At GMC, More is who we are. Our dedication to engineering excellence leads us to constantly examine and refine our ideas to give you more capability, power, and control.

For 2011, we’re proud to introduce the redesigned GMC Sierra HD, including the first-ever Denali HD, our strongest, smartest, and most powerful pickups ever, as well as the first-ever GMC Acadia Denali. These new vehicles join the legendary GMC Sierra and Yukon that offer the widest array of full-size hybrids available, and the GMC Terrain, with best-in-class highway fuel economy.

Together, they show how experience and innovation can overcome compromise. It’s why we never say never.

GMC. We’re professional grade.

1 EPA-estimated mpg. Based on 2010 GM Compact SUV-Crossover segment.

ENGINEERED FOR ADVANCEMENT.

GMC Savana is the product of our continuous desire to innovate. From a Duramax Diesel V-8 engine to the confidence of StabiliTrak, Savana is engineered to exceed expectations. This makes it the perfect choice for people focused on tomorrow.

DURAMAX DIESEL POWER

When you need maximum torque for heavy jobs, the Savana 3500 Series offers an available Duramax Diesel 6.6L V-8 Turbo engine, the most powerful diesel in its class. Rated at 260 horsepower and 525 lb-ft of torque, this powerful and proven engine helps to give the Savana a conventional trailering rating of 10,000 lbs\(^1\) and payload capability of up to 3438 lbs\(^2\).

AVAILABLE ALL-WHEEL DRIVE

Savana 1500 Series models are available with an innovative full-time All-Wheel-Drive (AWD) system—the first of its kind in a full-size van. It constantly monitors and adjusts torque quickly and seamlessly between the front and rear wheels to help you maintain control.

FIGURE 1: STABILITRAK STABILITY CONTROL

Every Savana features the StabiliTrak stability control system, a remarkable engineering achievement that helps your vehicle respond to your steering commands. StabiliTrak uses sensors to read the position of your steering wheel, vehicle speed, brake pressure, lateral acceleration and turning rate. If it senses your Savana is not responding adequately to your steering input, it can adjust engine torque and apply brake pressure to any individual wheel to help you keep on track. This system also includes Proactive Roll Avoidance, which enhances your ability to maintain steering control and reduces the risk of rollover.

\(^1\) Maximum trailer weight ratings are calculated assuming a base vehicle, except for any option(s) necessary to achieve the rating, plus driver. The weight of other optional equipment, passengers and cargo will reduce the maximum trailer weight your vehicle can tow. See your GMC dealer for additional details.  
\(^2\) Maximum payload capacity includes weight of the driver, passengers, optional equipment and cargo.
Savana is engineered with communication technology that today’s world demands. When equipped with available USB port¹ and Bluetooth®² wireless capability as well as dealer-installed WiFi³ Savana gives you the foundation for a fully connected mobile office that can help you make the most of every opportunity.

**Crafted for Control**

Savana’s interior puts a premium on convenience and control. The LS trim (shown left) includes a Tilt-Wheel adjustable steering column and cruise control and can be equipped with an available leather-wrapped steering wheel. This model also includes comfortable and supportive front bucket seats with custom cloth and inboard armrests. For added convenience, the LT trim level also features available six-way power adjustments for the driver and front-passenger seats.

**OnStar Directions and Connections⁴**

Planning your route and your day just got easier. Standard in every Savana Passenger Van is a six-month trial subscription to OnStar Directions & Connections. With Turn-By-Turn Navigation, you just push the OnStar button to tell the Advisor where you want to go, and turn-by-turn directions are downloaded to your vehicle. OnStar eNav lets you plan routes on Mapquest.com or Google™ Maps® and store them in your vehicle so you can call them up with a simple voice command.

**Connect with Bluetooth²**

Thanks to available Bluetooth connectivity, you can sync up your Bluetooth mobile device for in-vehicle, hands-free calling. Steering-wheel-mounted controls help you start a call and control volume, then dial by voice and listen to your call through the audio system. You can also monitor and operate your MP3 music player with audio system controls on the radio or steering wheel with Savana’s available USB port.¹

---

¹Not compatible with all devices. ²Go to gm.com/bluetooth to find out which Bluetooth phones are compatible with the vehicle. ³Monthly rates apply. Visit autonetmobile.com for coverage map and details. ⁴Visit onstar.com for details and system limitations.
1Cargo and load capacity limited by weight and distribution.  
Maximum trailer weight ratings are calculated assuming a base vehicle, except for any option(s) necessary to achieve the rating, plus driver. The weight of other optional equipment, passengers and cargo will reduce the maximum trailer weight your vehicle can tow. See your GMC dealer for additional details.

ENGINES
POWERED FOR PROGRESS.

GMC Savana is designed to help you get exactly the power you need. With the addition of the reliable and proven Duramax Diesel 6.6L V-8 Turbo, Savana’s engine lineup offers the widest range of available engine displacements, outputs and fuel choices in its class, from E851 to Compressed Natural Gas (CNG) to biodiesel.

ONSTAR VEHICLE DIAGNOSTICS

Savana is even engineered with the technology to help you keep track of its condition as you drive. With OnStar2 (standard for six months on Passenger Van models), your Savana can run through a monthly check of your engine, transmission, antilock brakes and more, then e-mail the results to you. You can also ask for a real-time OnStar On-Demand Vehicle Diagnostics check while you are driving.

E85 FLEXFUEL CAPABLE

To reduce exhaust emissions and help to increase power and torque, every Savana gasoline V-8 engine is FlexFuel capable.1 This means each engine can run on E85 ethanol, which is a blend of 85 percent ethanol produced from mostly domestic sources and 15 percent regular gasoline.

1Visit gm.com/e85 to see if there is an E85 station near you. 2Visit onstar.com for details and system limitations.

AUTOMATIC GRADE BRAKING AND TOW/HAUL MODE

Automatic Grade Braking is a standard feature on 2500 and 3500 Series models that monitors vehicle speed, acceleration, engine torque and brake pedal usage. Using this information, it detects when your vehicle is on a downhill grade. Then, if necessary, the transmission downshifts to help you hold your desired speed. This can help to reduce brake wear. Tow/Haul mode is a driver-selectable feature of the 6-speed automatic transmission. It reduces excess shifting when towing or hauling a heavy load. The feature is complemented by manual range selection, which allows you to select desired gears to suit variable driving conditions.

DURAMAX POWER

The available Duramax Diesel 6.6L V-8 Turbo is engineered to deliver outstanding horsepower and torque. It uses advanced direct-injection technology to run at peak efficiency and start easily in extremely cold temperatures—as quickly as 3.0 seconds at -40 degrees F. This advanced engine is also B20 capable.

DURAMAX DIESEL 6.6L V-8 TURBO
RIDE AND HANDLING

A SOLID FOUNDATION.

Savana is built to the time-tested body-on-frame formula for maximum ruggedness and durability. It has been continuously refined to incorporate advanced chassis control technology features to help you drive with confidence regardless of the season, weather or road conditions. So, whenever you need to make your move, you can be sure your Savana is good to go.

FIGURE 6: FULLY BOXED FRAME

For maximum strength, the Savana features a fully boxed, high-strength steel frame. To create this strong foundation, two C-channel sections are overlapped, essentially welding a frame inside a frame to form a rigid box that resists bending and twisting.

FIGURE 7: FULLY AUTOMATIC LOCKING REAR DIFFERENTIAL

No other competitor offers an available fully automatic locking rear differential for on-road use. When the Eaton® Locker senses a difference in wheel speed between the left and right rear wheels of approximately 100 rpm, it locks both to turn in unison for added traction.

TIRE PRESSURE MONITORING

Proper tire pressure is vital to your safety, load capability and comfort. It can also help save money in repairs and tire replacement. That’s why every Savana is equipped with the Tire Pressure Monitoring System.¹ It uses pressure sensors mounted inside the wheel to constantly monitor tire inflation. If the pressure in any tire falls below the recommended level, it sends an alert to you through your Driver Information Center.

¹Does not monitor spare tire.
SAVANA CARGO UPFIT

WORK WITH A PROFESSIONAL...

Savana Cargo Van provides a solid foundation to grow your business. It all begins with proven body-on-frame construction and a choice of wheelbases that readily adapt to the most popular upfitting options. Add in the technology of available dealer-installed AutoNet WiFi1 and Bluetooth2 connectivity, and the result is a fully functional workspace that you can tailor to all the ways that you work.

COMPRESSED NATURAL GAS (CNG) TECHNOLOGY

GM supports the goal of reducing CO₂ emissions by introducing CNG technology that significantly reduces vehicle emissions. Check the fleet Web site at gmcfleet.com for interim availability.

CHOICE OF WHEELBASES

Savana has two wheelbase configurations—135-inch (all Series) and 155-inch (3500 models)—available as Rear-Wheel-Drive (RWD) models. The 135-inch wheelbase is also available as an All-Wheel-Drive (AWD) model. At a maximum payload of up to 4187 pounds3 the regular-wheelbase RWD 3500 Series model with the Vortec 4.8L V-8 provides the highest rating in the Savana lineup.

CLASS-EXCLUSIVE DRIVER-SIDE SWING-OUT DOORS

Savana offers the choice between available 60/40 split swing-out passenger-side doors or a sliding passenger-side door. For even greater access, Savana’s available GM-exclusive 60/40 split driver-side cargo doors open into the rear cargo area for easier loading and unloading.

VOCATIONAL UPFIT PACKAGES

These seamlessly integrated products are designed to meet the vocational needs of professionals in many categories: Flexible upfit cash incentive options are also available for eligible GMC vans. For a list of eligible upfit incentives, see your dealer or go to gmc.com.

1Monthly rates apply. Visit autonetmobile.com for coverage map and details. Go to gm.com/bluetooth to find out which Bluetooth phones are compatible with the vehicle. Maximum payload capacity includes weight of the driver, passengers, optional equipment and cargo.
Savana 2500 Series Cargo van

SAVANA MOBILITY

CAPABILITY FOR ALL.

Savana Passenger Van is the ideal mobility solution with the capability of transporting the disabled with safety, comfort and dignity. Whether you need a single para transit van or an entire fleet of vehicles, Savana provides the handling, configuration and upfit capability to meet your transport needs.

LONG WHEELBASE. SMOOTH RIDE

Savana is designed with passenger comfort as its first priority. It is available in a 155-inch extended-wheelbase model for a refined and well-controlled ride that takes the effort out of longer trips. The long wheelbase also offers the space and capability to accommodate one or two extra wheelchair stations for non-ambulatory occupants, compared to the regular wheelbase model.

A SENSE OF SECURITY

When you choose Savana Passenger Van for your mobility conversion, you can be confident that it takes your safety as seriously as you do. No other competitor in its class includes standard head curtain side-impact air bags to protect the first-, second- and third-row outboard occupants. These Savana models also feature the StabiliTrak stability control system and six months of OnStar Directions & Connections, including Turn-by-Turn Navigation and Automatic Crash Response.

MULTIPLE CONFIGURATIONS

Savana can be fitted with a complete range of Americans With Disabilities Act (ADA)-compliant wheelchair and seating configurations without compromising interior comfort or convenience. Savana readily accepts a raised top, raised doors and upper reinforcement safety structure upfits, various wheelchair lift options, retractable wheelchair securement systems, numerous wheelchair seating configurations, running boards and entry systems.

1Mobility upfits contain equipment from independent suppliers. See page 18 for information about alterations and warranties. 1Always use safety belts and the correct restraint for your child's age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with a passenger air bag. See your Owner's Manual and child safety seat instructions for more information. 2Visit onstar.com for details and system limitations.
SAFETY AND SECURITY

SAFETY ISN'T JUST A FEATURE. IT'S A PHILOSOPHY.

Crafting the systems to protect you before, during and, thanks to OnStar, even after a crash is an exacting, ongoing process for the engineers who created Savana. From its solid construction and advanced control features, to the available security and confidence of OnStar, Savana is engineered with crash avoidance and crash protection features to give you greater security and confidence. So, when everyone is counting on you, you can count on Savana.

F I G U R E  8 :  A I R  B A G  P R O T E C T I O N

In addition to driver and right-front passenger frontal air bags, head curtain side-impact air bags for the first-, second- and third-row outboard passengers are standard on all Savana passenger van models. It takes only milliseconds for the bags to deploy, and all the air bags can stay inflated for up to five seconds in the unlikely event of a rollover. To protect smaller passengers, 1500 Series models have the Front Passenger Sensing System that can deactivate the air bags to prevent air-bag-induced injuries.

STEEL SAFETY CAGE DESIGN

For strength without compromise, Savana’s high-strength steel frame is tied in to the body structure with reinforced body sills, roof pillars and a reinforced floor to create a safety cage that surrounds and helps maintain passenger compartment integrity in the event of a collision.

ANTILock BRAKE SYSTEM (ABS)

Every Savana features power four-wheel disc brakes with ABS. This system helps you to maintain steering control under hard braking situations.

AUTOMATIC CRASH RESPONSE

With OnStar Automatic Crash Response, you get the help you need even if you can’t ask for it. In the event of a crash, sensors around your vehicle can automatically send an alert to OnStar. An OnStar Advisor is immediately connected to your vehicle to see if you need help. If you are unable to respond, the Advisor will use GPS technology to pinpoint your exact location to direct emergency help—even in areas of limited cellular reception. The Advisor can also relay critical crash information to emergency responders, such as the severity and type of crash, so the responders are better equipped to treat you at the scene.

Visit onstar.com for details and system limitations. Always use safety belts and the correct restraint for your child’s age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with a passenger air bag. See your Owner’s Manual and child safety seat instructions for more information.
Mechanical

Alternator 145 amps. Standard on Diesel models. Also included with rear air conditioning on gas engine models.

Auxiliary Heat Generator Fuel operated. Diesel models only.

Battery Dual heavy-duty maintenance-free with 770 cold-cranking amps, rundown protection and retained accessory power. Diesel models only.

Cold Climate Package Engine block heater

Differential Heavy-duty automatic locking rear

At GMC, More is what we do. Our dedication to engineering excellence leads us to constantly examine and refine the ideas that help give you more capability, power and control.

For 2011, we are proud to introduce the redesigned GMC Sierra HD, including the first-ever Denali HD, our strongest, most hightech and most powerful pickups ever, as well as the first-ever GMC Acadia Denali.

These new vehicles join the legendary GMC Sierra and Yukon that offer the widest array of full-size hybrids available, and the GMC Terrain, with best-in-class highway fuel economy.

Together, they show how experience and innovation can overcome compromise. It's why we never say never.

GMC. We are professional grade.
FROM ENGINEERS WHO NEVER SAY NEVER.

CHALLENGE ARISES, YOU NEED TO BE READY. IT'S WE NEVER STOP PUSHING SAVANA'S TECHNOLOGY ENGINEERED TO KEEP YOU A STEP AHEAD IN THE GMC SAVANA IS THE FULL-SIZE VAN YOU EXPECT, WITH THE INNOVATIONS YOU NEED FOR PROFESSIONALS. BY PROFESSIONALS. FOR PROFESSIONALS.

THE GMC SAVANA IS THE FULL-SIZE VAN ENGINEERED TO HELP YOU KEEP AHEAD IN A FAST-CHANGING WORLD. IT GIVES YOU THE UNCOMPROMISED STRENGTH AND CAPABILITY YOU EXPECT WITH THE INNOVATIONS YOU NEED TO KEEP PACE WITH TOMORROW FROM THE MOST POWERFUL DIESEL AVAILABLE IN ITS CLASS. TO AVAILABLE DEALER-INSTALLED INFO CONNECTIVITY: WE NEVER STOP PUSHING SAVANA'S TECHNOLOGY OR CAPABILITY. BECAUSE WE KNOW THAT WHEN A CHALLENGING MODEL, YOU NEED TO BE READY. IT'S THE THINKING AND THE CAPABILITY YOU EXPECT FROM ENGINEERS WHO NEVER SAY NEVER.

GMC WE ARE PROFESSIONAL GRADE.

TURN-BY-TURN NAVIGATION

Savana. If you drive off-course, the system can reroute you to your intended destination. An automated voice then guides you turn-by-turn until you arrive at your destination. Turn-by-Turn Navigation is further enhanced by the OnStar Directions & Connections plan that adds innovative, easy-to-use Turn-by-Turn Navigation plus Interactive Vehicle Information and Convenience Services to your GMC Savana.

Calling system is the right choice whenever you need an easy way to make and receive calls — at the touch of a button.

OnStar acts as a link to existing emergency service providers. Subscription Service Agreement required.

ONSTAR

OnStar provides a broad range of services to GMC owners. OnStar is a core asset of your Savana. Benefiting from more than a decade of innovative development, it is both a highly advanced technology— fully integrated within the vehicle— and a warm human service. Standard on all Savana Passenger models and available on all Savana Cargo models. OnStar includes 24-hour roadside Assistance, Courtesy transportation and

TRAILERING AND OFF-ROAD INFORMATION

A complimentary, one-stop resource to enhance your GMC ownership experience.

A note on Child Safety

Always use safety belts and the correct restraint for your child’s age and size. Even better, use child restraints. For more information about child restraints, visit the National Highway Traffic Safety Administration’s website or contact your local child safety seat provider. To view online child seat instruction videos, visit childseat.org. For more information about child restraints, contact your local child safety seat provider.

CERT NO. XXX-XXX-XXX

XM Radio

On all Savana models: XM Radio 1 is available with 3 trial months of service. XM turns listening into a full-time adventure with dozens of commercial-free music channels and the world’s most comprehensive sports offering. XM’s New Vibe channel features a mix of hits from the current chart, plus new and emerging talent. XM also features the NBA Play-by-Play exclusive on XM Satellite Radio. With OnStar, you can choose XM Radio 1, XM Radio 2 or XM Radio 3. XM Satellite Radio is available in 200+ of the nation’s top markets.

At GMC, More is who we are. Our dedication to engineering excellence leads us to constantly examine and refine the ideas that help give you more capability, power, and control.

For 2011, we are proud to introduce the redesigned GMC Sierra HD, including the first-ever Denali HD, our strongest, smartest, and most powerful pickups ever, as well as the first-ever GMC Acadia Denali.

These new vehicles join the legendary GMC Sierra and Yukon that offer the widest array of full-size hybrids available, and the GMC Terrain, with best-in-class highway fuel economy. Together, they show how experience and innovation can overcome compromise. It's why we never say never.

GMC. We are professional grade.
