THE ALL-NEW VOLVO XC70
Round peg escapes square hole
Built to take you farther and keep you safer, this all-new Volvo XC70 tackles on any and all roads and, may we suggest, imposes upon them all considerably. While the all-new exterior is fit for excursions outside city limits, the all-new interior provides its own escape with highly civilized comfort and class. Innovations include available integrated child booster seats with two stages for growing children, laminated glass available all around (world-first for sedans) and there’s a powerful six-cylinder engine available for the first time in a Volvo XC70.

2-way Booster (option optional)
A world first, these integrated seats adjust to two heights to accommodate children of different ages. Two removable columns can be extended to 4 inches, giving extra width for a snug fit, and the seat cushion’s edges are rounded for comfort. Each seat cushion is equipped with 2 律 simulation to customize the height automatically. Booster cushions and the advanced body and structure promote new standards of protection, even in side impacts.

Heated seat option included:
Your low back cushion is always within reach, even when the seat is folded. The rear seats also feature a fold-down seat-back rest, making it easier to load and unload in the middle. The armrests can be adjusted for extra comfort and safety, ensuring the seat’s movements work in harmony for everyday use.

Volvo XC70's 2-stage airbag feature:
If you ever need to use the airbag, the system's ability to adjust the sensitivity is especially helpful to protect the neck and head area. In an impact, the airbag deploys at different speeds, based on the severity of the collision.
Until roads are built like Volvos, you would do well to own this car.
Sweden offers many challenges for cars and drivers, including temperature changes and the weather that comes with them. But it’s all new examples. The terrain itself is only muddy. Every car we make has to be able to handle it.

Of course, this makes the air more dense. A Peppermint will suit to random roads of every center. Including roads that aren’t roads at all but one, of fact, I hear later.

AWD with Instant Traction™

The advanced Haldex® AWD system with Instant Traction™ has an electronic management system that constantly monitors the speed of the wheels, the throttle, engine torque, engine speed, and the traction.

When the front wheels lose traction, power is redirected to the rear and instantly transferred to the rear Fukkedeck wheels. This means a lot more power when the rear wheels slip. Power is redirected to the front and instantly transferred to the rear Fukkedeck wheels.

Chassis & steering

The McPherson front suspension and the multi-link rear suspension work harmoniously to enhance handling. The McPherson front suspension allows precise quick response to the suspension elements and precise steering provides absolute pedal-to-paddle feedback.
Driving is not a contact sport.
The all-new Volvo XC70 expands the concept of space to include the distance between you and the car in front of you. Maintaining this space automatically while using cruise control takes more than mere speed control; it requires automatic distance management. The optional Volvo Adaptive Cruise Control system also employs state-of-the-art radar technology with Volvo's sophisticated braking systems. All of this advanced intelligence can help you maintain a safe distance at speeds above 18 mph. But please note, it will not stop you if you are driving too close in inappropriate conditions.
VNS. Why some men never stop to ask for directions.

There is nothing sexier, with pride and determination that a little guidance can be making an intelligent companion on board to help with the navigation is the easiest way to get where you're going. Sometimes, stopping for directions is impossible or ill-advised and in the case of some people, inconceivable. The available Volvo Navigation System (VNS) can be your go-to guide. Detailed maps are accessible direct from your and there's no chance of that having the information you need to get where you're going is never enough to keep driving.
If it’s peace and quiet you seek, skip this part.

Dynaudio’s sound systems are among the best in class—especially with the latest generation of stereo® mini Logix® in your car and Dynaudio® sound systems. mini Logix® & Sirius® satellite radio systems feature a center loudspeaker and sophisticated sound processing calibrated especially for the interior of the all-new Volvo XC70. This system ensures that every passenger enjoys a world-class sound experience regardless of seating position—a remarkable achievement considering how close passengers sit to one side.

High Performance (standard)
This is a powerfully versatile system. Each loudspeaker is fitted with a moveable magnet and a larger cone, to combine with the amplifier; this system promotes better crossover performance and high-power, high-impact sound quality. A high-performance system reveals:
• A center CD
• An AM/FM receiver
• A high-performance tweeter
• MP3 and WMA compatible CD player
• A 12-volt output

Dynamic Premium Sound System (optional)
This is our signature for audio system design as an expression of the wider sound spectrum. This system features Tweeter loud speakers by Dynaudio® surround speakers by Dynaudio®. In addition, the logo® is forward-firing with a well-balanced audio experience. A dynamic premium sound system reveals:
• A center CD changer
• An AM/FM radio receiver
• A high-performance tweeter
• A 12-volt output
• A premium sound calibration by Dynaudio®
• MP3 and WMA compatible CD player
• A 12-volt output
Hill Descent Control (HDC)

A new standard feature in all new Volvo XC70 is the Hill Descent Control. This system offers a smooth and controlled Hill descent on steep, rough roads. You simply push the HDC button and the vehicle will descend using the brake system to control vehicle speed. You can then concentrate fully on steering. Hill Descent Control is ideal during rock scrambles, working down steep, rocky slopes — when reversing downhill to hitch up a boat trailer for example.
Hold on tight.
First seat as much of the 40/20/40 split Ness seat as you need to accommodate cargo and passengers comfortably and safely. The headrest mechanism built inconspicuously out of the way provides a full-fledged leading compartment. You can also add a compartmentalized rear securing net and a net pocket for small independent items. Equipment in the rear compartment gets protected by the comfortable boot cover.

For exceptional stowing capability and particularly bulky items, you can lock the foot passenger backwards forward. This provides a large, full-sized leading compartment from the bulkhead in the main cabin. It’s big enough to hold the insect net/carrying system to keep your seat high and dry.

VersaFloor
Load all the way: The row 40/20/40 split
stretches from the center to the cockpit.

Storage
No small beating in the glass box.
Large enough to hold a decent
compartment (first row seat) or
independent boxes. View.
No journey too far. No weekend too long.
Standard security features such as the sturdy door locks and the electronic immobilizer help to prevent the tangible aspects of a break-in. The optional personal communicator, on the other hand, offers you the comfort of knowing the car's status even when you can't see it. To further foil smash and grab burglaries, the closed tailgate—part by the function of its elegant design—overlaps and seals the compartment hidden under the cargo floor. To keep this private storage area inaccessible to other users of the car, e.g., valet parking, you can set your private locking preferences to include the tailgate with your other inaccessible storage areas.
"Safety is our priority. People trust us, and that’s a big responsibility. This is what we think about daily when we make our safety decisions. We have to maintain this trust—not only with words but with actions. That’s also why the safety in a Volvo always begins and ends in a real-life situation."

Ingrid Skogsmo, Director Volvo Car Safety Center

Inaugurated in 2000, the Volvo Car Safety Center in Gothenburg is the world’s most advanced crash laboratory. All with the purpose to imitate traffic situations and crashes as they happen in real life. Here we conduct crashes with all kinds of vehicles and road obstacles at any angle from 0 to 90 degrees and speeds up to 75 mph. We perform realistic rollover tests and test what it means to us, as well as against genuine Swedish granite rock-fills—we can even simulate impacts with wild animals such as a 110 lb Swedish moose. Of course, these crash tests also incorporate advanced crash test dummies representing a wide range of sizes and ages—from infants to full-grown adults.

Every crash is thoroughly documented using high-speed cameras and analyzed into fragments of thousands of seconds. We even take crash cars for a period for future reference. To test court cases, we conduct over 400

This is where life starts.
Life-saving knowledge

Many of the safety features found in a Volvo are

the result of accident research. One recent example is the

Side Impact Protection System (SIPS) and the Whiplash

Protections System (WHRPS).

Accidents reveal tiny details

Accidents play a central role in what is most important —

small details and how they interact with safety systems.

Our crash tests can recreate the most minute-

the car makes the impact of a collision; which is

unique to the car model. This helps the

way occupants are restrained and can only be analyzed through impressive full-scale

crash tests.

Virtual crash tests

It is possible for us to

create virtual crash tests to

study real-world situations

six times a day without crashing real cars. We

test the technology to find new solutions

even before they reach production and we

are not out of reach of virtual crash tests.

These vehicles and systems are,

just as important, as those

on the road.
Sweden. Other car manufacturers come here for final car testing under harsh and capricious conditions. Far as it's torrox. This is where we live and drive, 365 days a year. So to wonder Volvo are in a category of their own when it comes to active safety. Take, for example, our own proving ground Hällered with its 34 miles of test tracks: including different road types from all over the world. This is the top secret facility where we scrutinize our cars' ability to support their driver in all imaginable (and unimagined) situations. On tracks aimed to reveal any weak spots, we expose all new Volvo models to extreme forces and conditions during hundreds thousands of miles. Not to mention the distances driven unordinary Swedish roads. Here’s where innovation confronts reality. Here’s also where we evaluate the interaction between the car and the driver. Because the most important feature in a Volvo is the driver. And the more efficiently the car’s onboard systems support you as driver, the safer things are for you and your passengers.
NEW TECHNOLOGY FOR A NEW DRIVING EXPERIENCE.

Before, you had to react. Now, thanks to new features like Pilot Assist, your vehicle's sensors can provide visual and audio warnings for several seconds prior to an impending collision in a Volvo. Pilot Assist uses a combination of sensors and software to help you avoid or mitigate collisions. For a full explanation of how Pilot Assist works, visit www.volvo.com.

**New Driver Safety Lights**

- **Headlights with Lane Change Function**: When you change lanes, the headlights will adjust to provide better illumination. This feature is designed to help you see the road more clearly during lane changes.
- **Distance-Sensing Headlights**: These headlights are designed to automatically adjust their intensity based on the distance to other vehicles. This feature can help you maintain your safe following distance.

**Double your illumination range**

- **Regenerative Braking System**: This system uses the energy from braking to help recharge the battery. It can also help reduce your carbon footprint.
- **Blind Spot Information System (BSIS)**: This system uses radar to detect objects in your blind spots. It can help you avoid collisions by alerting you to potential dangers.

**Emergency brake lights**

- **Automatic Emergency Braking System (AEB)**: This system uses sensors to detect potential collisions and automatically applies the brakes to help avoid or mitigate an accident.
- **Pedestrian Detection**: This system uses cameras and sensors to detect pedestrians and alert you to potential collisions. It can also automatically apply the brakes to help avoid an accident.

**Cruise Control System (CCS)**

- **Lane-Keeping Assist (LKA)**: This system uses cameras and sensors to help keep your vehicle in the center of the lane. It can also alert you to potential lane departures.
- **Adaptive Cruise Control (ACC)**: This system uses sensors to maintain a safe distance from the vehicle in front of you. It can also automatically apply the brakes to help avoid collisions.

**Driver Alert Control (DAC)**

- **Fatigue Alert System**: This system uses sensors to detect changes in your driving behavior that may indicate fatigue. It can alert you to take a break.

**Rear-View Camera System (RVS)**

- **360° Camera**: This system uses sensors to provide a panoramic view of the area around your vehicle. It can help you avoid collisions when backing up.

**Volvo's Commitment to Safety**

Volvo cars are designed to be the safest cars possible. Volvo uses advanced safety technology to help keep you and your passengers safe on the road. For more information, visit www.volvo.com.
Designed for life.

To me, safety is beautiful. Every detail in a Volvo—from the interior ergonomics and the fantastic seats, to the body’s powerful shoulders and softly rounded front—are there for safety reasons. This is functionality that has been hard at work and decades of design, and it’s what keeps us safe.

Steve Hyldahl, Design Director, Volvo Car Corporation

The interior bin between the different safety systems that determine how safe a car is, is the body’s safety features. First, the driver must have the right conditions for well-being behind the wheel: Seating, instruments, controls, stability, lighting will all contribute to safety when they interact to support the driver. Then there’s how the car behaves on the road. The way the chassis interacts with the tires, steering and different stability enhancing systems not only determine how far the car is to drive—this is also crucial to help the driver maintain control in challenging situations. Finally, if an accident can’t be avoided, you and your passengers are surrounded by a wealth of interacting protective systems. Hopefully, you’ll never have to experience them in action. But it can be reassuring to know they’re there to help protect you.
IN A ROLL-OVER the extremely sturdy safety cage will help protect the occupants while the safety belts help them remain inside the vehicle. After our rollover tests, all six of the Volvo S80’s occupants were able to exit the car safely. Each occupant in the front row is restrained by a seat belt, while those in the rear are restrained by seat belts and a head restraint. The roof structure is reinforced to help keep the passenger compartment intact.

IN A SIDE IMPACT the distance between your chest and the colliding car is about 1 foot. So how can we best use this small distance to help protect life? To provide strength and carefully controlled deformation in a side impact, the door and side structure of the Volvo XC70 are built with ultra high strength steel and softer grades of steel. For example, the unique one-piece hydro-formed side structure is extremely strong to help withstand a severe side impact—even with a larger vehicle such as an SUV. And in the front seats, you’ll find strong, rigid side-impact tubes. These transfer the loads from the side of the car to the steel structure in the cabin, thus helping to keep the passengers inside the car safe in the front and rear as well. The XC70 also includes advanced strategies to help provide head protection.

IN A WHIP-IMPACT the car deformation zones will help already at some of the seat energy absorbed to help it recover the seats, head restraints and seat belts to help keep the occupants in their seats. If the car first has been hit from the side, the Inflatable Curtain (IC) is activated to help protect the occupants chest and hip—the hip chamber inflates with five times higher pressure than the chest chamber to help absorb the maximum impact where the body is most fragile. The Inflatable Curtain (IC) adds protection for the head as it helps keep the occupants inside the car, both in the front and rear as well. The IC also includes advanced strategies to help provide head protection.

The energy-absorbing interior also adds restrained in their seats. If the car first has been hit from the side, the Inflatable Curtain (IC) is activated to help protect the occupants chest and hip—the hip chamber inflates with five times higher pressure than the chest chamber to help absorb the maximum impact where the body is most fragile. The Inflatable Curtain (IC) adds protection for the head as it helps keep the occupants inside the car, both in the front and rear as well. The IC also includes advanced strategies to help provide head protection.

The Inflatable Curtain (IC) adds protection for the head as it helps keep the occupants inside the car, both in the front and rear as well. The IC also includes advanced strategies to help provide head protection.
Environmental care. Part of our commitment to safety and your well-being.

At Volvo, the well-being of people is at the core of every decision we make. That’s why we believe that environmental care creates a balance, approved from the very point that this means Volvo are at ease with all the dynamic automative parts in the world.

All quality control
A clear filter helps to prevent dust and other harmful substances from entering the car through the ventilation system.

Testing materials for harmful substances
To make life more comfortable for people with allergies or asthma, all Volvo cars’ interior materials comply with the Globaltoxin Standard. This means that all materials are free from harmful chemicals.

Fuel efficiency
A cleaner fuel, higher efficiency and reduced carbon dioxide emissions, all of which means a cleaner environment.

Emission control
Take engine power, tailpipe emissions, emission reduction measures, and exhaust emission technologies into account.

Great all the time
Spare parts designed to be balanced with the environment in mind for a range of technologies. It’s just one of the many things that makes us different.
Factory-installed options.

The mark of quality you can see, not knowing that you get the value that suits your lifestyle. Customize your car with the options that best meet your demands and desires, so you'll never be behind the wheel of your individually tailored Vision ACTY.

**Adaptive Cruise Control (ACC)**
ACC is designed to maintain the gap. You just set the desired speed and the oncoming car gets the vehicle in front of you. When the traffic comes, a slowed vehicle is held at your speed automatically adapts to fast vehicles.

**Wind Alert Information System (WAS)**
WAS uses a real-time camera installed on the door mirror to keep a constant, on either side of the road, a vehicle within you and the system drives you with a speed of 60 mph or right. Together with the door mirror, this gives you awareness the vehicle's safety of a lane change. It is activated when the rear motion over 8 mph, and needs to select up or down a vehicle from a pre-tuned speed, day or night.

**Personal Car Communication (PCC)**
With an optional communication device, you can receive an audio or visual alert. This can be programmed on a smartphone or by a smartphone, and can be set up in the car to your preference. The PCC is activated when the vehicle is stopped, and needs to select up or down the volume from a pre-tuned speed, day or night.

**Rear Seat Entertainment (RSE)**
With the optional RSE, you can enjoy passengers use a video game or watch a DVD, independently of each other. The RSE includes two 7-inch wide screens displayed glass, the headrest and backrests and at the back of the seat. The passenger is in a multi-functional (DIO) system with separate headphones, and an audio input for game consoles and each.
Vehicle accessories help you make your Volvo S60/T5/T6/T8/TT8 the vehicle you want it to be. They are from 1/3/2007 that have been tested by Volvo’s quality specialists and environmental requirements.

For more information about the technology and design of your Volvo, see the Volvo Accessories brochure for a complete list of optional Volvo accessories.

For driving precision:
- Park assist: Incl. Surround Cam.
- Parking assistance camera
- Voice Hands free with Bluetooth
- Voice Command

For your entertainment:
- Volvo Flex Disc Adapter
- USB / iPod interface
- Satellite radio
- Rear Seat Entertainment System with Dual DVD player
- 6 Disc in tray CD changer

For passenger cargo:
- Cargo area grid
- Sun screen, Large area
- Rear window rearview foldable sun screen
- Rearview camera and backsound
- Child safety mirror

For your luggage:
- Tailer hitch, 2” Square profile
- Tailer hitch receiver (side, screw
- Tailer hitch receiver (side, screw, Lock, included lead basket)
- Tailer hitch receiver (side, screw, Lock, Luggage compartment"

For Peter:"
- "Load Bar" varying colors
- 6L Carcass, roof mounted
- Snowboard carrier, roof mounted
- Crossbar/Daylight, roof mounted
- Surfboard carrier, roof mounted
- Wind carrier, roof mounted
- Load basket, roof mounted
- Cargo box, roof mounted
- Portable table in coater / yellow
- Integrated coater / yellow
- Luggage compartment"
- Battery charger
- Retractable side, screw
- Rear seat guard
- Protection, gel-/coal-
- Cargo-management system

For unexpected situations:
- Ick Hey, foot and rear
- Glossy engine hardware
- Leaflet rear lid
- Wiper/washer bottle
- Forward assist
- Rear light kit
- Rear chrome
- Car wax
Leather-offblack upholstery, Anthracite Black interior (F100)
Classic wood trim, front and door panel inserts.

Suede Textile/Tex-Bleached upholstery, Anthracite Black interior (F500)
Dark trim trim, front and door panel inserts.

Exterior design.
Aluminum Slat™️
An aerodynamic design element that enhances the roofline and the vehicle aesthetic. These aluminum slats allow you to express the true, raw, and pure character of the vehicle.

Rear Spoiler
The sculpted, aerodynamic spoiler adds a modern touch to the vehicle’s exterior. It enhances the aerodynamic profile of the vehicle while maintaining the interior space in the rear.

Harmonized Luggage™️
Silver Stone Standard
### Packages

#### Climate Package
- In a cold weather position, you are with the weather protection from the Volvo, except when you are the mobile commander after being on road or in a stormy area. The Table 1 Packages
  - Heated front seats
  - Heated rear seats
  - Heated steering wheel
  - Heated windshield mirror
  - Rear view mirror

#### Convenience Package
- The most range of convenience and control of the Volvo Premia Pack is provided by the Volvo Premia Pack. The following Convenience Packages please your Volvo and offer you a full list of features:
  - Smart key fobs: large area
  - Precise key fobs
  - Roadside service, 4G Link
  - High-quality interior upholstery
  - Keyless entry
  - Power sunroof
  - Power rear view mirror
  - Power windows and mirrors
  - Power steering wheel
  - Power rear view mirror
  - Power passenger seat
  - Tilt steering wheel

#### Premium Package
- A Volvo after you long distance drive is an investment in your safety. The Volvo Premium Package offers you a full list of features like the convenience and control:
  - Audio steering wheel
  - Convenience
  - Air conditioning
  - Leather seats
  - Power driver seat with memory functions
  - Comfort
  - Power mirrors
  - Power passenger seat

#### Sensus Premium Sound System
- The Sensus Premium Sound System provides the best audio experience from your Volvo. The audio system, which is the foundation of the Volvo sound system, provides an immersive and compelling experience:
  - 12-speaker system
  - 360W total output
  - 17" Sensus Enhanced Carplay
  - HD and DAB compatibility, 12-pin plugs
  - A2D input
The all-new Volvo XC70 specifications.
To live life is to care about it.

Meet the family.

The new Volvo S40
The compact and elegant sedan.

Volvo V50
The sports sedan with a performanceengaged for superior driving comfort.

The new Volvo V60
The sporting elegance, ambitious.

The all-new Volvo V70
The practical family wagon highly competitive yet comfortably variable.

The all-new Volvo XC70
The rugged yet stylish all-road.

The new Volvo XC90
The rugged yet stylish all-road.

The all-new Volvo C70
The sexy, sporty fast back.

Volvo C70
A convertible where you want it.

Volvo C70
A coupe where you need it to be.

Every moment of a Volvo is a moment designed to Coleman the full of fresh and turns, you sho are done this little thing as well on the big
your 40 minutes to live. In life, in fact, being patryon is waiting for others is important as well,

For all sports, we are building new condion car existing only systems so prevent-
ing many accidents that happenning are providing some real protection what they do.

Our passion for life means looking after our customers who has been by us to
increase the mean of our comparable. If you are
to the big picture in a car, we are engingen and technology, that have has been impact of number one. This approach also
explains why we pay so much attention to your immediate environment in the car. Simple put,
we care about your and the whole circle of life.
Taking care of your ownership needs.

Volvo Car Overseas Delivery

Volvo Overseas Delivery offers a unique solution to keep your new car under warranty and as such a unique way to travel round Europe. And when you’re done travelling:
- Bring the pleasure of driving a Volvo back home. Purchase your own Volvo as part of the Volvo Overseas Delivery Program and enjoy all the benefits:
  - Vehicle inspection at 12 months
  - Full 3-year warranty in Europe with unlimited mileage
  - Free import taxes and duties
  - Free vehicle inspection at the Volvo Factory Overseas Centre
  - Exclusive VIP delivery experience at the Volvo Factory Overseas Centre

The essential features
- The opportunity to explore Europe and enjoy your Volvo at your own pace, with all of its specifications
- The opportunity to enjoy Europe at its best, with all of its facilities
- The opportunity to have your Volvo inspected by Volvo technicians
- The opportunity to have your Volvo delivered to your home

Volvo customer relationships
- Volvo car warranty
  - Your car warranty provides comprehensive coverage for the period of 36 months from the date of purchase. It covers all repairs needed to keep your vehicle in good working order. It also covers the cost of replacement parts and labor.
- Volvo genuine warranty
  - Volvo genuine parts are manufactured to the highest standards, ensuring optimal performance and longevity. They are available at authorized Volvo dealerships.

Volvo car delivery
- Volvo Overseas Delivery is a unique program that provides convenient delivery options for your owner’s needs, ensuring your vehicle is delivered to your doorstep in Europe.

Volvo Ocean Racing
- Volvo Ocean Racing is a world-renowned sailing event that attracts the world’s best sailors and teams. It is known for challenging and exciting races around the globe, making it a popular event for Volvo owners.

Volvo customer service
- Volvo customer service is available to assist you with any questions or concerns you may have regarding your vehicle. They are committed to providing excellent service and ensuring customer satisfaction.

Volvo Mobility Program
- The Volvo Mobility Program is a unique service that provides seamless mobility for Volvo owners. It offers a range of services, including car rental, on-demand delivery, and vehicle sharing options, ensuring you can travel confidently and comfortably.

Personal shopping
- The Personal Shopping feature is a unique service that allows you to select your own Volvo parts and accessories. You can choose from a wide range of options to customize your vehicle to your liking.

**Note:** This information is provided for educational purposes only and is not a guarantee of specific services or programs. It is recommended to contact your local Volvo dealership for more information and to confirm the availability of specific services.
A world of colors.

- 14 Ice White
- 17 Enoki Silver metallic
- 04 Ruby Red metallic
- 08 Ice Metallic
- 07 Willow Green metallic
- 03 Black
- 02 Opal Grey metallic
- 06 Barns Blue metallic

*Metallic paint is an option.

*Note: It is not possible to reproduce exact original colors in the printed page. Your local retailer can help you select your metallic color, as part of the color chart sent to the nearest dealer or paper in this brochure except as noted. Certain colors may require additional costs and are available on a selection of models. Please ask your retailer for details.
