At GMC, More is what we do. Our dedication to engineering excellence leads us to constantly examine and refine the ideas that help give you more capability, power and control.

For 2011, we are proud to introduce the redesigned GMC Sierra HD, including the first-ever Denali HD, our strongest, most measured and most powerful Sierra pickups ever, as well as the first-ever GMC Acadia Denali.

These new vehicles join the legendary GMC Sierra and Yukon that offer the widest array of full-size hybrids available, and the GMC Terrain, with best-in-class highway fuel economy. Together, they show how experience and innovation can overcome compromise. It’s why we never say never.

GMC. We’re professional grade.
WE UNDERSTAND THAT MODERN LIFESTYLES REQUIRE MODERN UTILITY, SO WE USED BIG THINKING TO DESIGN A SMALLER SUV WITH THE STANDARD FEATURES, PASSENGER COMFORT AND GREAT CAPABILITY YOU WOULD EXPECT IN A FULL-SIZED SUV AT 32 HIGHWAY MILES PER GALLON. WE GAVE IT BETTER FUEL ECONOMY THAN ANY SUV OR CROSSOVER. THIS IS TERRAIN.

WE GAVE IT MORE IDEAS PER SQUARE INCH.

GOING THE EXTRA MILE TO MAKE THE MOST OUT OF EVERY INCH. Every inch of Terrain challenges the notion of what an SUV can be. It has the best highway fuel economy in its class at 32 highway miles per gallon, and fits into smaller garages and tighter parking spaces with ease. Terrain also rewards you with big SUV comfort, professional-grade capability and bold GMC styling—it’s the very definition of efficiency without compromise.

**GOING THE EXTRA MILE**

**IN carbo N black metall Ic SH oWN WI tH aVaIlable  eQUIP me Nt**

Terrain offers class-leading highway fuel economy without sacrificing performance. Equipped with a 2.4L L4, Terrain offers 32 ePAn-estimated highway miles per gallon, and can go up to 600 highway miles on a single tank of gas. At 182 horsepower and 172 lb-ft of torque, the engine delivers responsive power when you need it for confident driving experience.

**BIG SUV COMFORT**

Terrain features the head and legroom of a full-sized SUV. To make the most of available cargo space, its cargo liftgate has rear seats that enable 55/45 split-fold rear seating, rear seat recline, and can even recline for rear passenger comfort. The seatbacks also fold down to create nearly 64 cubic feet of available cargo space.

**BOLD GMC STYLING**

Terrain takes a strong stance worthy of its professional-grade heritage—with squared-off corners, flared fenders, a prominent chrome surround grille and projector-beam head lamps mounted in large, rectangular chrome housings. What you get is plenty of bold styling and a commanding view of the road.

**HELP WHEN YOU NEED IT MOST**

Every Terrain offers you that subscription to onStar Directions & Connections. Whether you’re lost, stranded, involved in a crash or your vehicle’s been stolen, an onStar Advisor is there to get you whatever help you need, 24 hours a day.

**EPA-estimated 32 highway miles per gallon. Based on GM 2010 Compact SUV-Crossover segment. Cargo and load capacity limited by weight and distribution. Services vary with conditions.**
EVERY INCH DESIGNED TO DO BIG THINGS.

Terrain is a smaller SUV on the outside, with the capacity to do more on the inside. Terrain’s spacious, contemporary interior is designed to make the most of its five passenger capacity. The full-size seating maximizes second-row space and flexible rear cargo volume, allowing you to configure interior space as you choose.

ACCESSIBLE, ACCOMMODATING INTERIOR

EVERY INCH DESIGNED TO DO BIG THINGS.

Terrain is a smaller SUV on the outside, with the capacity to do more on the inside. Terrain’s spacious, contemporary interior is designed to make the most of its five passenger capacity. The full-size seating maximizes second-row space and flexible rear cargo volume, allowing you to configure interior space as you choose.

With the help of an available programmable power liftgate, loading and unloading Terrain’s rear cargo area is incredibly easy. The liftgate features push-button remote access, and can be programmed to open to different heights to accommodate your own height or various parking garage heights. Electronic obstacle detection can reverse and stop liftgate motion to help prevent damage.

With the help of an available programmable power liftgate, loading and unloading Terrain’s rear cargo area is incredibly easy. The liftgate features push-button remote access, and can be programmed to open to different heights to accommodate your own height or various parking garage heights. Electronic obstacle detection can reverse and stop liftgate motion to help prevent damage.

The standard multiflex sliding rear seat allows you to arrange Terrain’s available interior space to your liking. The 60/40-split rear seatback can be partially folded to accommodate a mix of cargo and passengers, or folded down completely to create nearly 64 cubic feet of total cargo space.1

Benefits from the longest wheelbase in the class, Terrain has roomy rear seating comfortable enough for three adults. The rear seat slides nearly 8 inches forward and back and reclines in five- and 10-degree positions to deliver close seating. 36 inches of rear seat legroom and rear seatback fold down forward to expand rear cargo volume.

1Cargo and load capacity limited by weight and distribution.
CAPABILITY REFINED.

Every inch of terrain’s spacious interior reflects a high level of craftsmanship and thoughtful execution. It’s finished in fine premium materials and complemented with detailed, extremely名列前茅ed controls. In devoting attention to the smallest of details, terrain provides a stylish, structured, pleasing environment for everyone.

INVITING INTERIOR

Terrain’s interior reflects GMC’s signature attention to detail. Careful organization and premium materials give terrain a structured, integrated look and feel. Red ambient lighting is used in the cupholders and around the center stack to provide an inviting, warm glow throughout the cabin and add convenience while traveling at night. Contrasting red stitching subtly defines the contours of terrain’s highly bolstered seats and complements the interior lighting.

Supportive Seating

Terrain’s seats are shaped and bolstered for additional comfort and support. They’re carefully stitched to create a refined, contemporary look that stands up to wear over time.

Cold-Weather Comfort

Terrain’s heated front seats are designed to warm you up when cold weather sets in. The seats offer three settings, giving front-seat occupants the ability to dial in the appropriate level of heat to match their personal comfort level. They’re available with cloth on SLE-2 models and standard on SLT-1 and SLT-2 models with perforated leather-appointed seating surfaces.

A PLACE FOR EVERYTHING

Terrain makes intelligent use of interior space to help keep you organized. It offers numerous spaces to store your belongings, including a center console large enough to store a laptop, an oversized glove box, closed storage in the instrument panel, a compartment under the center armrest and valuable storage in the doors.
With both video and gaming capabilities, the available Rear-Seat Entertainment System offers hours of entertainment for rear passengers. It features twin seatback-mounted flip-up LCD screens that can pivot 205 degrees, allowing passengers of various heights to adjust them to their comfort. To further personalize rear entertainment options, each screen includes a video input jack to plug in various gaming systems or other electronic devices.

YOUR PERSONAL PLAYLIST
All terrain audio systems include USB connectivity, allowing you to access or recharge various electronic devices, wherever you are. You can activate your compatible MP3 player or iPod® to see your play-lists on the sound system display, and to operate either device using the audio system controls to hear your own mix of music.

XM SATELLITE RADIO
More entertainment. More information. More choices. XM delivers 170 channels of the best in music, news, sports, comedy, talk, XM NavTraffic and more, coast to coast. Also available with this three-month trial subscription is XM NavTraffic giving you construction, road closures and accident reports in real time to help you reach your destination on time. See page 25 for details.

DIRECTIONS ON-Demand
Terrain’s available touch-screen navigation system features advanced mapping capabilities and voice recognition for hands-free operation of both the navigation and audio system features. A portion of the hard drive (40GB) can be used to store music files for later playback. OnStar® Directions & Connections with Turn-by-Turn Navigation is also standard for the three months on all Terrain models. See page 25 for details.

BLUE TOOTH CONNECTIVITY
Thanks to available Bluetooth® connectivity, you can sync up your Bluetooth mobile device with Terrain for in-vehicle, hands-free calling. Steering-wheel-mounted controls allow you to start a call and control volume, then dial by voice and listen to your call through the audio system.

PIONEER® PREMIUM SOUND
Premium audio makes it possible to hear your favorite music as the artist intended. With the rear, or eight speakers placed strategically throughout the cabin, Terrain’s available 250-watt premium Pioneer system surrounds you with brilliant, distortion-free sound.

With both video and gaming capabilities, the available Rear-Seat Entertainment System offers hours of entertainment for rear passengers. It features twin seatback-mounted flip-up LCD screens that can pivot 205 degrees, allowing passengers of various heights to adjust them to their comfort. THERE’S POWER IN NUMBERS.

Terrain’s 182-horsepower direct-injected four-cylinder engine gives a spirited performance and features better highway fuel economy than any other SUV or crossover. Direct-injection technology and Variable Valve timing (VVT) help both the standard 2.4l I-4 engine and the available 3.0l V-6 engine burn cleaner and provide extra efficiency, making Terrain incredibly responsive and fuel conscious. You don’t have to wait for the payoff—it’s power you can feel the moment you accelerate.

The available 3.0l V-6 engine offers 264 horsepower and 222 lb-ft of torque. It clocks in a 0-to-60 mph time of 7.8 seconds and delivers an unexcelled 3500 pounds of trailering capability in its class.2

ADVANCED 6-SPEED AUTOMATIC TRANSMISSION

A 6-speed automatic transmission features a wide ratio spread with a very low first gear for brisk acceleration from a stop, and a very high sixth gear overdrive ratio that helps save fuel during highway cruising. thanks to engine Grade braking, the transmission also changes gear as conditions change, reduces brake wear and gives you more control on downhill slopes.

DIRECT-INJECTION TECHNOLOGY

Both engines in the Terrain feature direct-injection technology. Fuel is injected directly into the combustion chamber, right next to the spark plug for fast, efficient combustion. In addition, digital sensors allow each injection of fuel to precisely match power demand, resulting in cleaner burning and efficient operation. Instead of having to tune the engine for power or fuel economy, our engineers are able to do both.

ELECTRIC POWER STEERING

A rack-mounted Electric Power Steering system (EPSteer) automatically delivers extra steering effort when you need it, such as when parking or during tight maneuvers, and reduces steering effort when you don’t. EPSteer also helps maintain lane control and contributes to Terrain’s exceptional fuel economy. It’s standard on all Terrain models equipped with the 2.4l four-cylinder engine.

FUEL-SAVER MODE

The 2.4l I-4 comes with an “eco” mode to help save fuel. At the press of a button, the engine makes a slight sacrifice in acceleration in exchange for additional fuel economy on city driving.

It’s standard on all Terrain models equipped with the 2.4l four-cylinder engine.

1 Maximum trailer weight ratings are calculated assuming a base vehicle, except for any option(s) necessary to achieve the rating, plus driver. The weight of other optional equipment, passengers and cargo will reduce the maximum trailer weight your vehicle can tow. See your GMC dealer for additional details.

UNLIMITED RANGE OF MOTION.

Terrain has the strength and flexibility to manage changing conditions with confidence. When the road resists, it pushes back with suspension, braking and stability control systems designed to provide excellent on-road feel and handling characteristics.

A FEEL FOR THE ROAD

Terrain’s suspension system harmonizes a compact steel-type front suspension and an independent, five-link design with coil springs in the rear. The suspension is light and offers a crisp response to give you a feel for the road, without all of the harshness.

HILL HOLD

When you need extra traction, available AWD automatically adapts to changing road conditions for improved handling. The system sends the maximum amount of torque specific to each wheel when extra traction is needed, and adjusts as needed to help you maintain control. Thanks to direct-injection engine technology, Terrain features best-in-class AWD highway fuel economy and a best-in-class AWD highway cruising range.

REAR VIEW PERSPECTIVE

When you need extra traction, available AWD automatically adapts to changing road conditions for improved handling. The system sends the maximum amount of torque specific to each wheel when extra traction is needed, and adjusts as needed to help you maintain control. Thanks to direct-injection engine technology, Terrain features best-in-class AWD highway fuel economy and a best-in-class AWD highway cruising range.

Figure 6: Smart Brake Assist (SBA)
PRIORITIES IN THE RIGHT PLACE.

Terrain offers a comprehensive system of protection to give you help when you need it most. It's engineered to assist you before a crash, with advanced chassis control technology (see page 14 for details), during a crash, when every second counts, and thanks to onStar, after a crash, even if you can't ask for help yourself.

SAFETY AND SECURITY

FIGURE 7: SIX AIR BAGS WITH PASSENGER SENSING SYSTEM

To reduce the risk of injury, Terrain is equipped with ten air bags: two front dual-stage air bags and two side impact air bags for the driver and front seat passengers, and head curtain side-impact air bags with loader protection for passengers in all outboard seating positions. The front passenger air bag features a Passenger Sensing System. The system uses a sensor within the front passenger seat to detect the weight of an occupant. Under a certain weight, the system automatically turns off the air bag.

FIGURE 8: REINFORCED SAFETY CAGE

To help preserve occupant space during a crash, Terrain’s safety cage is engineered to absorb and channel crash energy. Crash zones at the front and rear of Terrain are designed to collapse in a controlled manner on impact, allowing them to absorb energy and keep the safety cage intact.

ONSTAR AUTOMATIC CRASH RESPONSE

With onStar, you can get the help you need, even if you can’t ask for it. In a crash, an onStar Advisor can find you, send your GPS location to emergency services and can stay on the line until help arrives. For more details, see page 25 or visit onstar.com.

FIGURE 9: ELECTRONIC CHILD SAFETY LOCKS

To prevent young children from opening the rear doors unexpectedly, all Terrain models include “doorknob” electronic safety door locks and a traditional switch. Simply pushing the electronic “lock” button in the center console locks the rear doors, blocking interior door handle function. The button is backlit in amber when the doors are locked, and turns to red when selected to help you determine when the locks are activated.

The locking mechanism will engage automatically if a rear passenger door is opened during the entry or exit of a child; the rear doors are locked when the vehicle is put into “Neutral” and turns red to confirm that all doors are locked. Do not override the electronic door locks. When the vehicle is turned off, the locks re-engage automatically.

To prevent young children from opening the rear doors unexpectedly, all Terrain models include “doorknob” electronic safety door locks and a traditional switch. Simply pushing the electronic “lock” button in the center console locks the rear doors, blocking interior door handle function. The button is backlit in amber when the doors are locked, and turns to red when selected to help you determine when the locks are activated.

Terrain’s rigid, body-integral structure with single-piece bodyside outer stamping allows for a precise assembly, with tight, uniform gap tolerances. Tight seams, window closures and watertight single help improve air flow over and around Terrain, reducing air turbulence and wind noise. The result is a vehicle with a solid feel and high level of quality that provides a remarkably quiet ride.

With the help of onStar, Terrain can automatically send you a monthly e-mail summary of hundreds of checks of your engine, transmission and antilock brakes, along with important maintenance tips. Services simple OnStar Vehicle Diagnostics, a powerfully simple way to know what your vehicle’s key operating systems need. A six-month trial subscription to OnStar Directions & Connections® is one of the benefits of Terrain ownership.

We stand by our commitment to exceptional quality and great capability in everything we do. Every GMC is fully backed by a 5-Year/100,000-mile Powertrain Limited Warranty2 plus courtesy transportation and roadside assistance, so you’re protected. If you sell your GMC, this coverage is fully transferable to the next owner, too. It’s not just a commitment to you. It’s a commitment to the value of your GMC.
