

PONTIAC **V** VIBE

Standard on Pontiac Vibe. See page 23 for details.

pontiac.com

2009

Vibe

Modern efficiency. With an EPA-estimated 32 hwy mpg, Vibe 1.8L achieves economies while shunning compromise. A driver-focused interior, an MP3 audio jack and tire pressure monitoring are all standard. Looking for efficiency with more power? Check out the Vibe 2.4L.

Vibe GT

Seductive performance. A unique sporty look from front to rear plus leather-trimmed seating, steering wheel and shift knob. A powerful 2.4L VVT-i engine, performance-tuned fully independent suspension and 18-inch aluminum wheels. Even its 320-watt audio is about performance.

All-new 2009 Vibe. Dynamic by design.

A comprehensive list of standard features artfully combine to give the all-new Vibe a dynamic mix of performance, functionality, safety and style. They include: a sleek, sculpted form over an agile, athletic stance; four-wheel disc brakes with ABS, traction control and StabiliTrak for confident performance; five-door convenience; five-passenger seating; and flexible storage. Plus power-adjustable outside mirrors and a strong lineup of safety features that includes active head restraints for both driver and front passenger. And with three distinct Vibe personalities, the fun starts with choosing.

Vibe AWD

Effortless capability. A rugged, functional look; plenty of power; intelligent all-wheel drive and AWD-tuned fully independent suspension; responsive ride/handling characteristics. From a standard roof rack to available 17-inch wheels, it's ready for just about anything.

Efficient design. Vibe's poised stance is, in part, a function of a wider rear track and a longer wheelbase than the Audi A3. Deep within, Vibe features a car-like body-frame-integral structure that provides exceptional strength. This results in a rigid, stable foundation for optimal tuning of the suspension, enabling chassis systems engineers to dial-in a specific driving feel to match each model's distinct personality.

Vibe 1.8L: Efficient use of fuel. With Variable Valve Timing (VVT) on both cams making on-the-fly adjustments in response to throttle demand, you enjoy better highway fuel economy than the Nissan Versa, Mazda3 5-door and Dodge Caliber.[†]

[†]Base model comparison with manual transmission. EPA-estimated 32 hwy mpg; Nissan Versa 31 hwy mpg; Mazda3 5-door and Dodge Caliber 29 hwy mpg.

Efficient use of space. All Vibe models provide on-demand accommodation of changing needs for family, friends and fun. The interior is surprisingly roomy, and even with five on board there's 20 cubic feet* of cargo space behind the rear seats. In a few seconds, the rear seats are down, and you have nearly 50 cubic feet* to work or play with—more than Mazda3 5-door and Dodge Caliber.** So if you're thinking of hauling a large-screen HDTV home, you're getting the picture.

*Cargo and load capacity limited by weight and distribution.

**All competitive comparisons based on latest available information at the time of printing.

Vibe 2.4L. Efficient production of power. Under the hood is the 2.4L VVT-i engine that powers the Vibe AWD and Vibe GT, with 20 percent more horsepower and 27 percent more torque than the 1.8L. Along with that, you get the Rear Cargo Management System (see following pages). And if you go with the available 5-speed automatic, you still enjoy an EPA-estimated 29 hwy mpg.

Vibe: Modern efficiency.

Vibe's dynamic design helps you get the most for your dollar. Every model gives you a standard rake/telescoping steering wheel, fully bolstered driver and front-passenger seats, 60/40 fold-down rear seats and an audio system with an iPod®/MP3 jack and standard XM Radio (includes three-month trial).^{††} Unexpected touches include cupholders in each side door and the convenient household-style electrical outlet described on page 05. With Vibe 1.8L and 2.4L, the suspension and electric power steering are "touring" tuned for light but precise steering characteristics and a comfortable ride. Standard four-wheel disc brakes and a full slate of active chassis controls provide excellent maneuverability.

^{††}See page 19 for more on XM Radio. iPod is a registered trademark of Apple, Inc.

Vibe shown in Liquid Platinum Metallic.

Vibe's inner SUV.

All Vibe models have 20.1 cubic feet* of cargo capacity with the 60/40 rear seats up. With single-lever convenience, they fold independently to suit particular needs and provide nearly 50 cubic feet* with both sections down. A flat composite load floor and a series of rubberized strips reduce cargo slippage and scuffing. Four heavy-gauge chrome tie-downs allow you to secure a wide variety of items. Standard on Vibe GT, Vibe AWD and Vibe 2.4L is a fold-flat passenger seat with integrated seatback tray that provides table-top functionality as well as carefree hauling of larger items with the liftgate closed.

Plug in. In addition to the conventional 12-volt automotive electrical socket, all Vibe models feature a 115-volt three-prong household-style AC electrical outlet. Conveniently located on the center console just below the shift lever, it allows you to charge a portable electronic device or a laptop without special adaptors. This feature is not available on Mazda3 5-door, Scion xB, Nissan Versa and base Dodge Caliber SE models.

When upright, the system provides access to reconfigurable dividers, multiple hooks for bagged items, two net-divided sections of storage and a recessed bin large enough to hold two one-gallon beverage containers. If all that's not quite enough, a roof-mounted luggage rack is standard on Vibe AWD and available on Vibe 2.4L.

Further functionality. In all, there are over 15 different storage locations within the Vibe 1.8L interior, from a hidden change drawer to map pockets as well as cupholders in each side door. Shown above, the Rear Cargo Management System integrated within the load floor brings that figure to 25 and opens an array of possibilities. It is standard on Vibe 2.4L, Vibe AWD and Vibe GT and available on Vibe 1.8L.

Everything starts with the engine. In this case, the 2.4L VVT-i with its lightweight aluminum block and magnesium head. Peak numbers are 158hp and 162lb-ft of torque, more power than the Mazda3 5-door. But the real story is how variable valve timing on all 16 valves produces the flat power curves that mean a spirited response to the throttle at any rpm.

Vibe GT: Seductive performance.

This is the Vibe that brings out the performance potential of a solid, agile platform and a powerful, responsive engine. Fittingly, Vibe GT rolls on standard machine-faced 18-inch aluminum wheels. A sport front fascia with rally-inspired fog lamps leads to uniquely styled side rockers.

Hands-on involvement. Vibe GT's standard transmission, a crisp-shifting 5-speed manual, is sure to delight the enthusiast. But consider the available electronically controlled 5-speed automatic, optimally geared to deliver a combination of exceptional smoothness, fuel economy* and acceleration at low rpm. And as for the *fun* of a manual, the automatic is equipped with Driver Shift Control capability, meaning you can shift for yourself with just a quick tap of the shift lever.

*EPA-estimated 21 city/29 hwy mpg automatic, and 21 city/28 hwy mpg manual.

Vibe GT: Seriously well-equipped.

Embroidered with the GT insignia, Vibe GT's seats are leather-trimmed, as is the steering wheel and shifter knob. The steering wheel is equipped with controls for the 320-watt premium sound system that includes a rear 8-inch subwoofer for rock-solid bass presence. Vibe GT also comes standard with remote keyless entry, power door locks, power windows, cruise control and the Rear Cargo Management System. Final touches include an aero-enhanced sport rear fascia with spoiler and an exhaust diffuser with an oversized chrome tip.

Performance handling. Anticipating that you'd want to have a bit of fun with the power of the 2.4L engine, we equipped the GT with fully independent suspension. We also gave GT an integrated damper connecting the front suspension towers, bringing added cross-vehicle stiffness for an enhanced reaction to steering inputs.

GT also includes 18-inch wheels, larger in diameter than the standard wheels on the Audi A3 or BMW 328 Sport wagon. And we tuned the suspension, the steering and the chassis controls to deliver taut handling and highly responsive steering characteristics, enhancing connectivity between the driver and the road.

Vibe AWD: Effortless capability.

The Vibe AWD model is for those looking for more capability. All-wheel drive is simply not available on Mazda3 5-door and Nissan Versa. And Vibe AWD carves a tighter turning diameter than the AWD Dodge Caliber by almost two feet. The 2.4L VVT-i engine provides more power and better highway fuel economy than comparably equipped 4WD SUV's like Ford Escape and Mazda Tribute.* And fully independent suspension, tuned for AWD touring, provides excellent handling capability and control in a wide variety of road and weather conditions. In keeping with its broad capabilities and enviable power, Vibe AWD is differentiated with AWD badging and a roof rack.

* Vibe AWD EPA-estimated 26 hwy mpg; Escape and Tribute 24 hwy mpg.

Get smart: intelligent all-wheel drive.

An electronically controlled, on-demand all-wheel-drive system integrates data from all of Vibe's electronic chassis controls, apportioning torque distribution to the front and rear wheels depending on road conditions and driver demand. The system optimizes fuel economy** during normal driving by keeping most of the torque up front, but constantly feeds some torque to the rear, so there is no harsh engagement when conditions change.

Should the front wheels slip due to rain, snow or mud, the system seamlessly distributes additional torque to the rear wheels with no action needed from the driver. And since every Vibe is oriented toward performance, this system also directs more torque to the rear wheels during straight-line acceleration and high cornering input.

**EPA-estimated 20 city/26 hwy mpg.

Controlling interests. All Vibe models feature the precision of electric power-assist rack-and-pinion steering and the power of four-wheel disc brakes with aluminum calipers. For those times when the road turns slippery, standard active chassis controls include ABS, traction control and StabiliTrak, one of the world's most advanced stability enhancement systems. Stability enhancement is an extra-cost option on most Dodge Caliber models and not available on Mazda3 5-door Sport base model.

Confidence at every turn.

Vibe puts driving precision at your fingertips. It does so while surrounding you with advanced structural and functional features that allow it to combine room for five adults, flexible management of space and a quiet, refined ride. Designed for people who spend much of their time on the go, Vibe's greatest asset may be that you can assign it just about any role—with confidence.

Safety first. All Vibe models feature the same strong lineup of standard safety features, including six air bags. There are frontal and seat-mounted side thorax air bags for driver and front passenger, plus head curtain side air bags for all outboard occupants.* Seat-mounted side air bags are an extra cost on Dodge Caliber.

For your peace of mind. All 2009 Vibe models come standard with one-year OnStar** Safe & Sound® Plan. OnStar is a fully integrated in-vehicle system offering safety, security and convenience. With unlimited access to highly trained OnStar Advisors ready to help with virtually any situation you encounter on the road. You can add more convenience features with the available Directions & Connections® Plan, which includes Point of Interest lookup of over 10 million points of interest. Your Pontiac dealer will hook you up.

Additionally, every Vibe model features active head restraints for driver and front passenger, a feature not available on Dodge Caliber. In rear collisions, the restraints tilt forward, closing the distance between your head and the restraint, helping to reduce the risk of injury.

*A note about child safety: Always use safety belts and the proper child restraint system for your child's age and size. Even with Passenger Sensing System, children are safer when properly secured in a rear seat in an appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal air bag. Be sure every occupant is properly restrained. See the Owner's Manual for more safety information.

**See page 23 for additional OnStar information. Call 1-888-4ONSTAR (1-888-466-7827) or visit onstar.com for system limitations and details.

Modern art.

The centerpiece of this driver-oriented design statement is a gauge cluster featuring bold geometric shapes. The distinctive metallic trim plates create a motif carried throughout the cabin. Note the seamless integration of the instrument panel's displays and controls into one clean, harmonious piece of craftsmanship, a characteristic of the whole interior. We also incorporated a host of acoustic applications to reduce noise from wind, road and powertrain.

An oversized glove box with partitioned storage is ample enough to secure large items. Another convenient touch is a spring-loaded swing-out hook located on the passenger side of the console that can keep bagged items from spilling.

Accommodations await. Fitting the interior to the driver, the steering column has both telescope and rake adjustments. Accommodating just about every other need is a floor-mounted center console between the front seats. It incorporates dual-stage armrest storage that includes a rubber mat and removable, adjustable dividers that can be configured to fit virtually any size beverage container. In fact, Vibe features a total of eight cupholders.

Sculpted for five.

Whatever Vibe model you consider, the seats call out for special notice. The front sport buckets are highly sculpted to provide welcome support when testing Vibe's dynamic performance capabilities. The second row also features sculpting that provides individual comfort for three more adults, with a vertically adjusting head restraint for all three positions. Typical of Vibe's level of refinement are retractable assist handles for all four outside seating positions.

Vibe GT's inner qualities. Taking the support of Vibe's sculpted seats one level higher, Vibe GT's seats are leather-trimmed and incorporate a mesh fabric that offers both front and rear outboard passengers additional stability in the corners while giving the interior a performance look. Also included are a leather-wrapped shift knob and a leather-wrapped steering wheel with audio controls.

Power sunroof. Available on Vibe 2.4L, Vibe AWD and Vibe GT; control module includes a holder for sunglasses.

Intimate concert venue.

Given the fact the engineers made the Vibe interior so quiet, we had little choice but to fill it up with compelling audio, including a jack for your iPod/MP3 player. Standard on the Vibe model and on Vibe AWD is a 100-watt radio/CD player with four speakers located in the doors for intimate presence. Thirty-six presets with crossband capability allow you to select your favorite stations/channels from AM, FM and XM Radio* sources. A premium system (standard on Vibe GT) delivers 320 watts of power through a Monsoon® seven-speaker array. The latter comprises midrange units in each door, tweeters mounted within the front doors and the punch of an eight-inch subwoofer located in the right rear cargo wall.

Standard XM Radio.* Every Vibe model comes with XM Radio (includes three-month trial). Both audio systems feature an enhanced XM graphic display that shows the artist, song and two rows of text. Whether you want to be entertained or informed, to laugh, think or sing, XM's got the perfect channel for you. XM includes 69 channels of commercial-free music—rock to classical, jazz to country and everything in between. And it's all coast-to-coast digital-quality sound, ensuring that your XM performs as well  as your Vibe.

*Available in the 48 contiguous United States. \$12.95 monthly subscription required and sold separately after three trial months. All fees and programming subject to change. Subscription subject to customer agreement. Visit gm.xmradio.com for more details.

*RDS functions only where stations broadcast RDS information.

**A note about child safety. Always use safety belts and the correct child restraint for your child's age and size. Even with Passenger Sensing System, children are safer when properly secured in a rear seat in an appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal air bag. See the Owner's Manual for more safety information.

†Cargo and load capacity limited by weight and distribution.

††Automatic transmission with ball hitch. Maximum trailer weight ratings are calculated assuming a base vehicle, except for any option(s) necessary to achieve the rating, plus driver. The weight of other optional equipment, passengers and cargo will reduce the maximum trailer weight your vehicle can tow. See your Pontiac dealer for additional details.

IMPORTANT WORDS ABOUT THE CATALOG.

We have tried to make this catalog comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this catalog and other printed materials provided at the dealership or affixed to vehicles are approximates based upon design and engineering drawings and prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of printing (January 2008), please check with your Pontiac dealer for complete details. Pontiac reserves the right to lengthen or shorten the model year for any product for any reason, or to start and end model years at different times.

NEW-VEHICLE LIMITED WARRANTY This warranty is for GM vehicles registered in the U.S.A. See your Pontiac dealer for terms and conditions.

A 100,000-mile/5-year (whichever comes first) transferable Powertrain Limited Warranty plus Roadside Assistance and Courtesy Transportation.

Covered for three years/36,000 miles, whichever comes first: The complete vehicle • Tires • Towing to your nearest Pontiac dealership • Cosmetic corrosion resulting from defects • Repairs made to correct any vehicle defect • No charge for most warranty repairs

Covered for six years/100,000 miles, whichever comes first: Rust-through corrosion

GM ACCESSORIES WARRANTY GM Accessories permanently installed at the time of new-vehicle delivery are covered under the New-Vehicle Limited Warranty. If installed after delivery, coverage (parts and labor) is for the balance of the new-vehicle warranty or a minimum of 12 months/12,000 miles. GM Accessories not requiring installation or purchased over the counter carry a 12-month warranty (parts only). Does not apply to licensed products.

CORROSION PROTECTION Pontiac vehicles are designed and built to resist corrosion. All body and sheet metal components are warranted against rust-through corrosion for six years or 100,000 miles, whichever comes first. Application of additional rust-inhibiting materials is not required under the corrosion coverage and none is recommended. See your Pontiac dealer for terms of this limited warranty.

IMPORTANT NOTE ABOUT ALTERATIONS AND WARRANTIES Installations or alterations to the original equipment vehicle (or chassis) as distributed by General Motors are not covered by the General Motors New-Vehicle Limited Warranty. The special body company, assembler, equipment installer or upfitter is solely responsible for warranties on the body or equipment and any alterations (or any effect of the alterations) to any of the parts, components, systems or assemblies installed by GM. General Motors is not responsible for the safety or quality of design features, materials or workmanship of any alterations by such suppliers.

UPDATED SERVICE INFORMATION Pontiac dealers receive useful service bulletins about Pontiac products. You may purchase them from Helm Incorporated by calling 1-800-551-4123 or by visiting helminc.com.

ASSEMBLY Pontiac vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Pontiac vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest that you verify that your vehicle includes the equipment you ordered or, if there are changes, that they are acceptable to you.

ENGINES Pontiac products are equipped with engines produced by GM Powertrain or other suppliers to GM worldwide. The engines in Pontiac products may also be used in other GM makes and models.

ONSTAR OnStar services require vehicle electrical system (including battery), wireless service and GPS satellite signals to be available and operating for features to function properly. OnStar acts as a link to existing emergency service providers. Subscription Service Agreement required. Call 1-888-4ONSTAR (1-888-466-7827) or visit onstar.com for OnStar's Terms and Conditions, Privacy Policy and system limitations and details.

A NOTE ABOUT CHILD SAFETY Always use safety belts and the correct child restraint for your child's age and size, even in vehicles equipped with air bags. Even in vehicles equipped with Passenger Sensing System, children are safer when properly secured in a rear seat in an appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal air bag. See the vehicle Owner's Manual and child safety seat instructions for more safety information.

ENHANCE YOUR OWNERSHIP EXPERIENCE The Owner Center at My GMLink is a free online service that helps you make the most of your vehicle ownership. Sign up for e-mail reminders about service visits • Keep an online history of services performed • Read your Owner's Manual, warranty and more online • Receive only the recall notices that apply to your vehicle • Watch do-it-yourself videos and much more • Register today at www.mygmlink.com.

For more information on Pontiac vehicles, visit pontiac.com or call the Pontiac Customer Assistance Center at 1-800-2PONTIAC.
