The wisdom of staying young and bold.

There is a way to announce that you enjoy life on your own terms without saying a single word. Introducing the 2013 Audi A7. Its captivating lines and striking silhouette tell a story of design unimpeded by convention. And the signature Audi Singleframe® grille and sloping roofline speaks volumes about its affection for timeless style.

But there's more to this narrative than just attractive sheet metal. Consider the extensive list of available advanced technologies—Audi MMI® touch, Google Earth™ imagery, and embedded Wi-Fi hotspot, to name just a few. And when it comes to performance, you can rest assured the 310-hp supercharged V6 engine and legendary Audi quattro® all-wheel drive will lay to rest any notion that this car prefers style over substance.

2013 Audi A7 Prestige shown in Dakota Gray metallic with available 20" Sport package and optional full LED headlight technology.

Distracted driving can cause a loss of vehicle control. The features and technologies discussed above are offered for convenience, and should be used only when it is safe and appropriate. The Wi-Fi hotspot feature is intended for passenger use only. Always pay careful attention to the road, and do not drive while distracted. Features may require an additional subscription plan. See dealer for details.

~ fig. 01

Full LED Headlight Technology

The Audi A7 offers full LED headlights. With an approximate lifespan of 10,000 hours, these lights are the closest re-creation of daylight yet. Bright and stylish, they offer signature brilliance from Audi.

Standard text and data usage rates apply.
Forget the quo, enjoy the status.

Some molds should never be broken—but that doesn’t mean new ones can’t be imagined.

This was the opportunity the A7 presented. Audi designers were given a blank canvas, and the typical constraints of design were relaxed. The result? A sculpted body that was shaped from the ground up instead of molded by conventional, top-down thinking. You see the difference in every curve of the A7. Each line, slope and angle represents a new approach to design, giving style a muscular profile—and muscle a sleek side. Think of driving one as art appreciation in its most dynamic form.

2013 Audi A7 Premium plus shown in Ice Silver metallic with available 20” Sport package.
Adaptive Rear Spoiler
Automatically deployed at speeds over 80 mph, the adaptive rear spoiler helps provide additional downforce to enhance the dynamic performance of the A7.

Always obey local speed and traffic laws.

A story is only as good as its characters. Some writers try to conceive one brilliant character and let the plot organically build and flow from there. We took a page from their book, so to speak, when designing the Audi A7. To create and define that brilliant character, we started with one great line. The Tornado line. Bisecting the body profile, it runs strongly through the middle of the vehicle to give it a bold, progressive stance that tells the world that there's pedigree here, but not a predictable one. After that, the narrative becomes yours.

2013 Audi A7 Prestige shown in Dakota Gray metallic with optional 20" 10-parallel-spoke design wheels.

See how the A7 model's Dynamic line defines the lighting surfaces while also bringing the vehicle closer to the road. Its Roof line creates a sporty coupe-like silhouette, while the Tornado line extends along the entire body to provide its visual muscle.
A wolf in wolf's clothing. There's no hiding this vehicle's ultimate purpose—as with all Audi Sport performance cars, the visceral reaction you get at first glance is more than validated when you get behind the wheel. The bold, muscular body and S-specific design cues of the Audi S7 are constant reminders that this is a performance car above all else. A 420-hp, 4.0-liter TFSI® V8 harnessed to the relentless grip of Audi quattro® all-wheel drive makes clear the intentions of the S7. One only has to peek at the interior, featuring signature sport seats with integrated head restraints and specialized design cues, to know that this is a luxury sports car that doesn't play dress-up. This isn't the model for sheep.

Top track speed of 155 mph, acceleration from 0 to 60 mph in 4.5 seconds

2013 Audi S7 shown in Glacier White metallic with available Driver Assistance package, and optional full LED headlight technology and 20" 5-parallel-spoke-star design wheels.

There's more information on the Audi Sport model line in the all-new 2013 Audi Sport brochure. See your dealer or go to audiusa.com for details.
Our designers held nothing back when it came to creating a unique space, even going so far as to replicate shapes throughout the vehicle, inside and out. Notice how the shape of the decorative inlay around the inside door handle echoes the window behind the rear passenger door. And the way the aluminum trim surrounding the windows closely mirrors the aluminum trim accenting the interior wood inlays. This kind of unique design pairing was done to enhance the connection between the interior and exterior.

Progressive design, in duplicate.
From here, the potential is plain to see. It’s time to put yourself in the driver’s seat. Feel how the wraparound curve of the Audi A7 dashboard invites your exploration. See how it integrates intuitively with the overall driver-centric layout. Discover how the highly acclaimed fit and finish is reflected in places like the extremely tight panel gaps. Then admire the finely crafted wood inlays and aluminum trim that wrap around inside the car on the door and the dash.

Decorative Inlays

Beautifully crafted wood or aluminum inlays add a warm and sophisticated touch to an already regal interior. And with numerous finishes available, you can be sure this space will be all yours.

2013 Audi A7 Prestige shown in Velvet Beige leather with optional Dark Brown Walnut Wood decorative inlays.
24.5

.07 – Power Rear Tailgate
Carefully integrated into the rear design, the power rear tailgate on the A7 gives you programmable endpoints so you can adjust the opening to the height you choose, better to accommodate personal preferences and tighter spaces.

.08 – Cargo Capacity
With 24.5 cu ft of cargo capacity, with the rear seats in place, you'd be forgiven for thinking the A7 might moonlight as a much larger vehicle. And with all that extra space, you can forget about deciding between bringing an extra golf bag or more clothes. Bring it all.

.06 – Heated Rear Seats
In here, no passenger is left out in the cold. When the mercury drops, your two rear passengers can take soothing comfort in the available heated rear seats.

.05 – Climate Control
Personal attention has been taken to new heights in the A7. With the available four-zone automatic climate control, every person in the vehicle has the ability to dial in their ideal temperature.

Stylized function in its revolutionary form. Why challenge conventions when you can make new ones? Our innovative design team rewrote the rules for interior appointments, and built style with purpose in mind. With luxurious materials, and available twelve-way power front seats and four-zone automatic climate control in the Audi A7, you literally create a unique cabin environment to fit your own unique style. This is true for the smallest details too, like an available heated steering wheel, or heated and ventilated front seats that help keep you comfortable so you can enjoy driving the A7 even more.

2013 Audi A7 Prestige shown in Velvet Beige leather with optional Dark Brown Walnut Wood decorative inlays.
When driving during cold, rainy, snowy or icy weather conditions, ensure that your vehicle is equipped with appropriate all-season or winter-weather tires. Even with appropriate tires, you must always drive in a manner appropriate for the weather, visibility and road conditions.

Confidence-inspiring

Under ideal conditions, power is 40:60 rear-wheel-biased to help maximize acceleration and cornering, but the instant conditions become more challenging, the ratio is optimized for superior grip and control.

It's a bond between your car and the road.

It's true that while Audi quattro® all-wheel drive may have been engineered to help drive through inclement weather and in low-traction situations, the real magic of this advanced system is how it performs in the dry. Power is distributed to all four wheels working in concert to help grip every corner while giving you the optimal amount of power delivery where and when it's needed. In other words, quattro® helps enhance performance by appropriately transferring power to the necessary wheels when accelerating and turning, so you have confidence-inspiring performance when the road isn't at its best. Inclement weather aside, the really gripping story about quattro® is how it performs overall, forging a sure bond between you, your Audi A7 and the road.

Torque vectoring

It's a handling feature that seems to respond to your impulses before your steering input. An evolution of cross-axle lock, this system works within quattro®, while utilizing ESC and ABS to help sense traction loss from the inside cornering tire.

Torque split

When accelerating out of a turn, up to 80% of the power is mechanically shifted to the rear wheels, where it's best allocated to propel the vehicle to your desired speed and onto the straightaway. Once traveling in a straight line again, the 40:60 power distribution that quattro® delivers to the front and rear wheels, respectively, gives you maximum torque to push onward.
While the engineering on the Audi A7 helps to elevate the driving profile and performance characteristics, it's not a totally refined sensibility we're after. We are a performance company as much as an engineering or luxury one. The result is intensity that uses technology to its benefit, without taking away from the visceral thrill of driving.

Audi quattro® all-wheel drive is more than visionary engineering—it's actually a response to the conditions around our Ingolstadt headquarters. With the weather and the terrain the way they are, all-wheel drive seemed like a smart solution for the problems presented. Since they design mountain roads with hairpin turns, it's only natural that we wanted to turn the tables on the road. Here's how it works:

It's time to throw the road a curve. It might feel like we read your mind.

Audi Drive Select

Our drive is responsive, but we also demand that you respond to the drive. With Audi drive select, you choose Comfort, Dynamic, Auto or Individual settings that configure the engine, transmission and steering to respond to your mood or the conditions, or just to experiment with drive settings that range from outstandingly comfortable to intensely sporty.

- **Comfort mode**
  Perfect for less-than-perfect roads, this setting adds optimized steering and a closer shift pattern to help provide a more relaxed drive.

- **Dynamic mode**
  More precise steering and a more responsive throttle give this setting an aggressive feel and focused performance.

- **Auto mode**
  The best of both worlds, dialed to automatically adjust settings for a seamless combination of comfort and responsiveness based on your driving style and road conditions.

- **Individual mode**
  Take the turn your way—this mode allows you to adjust the steering, throttle and transmission upshifts to your style.

Torque Vectoring

The center differential in the classic quattro® drivetrain does an excellent job of distributing power and torque between the axles, but to make your driving experience even more dynamic, Audi introduced an additional component: torque vectoring. This advanced system shifts torque distribution from side to side, to help provide even greater traction and confidence in every turn.

Asymmetric Torque Split

With an effective 40:60 rear-biased torque split, it's ideal for rear-wheel-type power. But where traction is strongest, the bias can change for optimized handling and performance.

40% 60%
310 hp / 325 lb-ft torque
10.3:1 compression ratio
5.4 seconds 0 – 60 mph
18 city / 28 hwy mpg

Audi TFSI adds forced induction to Audi FSI technology whereby fuel is directly injected into the combustion chambers at precisely managed times, providing more efficient combustion for better performance. Then, by adding forced induction, a broad torque curve is established across the entire RPM range for maximum output.

18 city/28 highway mpg (2013 A7 3.0T, with eight-speed Tiptronic® automatic transmission with Audi quattro® all-wheel drive). EPA estimates. Your mileage will vary.

Realize your kinetic potential faster. We’re not losing weight for looks, but because it makes us stronger and more agile. By lightening our static weight throughout our frame and our engine, we are able to harness more power more quickly—and, not incidentally, more efficiently. That means the Audi A7 has a supercharged 3.0-liter engine that delivers the potent acceleration of a traditional V8 with the efficiency of a V6. Improved mpg and an increased heart rate. Great reasons for slimming down.

Eight-speed Tiptronic®
This eight-speed Tiptronic® automatic transmission helps provide impressive fuel efficiency due to its shift versatility. And with the top two gears helping deliver more efficient highway cruising, it is a perfect companion for almost any road trip.

Start-Stop Engine Efficiency System
As an intelligent vehicle system, this available highly effective engine management program can lower fuel consumption as well as CO2 emissions by automatically shutting off your engine while you wait at a red light or perhaps during certain stop and go driving. Once you are ready to resume, or if other critical vehicle systems require it, the engine will restart nearly instantaneously.

With this kind of response, you might not care how efficient you’ve become. This is where German engineering finds a new gear. Not content with a heritage of performance, we’ve developed an even more responsive and efficient way of applying power. Our revolutionary eight-speed Tiptronic® automatic transmission with Dynamic Shift Program (DSP) helps to enhance performance while also allowing you to command upshifts or downshifts through the available steering wheel-mounted shift paddles. Basically, it’s the type of transmission one would expect from Audi.
Easy-to-view, accurate visual information right at eye level, this available feature displays important driving information and even pedestrian-detection warnings. With an infrared camera detecting what lies ahead, this available feature uses thermal-imaging technology to help you avoid trouble. Pedestrians can be detected over 300 feet in front of the vehicle, while objects can be detected over 900 feet ahead—all shown on the 7" color driver information system.

Giving you a nearly 360-degree view around the vehicle, the available corner view cameras help make parking significantly easier thanks to combined camera images from the front, rear and sides of the vehicle.

1
Audi Side Assist

The available Audi side assist uses radar sensors and two different optical warnings to help keep the driver informed of what is approaching from hard-to-see angles behind and to the side of the vehicle.

1
Audi Adaptive Cruise Control with Stop & Go

Not only retains a preset distance from vehicles ahead, but resumes acceleration when you’re ready. Using long-range radar and a camera, the available Audi adaptive cruise control with stop & go helps read the traffic conditions and adjusts the speed, helping to bring the vehicle to a full stop before accelerating when traffic flow resumes.

1
Head-up Display

1
Night Vision Assistant

1
Corner View Cameras

1
Audi Active Lane Assist

Operating at speeds above 38 mph, this available system helps detect when the vehicle begins to leave the lane without signaling. Then, through gentle, corrective steering efforts, it helps the vehicle remain in the lane and vibrates the steering wheel as an additional warning. This way, Audi active lane assist complements the driver’s decision-making process to further solidify the bond between driver and machine.

1
Audi A8 shown.

The suite of available driver-assistance technologies takes into account the actions of other drivers—while helping make your drive a little easier. From seemingly sentient Audi adaptive cruise control with stop & go to Audi active lane assist, the Audi A7 has incorporated innovative, anticipatory technologies that don’t see your future so much as help change it.

1
Audi Pre Sense Plus

The available Audi pre sense plus offers comprehensive driving assistance with sensors in the front, side and rear. After visual, physical and aural collision warnings, there are four distinct phases for automatic preparation for the unavoidable: an upsurge of brake pressure, safety belt pre-tensioning, partial braking, and sunroof and window preparation. In severe cases, Audi pre sense plus will engage full braking and deceleration.
Safety does better with a little structure.

The Audi A7 might not be the car for you if you don't want peace of mind. Innovative safety features lead the way in Audi progressive thinking, so you can concentrate on better things, like the great performance of your A7. With up to ten airbags helping to protect nearly every inch of the cabin, an adaptive restraint system protecting its occupants, and advanced safety technologies that help you maintain control, Audi thinks of safety in a comprehensive way. Surrounding you with it. So you know you're not alone out there.

- Driver’s head airbag
- Driver’s knee airbag
- Driver seat-mounted thorax side airbag
- Driver-side Sideguard® head curtain airbag for both rows of seats
- Driver-side rear seat-mounted thorax side airbag
- Front-passenger head airbag
- Front-passenger knee airbag
- Front-passenger seat-mounted thorax side airbag
- Passenger-side Sideguard® head curtain airbag for both rows of seats
- Passenger-side rear seat-mounted thorax side airbag

ESC and ABS

Computerized technology that works in perfect sync with the Anti-lock Brake System (ABS), Electronic Stability Control (ESC) helps minimize any loss of stability, applying brake pressure to individual wheels and reducing throttle input to help counter oversteer or understeer when the vehicle needs it.

Passive Safety

Referring to all dedicated measures that help protect the car's occupants against injury, the passive safety measures in the A7 include its safety belt system, ten airbags, the rigid occupant cell and crumple zones at the front and rear of the vehicle.

Ten Airbags

A full complement of ten airbags are available in the A7 to offer additional protection in the event of a collision. Front-impact airbags for both driver and front passenger are designed to specifically target and protect the head during collisions, for added protection.

Tailor-made Blanks

Developed to make the best possible use of the body's potential, tailor-made blanks use a special manufacturing process that can help strengthen the upper zone of the B-pillars while the lower zone is designed to help mitigate the impact in the event of a side collision.

Airbags are supplemental restraints only and will not deploy under all crash circumstances. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age.

Dramatization

This is a dramatization and does not depict what will happen in a collision. All bags will not inflate in real-world collisions, and, if multiple bags do deploy, they will be in various stages of inflating/deflating and will never all be inflated at the same time.
SiriusXM Satellite Radio

Go ahead. Crisscross the country. We assure you, you'll never run out of entertainment options, with over 130 channels of music, talk and news.

Audi Audio

The media button opens up a world of options, allowing you to control the Audi music interface, Secure Digital (SD) card slots, hard disk drive (HDD) audio jukebox or DVD player.

Audi MMI Navigation plus

Count on the available advanced navigation system to home in on your destination with stunning precision while putting a little more depth in your journey with help from Google Earth™.

BLUETOOTH® Technology

Unlock your mobile phone's potential through the MMI system. Simply pair them up and start enjoying near complete control at the touch of a button.

Audi MMI® Touch

Developed by the Audi Human Machine Interface (HMI) team, Audi MMI touch illustrates why making something simple to use can be so complex. The HMI team designed a system so advanced, it can read almost anyone's handwriting—even if you choose to write with your non-dominant hand.

Input as unique as your fingerprint. What does your handwriting say about you? We aren't really sure. We just know it speaks to us.

A revolution in intelligent simplicity, the available Audi MMI® touch with handwriting recognition is a technology that gives you the ability to give commands and retrieve media simply by recognizing a few strokes of your finger. Access information such as music files, contact information, and destinations through the Audi MMI touch—or give input to the optional Audi connect™, an innovative media system with Google Earth™ mapping service. The world isn't simply at your fingertips—your fingertips open up a new way to interact with the world.

Distracted driving can cause a loss of vehicle control. The features and technologies discussed above are offered for convenience, and should be used only when it is safe and appropriate. The Wi-Fi hotspot feature is intended for passenger use only. Always pay careful attention to the road, and do not drive while distracted. Features may require an additional subscription plan. See dealer for details.

See Infotainment/Technology section of the Featured Content page for important information regarding Audi Navigation plus and required SiriusXM subscriptions.

Requires compatible phone.
We set out to change how people interact in and out of their automobiles. A suite of available technologies has made the Audi A7 a true champion of progress. And with Audi connect™ with Google Earth™ imagery and Wi-Fi connectivity for up to eight passenger devices, you have multiple ways to stay connected.

You can also access information and navigate entirely with your voice in just a few commands. With that kind of access, Audi helps build on your interactive life while helping enhance your ownership experience.

Distracted driving can cause a loss of vehicle control. The features and technologies discussed above are offered for convenience, and should be used only when it is safe and appropriate. The Wi-Fi hotspot feature is intended for passenger use only. Always pay careful attention to the road, and do not drive while distracted. Features may require additional subscription plan. With Google Earth™ integration, you’ll enjoy 3D topography, including Google Maps Street View, displayed right on the Audi MMI® screen. Plan your destination from your personal computer and send your route to your A7, for a preprogrammed trip plan. Working with your Google Earth™ overlay, you can get traffic conditions and plan alternate routes to help get around traffic backups.

Current local conditions and forecasts for your destination can help you prepare for your trip. Find the lowest reported local price for fuel—and the directions to the station—right through the MMI system. Stay on top of the news by having headlines and stories delivered right to your MMI display. Search for destinations via text or voice, using the cloud processing power of Google™ speech recognition and their point-of-interest database.

Provides high-speed connectivity for up to eight passenger devices through an onboard wireless hub. To see video and get more information, scan this QR code on your smart phone. Standard text and data usage rates apply.
This revolutionary acoustic technology from Bang & Olufsen® helps ensure a powerful sound base without taking up the amount of space or emitting the level of heat that conventional amplifiers do. No wonder Bang & Olufsen® and Audi complement each other so well.

Bang & Olufsen® Advanced Sound System

The passion of Bang & Olufsen® matches well with Audi. By focusing on design and performance together, we bring out the best in outstanding acoustics. Bang & Olufsen® engineers help to sculpt meticulously rendered sound through two innovative retractable aluminum acoustic lenses and an impressive 1,300 watts of pure power.

5.1 surround sound

Striking a deep note for a shared passion.

For years, while other sound-system engineers were obsessed with what they thought you should be hearing, Audi sound engineers thought about how we impact what people are feeling when they are enjoying music. We found a partner who shared our passion—Bang & Olufsen®—who has helped us conceive a new way of experiencing sounds in your Audi A7. We use speaker positioning, speaker design and precise sound calibration to work in concert with the ambient noise in your car. The results are crisper, more resonant—you might even say, more emotional. Because, if you are only listening, you're not really feeling it.

Bang & Olufsen® Advanced Sound System is optional on A7 Prestige models.

To see video and get more information, scan this QR code on your smart phone. Standard text and data usage rates apply.
Get a good look.

It'll be gone before you know it.

You better take it all in while you can, because from this angle the A7 won't be around for long. Its gorgeous, swooping lines culminate in a spectacular finish. Highlighted by the unmistakable look of its LED taillight technology, the last thing you'll see will surely leave a powerful impression. If you can catch a glimpse of it before it's gone, that is.

2013 Audi A7 Prestige shown in Dakota Gray metallic with optional 20" 10-parallel-spoke design wheels.

LED Taillight Technology

Sleek and stylish, these rear light-emitting diodes are brighter and longer-lasting than conventional bulbs and illuminate faster than traditional brake lights, which can help give the driver behind you more time to respond.

Wheels

Tires are supplied and warranted by their manufacturer. High-performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy, or icy weather conditions. If you drive under those circumstances, you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tire specified for your car or its equivalent. These high-performance tires also have a lower aspect ratio that aids performance and handling; however, in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at optimum levels. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices.
1. Top track speed is electronically limited in the U.S. Obey all speed and traffic laws.

2. EPA estimates. Your mileage will vary.

An even bolder way to make an entrance.

If the A7 makes a statement, the Audi A7 Prestige with S line® exterior appearance package is an outright declaration. First off, unique front and rear bumpers give the vehicle a wider, sportier appearance. With the addition of a Platinum Gray rear diffuser, this effect becomes even more pronounced. And with flared side sills adding a muscular, lowered look, the impression all those staring people will be left with will be a lasting one.

SiriusXM U.S. Satellite Service available only to those 18 and older in the 48 contiguous U.S.A., D.C. and Puerto Rico (with coverage limitations).

2. Some Audi models are equipped with a keyless ignition feature. The details as to how the system works can vary, and Audi owners should consult their owner’s literature or an authorized Audi dealer if they have further questions about the operation of this feature. Please note that Audi warns against leaving the vehicle unattended with the engine running, particularly in enclosed spaces.

2013 Audi A7 Prestige shown in Ice Silver metallic.
Recreational accessories designed for your life—the passionate, active part. We engineered to stringent Audi standards, so you can be assured of their quality and durability.
