tex. This means they’re tested for certain allergy-inducing and harmful substances. Make your choices to compose your own interior styling.

**INTERIOR DESIGN**

**OFFBLACK**

If you choose offblack all interior sections come in the same black tone. Select a seat upholstery in your favorite material. The front center armrest and interior door panels are color-coordinated with the seats and upholstered in matching material.

**Sovereign Hide Offblack** in Offblack interior (5E77)
Nordic Light Oak center stack and door panel inserts.

**Leather Offblack** in Offblack interior (5D7H)
Nordic Light Oak center stack and door panel inserts.

**Sovereign Hide Cacao** in Umbra interior (5E89)
Nordic Light Oak center stack and door panel inserts.

**Sovereign Hide**

The full hides upholstery is made from the finest Scottish hide. It’s thick, soft to touch and has an exquisite natural grain.
## Factory options:

- Airbag, driver and passenger side
- Antilock Brake System (ABS)
- Approach light
- Daytime Running Lights
- Door mounted inflatable curtains
- Double locking door locks (top down only)
- Dynamic Stability Traction Control (DSTC)
- Emergency Brake Assist (EBA)
- High positioned rear brake lights
- Home safe lightning
- Immobilizer
- ISOFIX in rear seat
- Puddle lights
- Pyrotechnical pretensioners, front and rear
- Roll Over Protection System (ROPS)
- Security system
- SIPS bag front
- Valet private locking (glove compartment, center backrest cushion, front storage compartment and trunk)
- Weight sensor, front passenger seat
- Whiplash protection, front seats (WHIPS)

## Interior:

- 3-spoke leather steering wheel
- 6-CD In-dash changer with MP3 and WMA format readability
- 8-way power seat, driver and passenger
- All-position power window switch
- Auto down power windows—rear
- Auto up/down power windows—front doors
- Automatically dimmed rear-view mirror
- AUX input for MP3 and iPod
- Clock
- Covered storage in front doors (lockable)
- Covered storage in rear quarter panel
- Cruise control
- Cup holders, front with lid and extended tunnel console with cup holders, rear with lid
- Electronic Climate Control (ECC)
- Front armrest, tunnel console
- Glove compartment (lockable)
- Haverdal upholstery (flextech with leather inserts)
- High Performance audio package with in-dash 6-CD changer with MP3 and WMA readability
- Illuminated vanity mirrors, driver and passenger
- Leather gear knob
- Memory for driver and front passenger seats
- Nordic Light Oak inlay
- Outside temperature gauge
- Pollen filter
- Power/heated exterior rear view mirrors with memory function
- Reading lights, front/rear

## Standard features:

- Storage in front of the center console
- Textile floor mats (carpet color—4 pcs)
- Trip computer

## Exterior:

- 3-Piece Retractable Hardtop
- Fog lights in front spoiler
- Key Integrated Remote control, central locking (KIR)
- Bi-Xenon headlights
- Blind Spot Information System (BLIS) with retractable mirrors
- Metallic Paint
- Navigation system
- Pearlescent Paint
- Sirius Satellite Radio
- Temporary spare wheel 125/85—16
Packages.

**CLIMATE PACKAGE**
In a Volvo you’re always prepared to deal with the ever-changing forces of nature. To increase comfort when driving in cold, rain or snow—simply add the Climate Package.
- Headlight washers
- Heated front seats
- Rain sensor

**DYNAUDIO SOUND PACKAGE**
This sound system offers an unsurpassed in-car listening experience that makes the time you spend on the road a truly moving experience.
- 12 Dynaudio speakers
- 6x130 watts general amplifier
- 4x130 watts center speaker amplifier
- 2x8” subwoofer system with 2x130 watts amplifier

**PREMIUM PACKAGE**
A Volvo offers you long, relaxed drives and a more spirited everyday life. The Premium Package will provide you with some necessities for that extra ambience and convenience.
- Compass in rear view mirror
- Homelink
- Leather seating surfaces
- Sovereign Leather (opt upgrade)

**CONVENIENCE PACKAGE**
The wide range of considerate and practical features makes life with your Volvo a truly enjoyable experience. And by adding the Convenience Package, you expand your freedom even more.
- Keyless Drive
- Park assist Rear
- IAQS
Volvo C70 specifications.

**ENGINE**

Three-way catalytic converter with heated oxygen sensor. Electronic engine management system. Light-pressure turbocharger and dual-charge air coolers (Intercoolers).

Volvo's smooth-running five-cylinder engines are designed to respond at low rpm, so there's plenty of torque without having to shift to a lower gear. This is made possible by continuously variable valve timing, low internal friction and the electronic engine control system. The distinctive six-speed manual transmission inspires an active driving style, while the smooth clutch affords confident take-off.

**Volvo C70 T5 (227 hp)**

- Engine type: 153.8 cubic inch five-cylinder turbocharged engine
- Max power output: 227 hp at 5000 rpm
- Max torque: 236 ft. lbs/1500-4800 rpm
- Acceleration 0-60 mph, man/auto: 7.0/7.4 sec
- Top speed, man/auto: 149/146 mph
- Fuel consumption, mpg, city/highway, man: 20/29
- Fuel consumption, mpg, city/highway, aut: 21/29
- Carbon dioxide emissions CO2 g/km, man/auto: 217/234
- Environmental classification: ULEV II

**DRIVELINE**

Four-speed manual with optional five-speed Geartronic automatic transmission. DSTC (Dynamic Stability and Traction Control).

The rigid body enables the suspension to function optimally for well-balanced handling and a high level of comfort. The front and rear suspensions also interact to provide stable braking and smooth steering. The DSTC stability system lets you bring the car under control.

**BRAKES**

Power-assisted anti-locking disc brakes (ABS), ventilated discs front. EBA (Emergency Brake Assistance). EBD (Electronic Brake Distribution) between the front and rear brakes. Diagonally split braking system.

**STEERING**

Speed-dependent, power-assisted, electro-hydraulic, rack and pinion steering. DSTC (Dynamic Stability and Traction Control).

Behind the wheel, you can enjoy responsive yet firm steering that gives progressive feel even at lower speeds, and you drive with high steering precision and balanced road feedbacks. Gear ratios are chosen for automatic downshifting when you shift down. Gear ratios are chosen for automatic downshifting when you shift down. Gear ratios are chosen for automatic downshifting when you shift down.

The Sportswagon—flexible, compact and full of zest.

Volvo V70
The genuine family wagon—highly competitive yet comfortably versatile.

Volvo C30
The compact and charismatic SportsCoupé.

Every moment in a Volvo is a moment designed to celebrate life. A life full of twists and turns, up and down; the little things as well as the big ones. Of course, to live life to its fullest isn’t just about you caring for others—it’s important as well.

For almost eighty years we have helped save lives on roads around the world. Nevertheless, when it comes to improving automotive safety, we will never be satisfied. And while we’re seeking new solutions, our existing safety systems are preventing many accidents from happening and providing some real protection when they do.

Our passion for life means looking after our children’s children, too. Which is why we try to balance the needs of our company with those of society. With this bigger picture in mind, we develop engines and technology that have less impact on mother earth. This approach also explains why we pay so much attention to your immediate environment—in the car. Simply put, we care about you—and the whole circle of life.
It’s a single idea, one point of contact for all your car ownership needs, whether it’s finding the right financing or who to contact in an emergency.

Get the most out of owning your Volvo.

Volvo Car Finance North America

If you purchase or lease your Volvo through Volvo Car Finance North America, you can take advantage of services designed to finance your new custom-built car and make owning your Volvo easier.

Volvo Overseas Delivery

Volvo Overseas Delivery offers a unique way to buy your new custom-built car as well as a unique way to see more of Europe.
