MiTo, a powerhouse of constantly evolving content. Design, technology, safety and performance from a veritable “energy machine”.

[Image of a red car with the Alfa Romeo logo]
CONCENTRATE OF ALFA ROMEO
Tyres with 16", 17" or 18" rims featuring wide tread for true sports handling.

Rear lights with LED technology, a design detail that responds to the need for high visibility and enhanced safety.

A car which combines a sporty coupé line with the comfort of a compact saloon: a streamlined muscular exterior silhouette with frameless doors, while inside there are 4 comfortable seats.

**STYLE**

Length 4.06 m - Width 1.72 m - Height 1.44 m

These are the vital statistics of a sports car on which even the styling details are designed for optimum performance.

These are the vital statistics of a sports car on which even the styling details are designed for optimum performance.

These are the vital statistics of a sports car on which even the styling details are designed for optimum performance.

These are the vital statistics of a sports car on which even the styling details are designed for optimum performance.
The driver can call on a racing instrument panel. Only the finest materials have been selected for total comfort, with interiors in leather and fabric that exude an unmistakable 'made in Italy' quality.
At the heart of the MiTo are engines that combine spirit with high-efficiency, low running costs. There are 3 petrol engines to choose from: 875cc Turbo TwinAir 105 bhp Euro 6 engine, 1.4 Turbo MultiAir 135 bhp (also available with ALFA TCT semi-automatic transmission) and for those looking for unadulterated racing spirit the 1.4 Turbo MultiAir 170 bhp.

You also have the choice of 2 diesel engines: 1.3 JTD 85 bhp and 1.6 JTD 120 bhp.

To keep fuel consumption and emissions low, the MiTo has another device on board: Start&Stop: this device, which automatically stops and starts the car when at a standstill in traffic, is constantly active, but can also be deactivated by the driver.

Gear Shift Indicator - GSI: this system suggests when to change to the gear best suited to optimise power unit efficiency and reduce fuel consumption by turning on a light on the control panel.

Fuel consumption figures are obtained for comparative purposes in accordance with EC directives/regulations and may not be representative of real life driving conditions. Factors such as driving style, weather and road conditions may also have a significant effect on fuel consumption.
PERFORMANCE

TURBO TWINAIR

The Turbo TwinAir combines MultiAir technology with an innovative two cylinder layout to achieve maximum fuel efficiency, power, outstanding flexibility and response when needed.

This technology marks a new era for petrol engines, continually varying the intake of air into the engine directly as it enters the cylinders, based on the actual engine requirements.

From 10% to 35% more maximum power and up to 15% more torque at low speeds.

Pick-up improved by up to 12% and up to 10% lower fuel consumption and emissions.

ALFA MULTİAIR

Lift the bonnet and the MiTo reveals the second generation of MultiJet diesel engines, a development of the Common Rail system, a Fiat Powertrain Invention.

Combustion is optimised to obtain excellent results in terms of consumption, emissions, noise and handling.

Extreme reliability borne out by service intervals of 21,000 miles.

Choose your ideal engine: you can count on Alfa Romeo’s great engineering tradition.
Derived from racing experience, Alfa D.N.A. is the exclusive Alfa Romeo driving selector which, by acting on engine, brakes, steering, gearbox, suspension and accelerator, perfectly adapts the vehicle’s performance to suit the driver’s style and the road conditions. It offers simple, intuitive use: just shift the selector near the gear lever.

In the Dynamic driving mode the electronic traction control systems are less intrusive, the engine and brakes are more reactive and quicker to respond and the steering is more direct and sporty. Shift the selector to the Natural urban driving mode and the calibration is more neutral, with optimised consumption. When poor grip conditions make the road more demanding, all you have to do is activate the All Weather setting, designed to anticipate the intervention of all of the electronic safety devices.

Get behind the wheel and enjoy the true Alfa Romeo spirit: that unique connection between you, your MiTo and the road, which makes you inseparable. An experience you can savour first-hand with technology like Alfa D.N.A. and the ALFA TCT gearbox.

ALFA TCT

ALFA TCT is the innovative twin dry clutch transmission, consisting of two gearboxes in parallel that allow the next gear to engage while the previous one is still engaged. The ALFA TCT guarantees driving comfort and a sporty feel that far surpass those offered by traditional automatic transmissions, coupled with improved efficiency and lower fuel consumption.

Driving pleasure.

Fast gearshifting in both automatic and sequential mode, available with optional steering wheel paddles for a true sports driving experience.

Comfort.

Drive is progressive and continuous at all times, without the typical loss of torque associated with traditional automatic or manual gearboxes.

Efficiency.

Consumption and emissions are lower compared to the same fuel supply with manual gearbox.
SAFETY

DYNAMISM

ALFA ACTIVE SUSPENSION

ALFA ADAPTIVE SUSPENSION

SAFETY

For passive safety in the adult Euro NCAP ranking, MiTo is all set to project driver and passengers in any situation.

ALFA ELECTRONIC Q2

Reproduces the action of a self-locking differential.

ABS

Anti-lock Braking System.

EBD

Electronic Brake force Distributor between the front and rear wheels.

VDC

Electronic Vehicle Dynamic Control for better car stability.

ASR

Anti-Slip Regulation system provides traction control by adjusting the brakes and Engine Control Unit (ECU).

HBA

Hydraulic Brake Assistance for emergency braking.

Hill Holder

System to aid hill starts.

MSR

(Motor Slip Regulation) controls engine braking when the accelerator pedal is released.

CBC

(Corner Brake Control) System optimising braking performance on bends.

ALFA ACTIVE STEERING

Integrates electric steering in the VDC functions: a light impulse on the steering wheel prompts the driver to correct oversteer.

PASSIVE SAFETY

7 AIRBAGS as standard.

SEAT BELT REMINDER technology (SBR): 5 warning lights on a small screen allow the driver to make sure all seat belts are fastened.

ANTI-WHIPLASH DEVICES on seats.

COLLAPSIBLE steering wheel.

STEERING COLUMN designed to absorb impact energy in a controlled manner.

STEERING-LOCK accommodated out of the way of the driver's knees.

LED rear lights to improve the visibility of the car.

ALFA ACTIVE SUSPENSION

Standard on high-performance engines, 1.4 TB MultiAir 135 bhp petrol and 1.6 JTD M-2 120 bhp diesel.

It adopts variable-response shock absorbers. Thanks to the by-pass valve, they improve comfort in response to stresses, maintaining the vehicle's excellent dynamic control.

ALFA ADAPTIVE SUSPENSION

This electronic shock absorber control system actively and continuously varies the chassis response according to road conditions and the driver's needs. It interfaces with Alfa D.N.A. and the other on-board electronic devices to deliver the performance required for optimal road holding.

DYNAMISM

Agility, precision driving and comfort.

Thanks to MacPherson front suspension and rear torsion beam suspension, MiTo is all set to provide a fast and precise driving experience.

Two solutions with rigid-and-elastic performance which, with semi-independent wheels, guarantee boundedness and maximum agility.

SAFETY

MiTo is all set to protect driver and passengers in any situation. With 5 stars and 36 points in the compact category's MiTo is best in class.
You want to connect to your music and have everything under control. That's why MiTo offers you Uconnect™, the built-in system that combines a top-quality sound system with a raft of multimedia services and functions. And you can operate it with the touch of a finger or simply your voice, thanks to a 5" colour touchscreen and voice recognition.

**TECHNOLOGY**

**Uconnect™ 5" Radio**

You can use the touchscreen to access all audio functions directly: AM/FM radio, CD player, media player devices can be connected via USB port or Aux-in socket. Commands can also be voice-activated. The Bluetooth® interface lets you read any text messages received (through the text to speech system) and use the steering wheels controls to handle telephone calls*. With the Audio Streaming system you can play music files or web radio straight from your smartphone without wires*. Also available with DAB Digital Audio Broadcast.

Built-in navigation developed in collaboration with TomTom® for simpler, more intuitive navigation, even easier thanks to the touchscreen and voice recognition. It is pre-loaded with maps of major European countries, which can be updated via USB. It uses traffic message channel (TMC) information for real-time updates on slow-moving traffic and delays. The “Advanced Lane Guidance” system helps you to breeze through even the most complex junctions. It provides warning of fixed speed cameras, the position of average speed cameras and fixed cameras. Thanks to the IQ Routes® system, it calculates the best route on the basis of real, measured average speeds.
