It’s Audi because we’re driven by human achievement.

More than just cars, more than just performance. Audi is about the nature of perception, determining how people will respond to and interact with innovative design. It’s about applied physics, how things glide through the air and overcome inertia through the application of power, acceleration and exhilaration. It’s about artistry, and the way materials elicit a tactile response and provoke an emotional response. It’s chemistry and how it bonds with you. It’s poetry written in metal, engineering and design. Audi is the product of learning and application of knowledge. At its best, it is a dynamic example of what humans can create when they are vested in creating something better and bolder. So Audi is not just about cars. But then again, of course, it’s also about cars.

1 Obey all speed and traffic laws.
Excessive luxury is not our goal. But we feel that luxury doesn’t mean “more,” it means “proper.” Proper design, proper fit, proper precision—what Audi thinks of as design purity. Our engineers and designers know that a baroque clock won’t tell time any better than a streamlined one, and all the distractions that surround it actually detract from the purpose of the clock itself. Unless, of course, the purpose is just to be noticed, instead of used to its greatest potential. We think the real purpose of design is simplicity, elegantly rendered. We think you’ll see and feel that concept throughout our Audi models. In the clean design lines of the exterior, the streamlined dash, and Audi MMI® interface. In our intuitive available Audi connect®—the seamless fit and finish of our materials and the unmistakable look of our Audi Singleframe® grille. They all work in concert for a pure aesthetic of timeless taste and precision.

1. Always pay careful attention to the road, and do not drive while distracted. The features and technologies discussed above are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi® hotspot feature is intended for passenger use only.

2. Features and technologies listed will not be available on all models.
It’s said that when one door closes, another one opens. It sounds as if whoever said it spent some time at an Audi re-
search and development facility. After all, while you’ll open
and close the door on your Audi thousands of times without
thinking about it, we’ve obsessed about it for you, in detail.
Not just about the reliability of it opening and closing,
obviously, but on the proper weight that will make it more
pleasing to close. What it should sound like when it is shut.
How the locks should click when they are engaged. The opti-
mal acoustic placement for the speaker port. There are the
hinges too, of course. And the door itself, which is designed
to take the brunt of side-collision impacts, along with sev-
eral dozen other considerations that we take into account
when designing our doors (to say nothing of the countless
other components, processors, sensors, features and the
inner workings most people will never see). Our doors are
more than a symbol of welcoming you into your vehicle, they
are products of Audi engineering, and our reputation hinges
on them as much as our hinges help support the door.

It’s Audi because
our reputation hinges on the quality of things you don’t see.

Asymmetric torque split

Sport differential

Torque vectoring

You’ll find traction in your corner. Torque vectoring is a handling feature so advanced that it seems to respond to your impulses even before you turn the steering wheel. An evolution of cross-axis lock, this system works with the Audi quattro® all-wheel drive system while utilizing Electronic Stability Control (ESC) and the Anti-lock Braking System (ABS) to help sense reduced load or wheel-spin on the inside cornering tire, helping to make turns smoother and more responsive.

As you can see, we’ve always felt that the best ideas are the ones that stick. And nowhere is that more true than with Audi quattro® all-wheel drive. Since 1980, we’ve been stuck on articulating an expanding vision of what progressive all-wheel drive technology can deliver. We didn’t simply look at it as something to use in poor conditions, but rather as a performance technology that’s built to handle roads from the Alps to the autobahn—and points beyond. You’ve seen quattro® capabilities in the way we dominated the World Rally Championship for years, in the grip you have in inclement weather, and in the variable near-wheel-biased power you enjoy in good conditions. For more than 30 years and with five million quattro® systems installed in Audi vehicles, we have continued to refine the technology, developing a rear sport differential to help maximize performance, and torque vectoring to assist with cornering traction while helping to improve handling. We boldly stuck to what worked while the world was trying to catch up, and we built on our vision by adding to a gripping heritage of Audi Sport® performance.

It’s Audi because conditions don’t have to dictate how you stick it to the road.
It’s perfectly fine for us to admit that other engines have more cylinders, have more horsepower and have larger displacements. It’s just that we’ve made our engines lighter and more efficient than others, to optimize what we call power density.1 Because anyone who has driven an Audi knows unmistakable power when they feel it. It means strength that pulses with torque at the moment of acceleration, provides a true, quick response as you change lanes, and turns the most routine cloverleaf into a joyful application of performance handling. Sure, we love hitting the throttle and feeling the thrust of acceleration,2 but we also want our drivers to experience the balance and precision of Audi engineering. From the A3 to our track-bred line of Audi performance cars, we are in the business of engineering emotion using more compact engines that concentrate power, while using less weight to your advantage, helping improve handling to the point where others just feel heavy.

**TDI®**
A turbocharged, fuel-sipping variant, our TDI® clean diesel engine delivers uncompromising Audi performance with bold efficiency.1 Yes, it gets better mileage per gallon than comparable gasoline engines, but it also produces more low-end torque, which is best expressed in the elasticity you have when passing in the 30- to 60-mph range.

**FSI®**
The Audi FSI direct injection fuel management and delivery system directly injects fuel into the combustion chambers at precisely managed times and depths. What that means for drivers is that a fully homogenized intake charge helps increase power while also reducing fuel consumption and emissions, making efficiency more powerful.1

**TFSI®**
At Audi, TFSI represents a combination of two of the brand’s core areas of expertise—direct injection and forced induction. By adding forced induction (turbocharging or supercharging) to Audi FSI direct injection, the pressurized intake charge is cooled by directly injected fuel, thus achieving efficiency and performance combined with higher compression ratios—previously only attainable by naturally aspirated engines.1

---

2. Obey all speed and traffic laws.

It’s Audi because power is measured by strength, not size.

Ants can carry up to 50 times their body weight. That got us thinking about lightweight structures, smart engineering and true performance.
It's Audi because

spicy chicken is your destiny.

If you are craving an Audi, we know your tastes run a little bold. But what happens when you crave spicy chicken, or a nice vindaloo, or some pepper salsa? Well, in your Audi, you can just say the word, and we'll help find the heat. With available Audi connect® , we've developed a way to seek out your destiny, even if that's just finding the closest gas station, or the best hotel. Audi connect integrates Google™ technologies, like Google Earth™ with 3D satellite imagery, with Audi MMI® Navigation plus. It also provides Wi-Fi connectivity for up to eight passenger devices to help you stay informed. Check local fuel prices, weather information and, yes, the closest Szechuan restaurant using Google™ Local Search capabilities. Think of where that might take you.²³

² Always pay careful attention to the road, and do not drive while distracted. The features and technologies discussed above are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi® hotspot feature is intended for passenger use only.

³ Audi MMI® Navigation plus depends on signals from the worldwide Global Positioning Satellite network. The vehicle’s electrical system and existing wireless and satellite technologies must be available and operating properly for the system to function. The system is designed to provide you with suggested routes in locating addresses, destinations and other points of interest. Changes in street names, construction zones, traffic flow, points of interest and other road system changes are beyond the control of Audi of America, Inc. Complete detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible, therefore you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgment in determining whether or not to follow a suggested Audi MMI® Navigation plus route. Periodically mapping updates will be available for purchase at an additional cost. Consult your dealer or call 1-800-FOR-AUDI for details.

²³ Optional features. Features and technologies based on available data.
It seems strange to say that, while we build strong, complex and high-performing machines, we’re naturalists at heart. Then again, it might not be that unusual, seeing how nature itself builds strong, complex and high-performing machines as well. When we developed the thinking behind our Audi ultra® lightweight technology initiative, we knew that nature would serve as inspiration to greater structural efficiency. Take the structure of the elephant skull pictured here. It has to be lightweight, yet capable of carrying a heavy load. It’s porous, but its structure is such that it enhances its stability and strength. We do the same, for example, with aluminum. Positioned one way, aluminum materials can be flexible. Positioned another, they are strong and rigid, and give better support. We also looked to bamboo, which is strong at the conjoined areas (nodes), and flexible along its stem. Our designs allow for both rigidity and flexibility where each is most needed, and for efficiency overall.

As we continue to develop strategies to improve the performance aspects and efficiency of our vehicles, we don’t shy away from the world around us. We boldly engage it even closer still.

It’s Audi because the elegant structure of nature becomes a blueprint of efficiency.

...
It’s Audi because you I.D. our eye queue.

Even if you knew nothing about Audi, you’d still know if you were staring at one because we are unafraid to stare back. In fact, that exchange might just be love at first sight. That’s how much our iconic LED lighting technology stands out from the pack. So we had the bright idea to make our LED daytime running lights look even more intense. Now featuring a solid, sleek diode design that ingeniously reinvents our signature style, Audi LED lighting technology is once again unmistakably ours. It is an efficient, beautiful way to help you see and be seen during dawn and dusk. Look deeply into our eyes, and you’ll know the truth of our attraction.

Features listed are available on all models.
Get away from it all, every day, around 6 p.m., when you leave work and enter into a customized world that’s completely dedicated to your comfort and entertainment. This place, of course, is the cabin of your Audi. Optimized luxury, designed by committed craftsmen who have you in mind when they choose the leather seating surfaces, create the adjustable seats or provide the refinement of ergonomic design and a more intuitive MMI. There are small touches that help simplify the overall design, like a stylish contoured electromechanical parking brake at the foot of the center stack and an available Bang & Olufsen® retracting acoustic lens, perfectly positioned for richly detailed sound quality. And there are large statements, like a steering wheel with easily accessed controls to help you feel comfortably at ease. It is your Audi interior, where you leave the world behind, even when the world might seem in front of you on the way home.

It’s Audi because optimized design makes your commute shine a little brighter.

1. Steering wheel. The Audi steering wheel is both an ergonomic command center and an elegant structure of performance. Easily accessed controls on the wheel give you control over your MMI® and Audi connect®, which is designed to give you effortless access to visual information on the driver information display.2
2. Audi connect and MMI® Simple voice or finger motions can help you access information, music and Bluetooth® enabled features.1
3. Electromechanical parking brake Properly positioned in the center console, the parking brake control is another small, but telling, design cue for Audi. The parking brake control serves to enhance the overall ergonomic intent of the vehicle, while delivering easy access and simple functionality.3
4. Bang & Olufsen® Advanced Sound System With retractable acoustic lenses and speakers positioned around the Audi specifically to optimize sound quality, Bang & Olufsen® engineers have worked tirelessly with Audi sound designers to create an immersive audio experience.4

1. Optional features. Features and technologies listed are not available on all models. 2. Always pay careful attention to the road, and do not drive while distracted. The features and technologies discussed above are optional, may require additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Audi connect and MMI features described may vary. 3. Steady state braking.

It’s Audi because optimized design makes your commute shine a little brighter.

With innovative pigments and dyes, the Thermocool technology Audi uses in select leather seating surfaces just might prevent that startling moment on hot sunny days. You know the one, when you sit down and feel, immediately, an intense, searing feeling on your leg. Now you can keep your cool. This supple leather doesn’t heat up as much in direct sunlight as traditional leather does. In fact, the difference between untreated leather and the temperature on your seat treated with Thermocool can be as much as 86°F. A perfect solution for your Audi A5 Cabriolet, TT Roadster or R8 Spyder, Thermocool technology is Audi to its core. Because it keeps its cool, you can keep yours.

Reduce as much as 86°F
It reflects well on you.

We’re certain we’ve aroused a certain curiosity inside you about Audi as an automobile manufacturer, and now we’d like to invite you to take a deeper dive into the Audi A4, a vehicle that sums up the very essence of what Audi is and where we’ve come from. Enjoy the ride in the Audi A4.

The story of our collection of obsessions:

Precision. Design. Vision. These are the kind of attributes that we deliver as a company, the kind of passions that go way past getting you from point A to point B. Audi knows that how you get to your destination is only part of the story. And so it is with us as a luxury brand. Our obsessions are our commitments, a collection of inspirations that make up our core truth: That from a foundation of brilliant engineering, we craft more than great vehicles—we tell great stories.
There’s no alternative to standing out.

In a segment overpopulated with the next best entry-level sedan, Audi chooses not to participate. For Audi, there are no entry-level vehicles. Our commitment to design ensures that the Audi A4 effortlessly stands apart. Perfectly proportioned lines stretch across the profile of the vehicle, helping solidify a design language that validates the progressive thinking we’ve been recognized for throughout the automotive world. A number of available trim levels perpetuate our design story, inside and out, making clear our commitment to the philosophy of building beautifully engineered vehicles. So while we may be limited to participate in a specific segment, we don’t feel that we have to play along.
While the others end with luxury, we’ve just started.

More than a beautifully designed luxury automobile, the Audi A4 is a sedan capable of outperforming your expectations and delighting your senses. Available LED daytime running light technology introduces you to a pair of exemplary lines that streak across the vehicle. The Tornado line is delicately balanced with the roofline, giving the A4 its elegant, and distinctive, presence. Both front and rear bumpers add to the balance of the A4, further complementing a design language that is exceptionally ours. The only things our design lacks are the fluff and the bling and the illusions automotive manufacturers use to disguise conventional design. These are vehicles for lovers of art and design, enthusiasts of performance and power, and aficionados of technology and innovation. In the end, we sought out to build a vehicle meant to inspire you on an impassioned level.
Audi decided long ago that “smart” is just above “aggressive” when it comes to engineering and design. Smart is seen in the available LED daytime running light technology and the Audi Single-frame® grille, which changed the way you look at an Audi as much as the engineers changed the way Audi looks to you. Smart took another step when they sought to change the way you feel when driving an Audi A4. We set our sights on reaching maximum efficiency without compromising performance, which might seem aggressive, but was the intelligent thing to do! That’s why we could engineer a lightweight 2.0-liter turbocharged engine producing 220 horsepower that is reigned in by your choice of a manual, Audi multitronic® or eight-speed Tiptronic® transmission, while available sport suspension calibration helps optimize load distribution, giving the car an even more dynamic feel. And with available Audi quattro® all-wheel drive, you'll drive smart in inclement weather, yet enjoy thrilling performance in the dry as well. We think it’s a smartly aggressive approach to creating an invigorating automotive experience.
At Audi, progress isn’t just a word we use to sound, well, progressive. It’s a philosophy we adopted because everyone else was playing the same old games. The Audi A4 was designed with the driver in mind, but not just for driving. Beautifully appointed interiors, leathers, decorative inlays and a keen sense of composition reveal an eye for design that other car makers are just starting to embrace. An available three-spoke multifunctional sport steering wheel with shift paddles puts a variety of functionality at your fingertips. When you climb into the cockpit of the A4, you’ll climb into a space that will erase the outside world and inspire your next big adventure.

Decorative inlays
With your choice of available inlays in beautiful wood or aluminum, you will find unparalleled craftsmanship and attention to design throughout the interior. We use only the finest materials inside the cabin to accentuate luxury and sport.
We’ve ensured that every stitch represents the detail that we put into every aspect of an Audi.

Skin deep just isn’t deep enough.

There is a lot more to the beauty of our interior designs than just the materials we put in them—there’s the collaborative thinking that our designers and engineers bring to the vehicle. There’s the intent and craftsmanship behind each stitch and decorative inlay that give every Audi interior its unmistakable feel. It’s a deliberate choice, ensuring that only the finest woods and aluminum accents beautify the inside of your Audi. And whether it’s the natural placement of the gear selector, or the crisp click every dial and button makes so that you’re certain you’ve selected the right option, it all comes back to one simple idea: that true beauty goes far deeper than the surfaces you see.
When driving during cold, rainy, snowy or icy weather conditions, ensure that your vehicle is equipped with appropriate all-season or winter tires. Even with appropriate tires, you must always drive in a manner appropriate for the weather, visibility and road conditions.

Obey all speed and traffic laws.

Conventional wisdom may suggest that an all-wheel drive system is there purely to provide confidence in inclement weather, but the available Audi quattro® all-wheel drive is much more than just a foul-weather friend. It’s performance engineering that takes on a dry, twisty mountain road as beautifully as it tracks through powder.1 In other words, quattro® helps enhance performance by appropriately transferring power to the necessary wheels when accelerating and turning, so you have confidence-inspiring performance for almost any road condition. Inclement weather aside, the really gripping story about quattro® is how it performs overall, forging a bond between you and the road that really connects.1

All-out performance

You don’t win races by playing nice.2 That’s why quattro® features one of the most fierce performance features: torque vectoring. By taking into account your steering input and desired level of acceleration, it can independently brake the inside wheels through a corner and transfer torque to the outside wheels, helping to promote neutral handling.

The case for unbreakable bonds.

All-around confidence

Just like life, the road can throw you a curve. So throw one right back with the superior grip and control of quattro®. It helps provide the performance and confidence you would expect from Audi, no matter if you’re commuting in the city or crisscrossing the country. This is advanced engineering you can live with.

All-weather capability

There is a reason quattro® is considered such a friend in foul weather. Under normal driving conditions, the center differential splits torque at a ratio of 40:60 front to rear, but as conditions change and become more challenging, the ratio is optimized to help maximize grip. And with the ability to transfer the majority of available torque mechanically to the wheels with the most grip, the operation is exceptionally smooth, even under extreme conditions.1

1 All-wheel driving solely aims to improve your vehicle’s condition, ensuring you can enjoy a safe journey. 2 Even in rainy conditions, ensure that your vehicle is equipped with appropriate all-season or winter tires. 3 Only available on Audi S orquattro models.
At Audi, we believe you should be the ultimate master of your road-going domain. That’s why we created the available Audi drive select system. It gives you the ability to adjust the vehicle’s steering, throttle response and transmission shift characteristics with the utmost of ease. And with four modes to choose from, no matter what kind of road comes into question, Audi drive select will let you answer.

**Dynamic mode**

Tighter steering and a more responsive throttle give this setting an aggressive feel and focused performance.

**Individual mode**

Take the turn your way—this mode allows you to adjust the steering, throttle and transmission upshifts to your style.

**Auto mode**

The best of both worlds, dialed to automatically adjust settings for a seamless combination of comfort and responsiveness based on your driving style and road conditions.

**Comfort mode**

Perfect for less-than-perfect roads, this setting adds optimized steering and a closer shift pattern to help provide a more relaxed drive.

**Transmission**

From very responsive, quick gear changes to more gradual acceleration, the transmission is at the heart of Audi drive select.

**Steering**

When you turn the steering wheel, you expect the vehicle to react accordingly. Audi drive select helps give you more input on how that will feel.

**Throttle-mapping**

Depending on the mode of Audi drive select you choose, the throttle can be precisely responsive or a little less so.
Six-speed manual transmission
For drivers who crave engaging and dynamic response, the Audi A4 presents an available six-speed manual gearbox that delivers power with vintage Audi finesse. Its short throw and precise ratios add a contemporary element for confident performance on the road.

Audi multitronic® transmission
As a continuously variable transmission, the available Audi multitronic combines the efficiency of a manual gearbox with the convenience of an automatic transmission. And thanks to its variable ratios and adaptive map control, the Audi multitronic always utilizes the optimal rev range of the engine.

Performance
The adage “good things come in small packages” has never been more true.

Induction-technology turbocharger
Compressing airflow to the engine allows more air into the cylinder and, ultimately, more power from each combustion cycle, significantly improving the engine’s power-to-displacement ratio.

Eight-speed Tiptronic® automatic transmission
As the perfect compromise between a dedicated manual and an automatic gearbox, the eight-speed Tiptronic® automatic transmission available in the Audi A4 offers night-optimized, carefully chosen gear ratios. Selected automatically or via its console-mounted shifter or steering wheel with available shift paddles, precise shifts are delivered without sacrificing the smooth action of the Tiptronic® automatic. A high first drive ratio allows optimization of lower gears, yet the transmission’s upper range emphasizes fuel economy—particularly at highway speeds.

Under pressure over efficiency.
There is an old school of thought in the automotive world that bigger is better. More horsepower, greater displacement—these were once the hallmark of the industry. Audi, on the other hand, progressed past this antiquated notion of engine design and adopted a system that refines the driving experience. By utilizing lightweight turbocharged engines, we solved two problems at the same time: greater efficiency and more power than was produced by previous engines. And since lighter vehicles breed better performance, the result is an exhilarating driving experience at every turn.

The Audi A4 offers three transmission choices that precisely transmit the power produced by the 2.0-liter TFSI engine. With wide gear ratios for smooth shifting and improved efficiency, it doesn't matter which transmission you choose. Available steering wheel-mounted shift paddles for automatic transmissions let you shift up or down with minimal effort, while the six-speed manual transmission gives you the control that performance drivers crave. A shift has been made, and the choice is yours: choose what propels your A4.

Eight-speed Tiptronic® automatic transmission
As the perfect compromise between a dedicated manual and an automatic gearbox, the eight-speed Tiptronic® automatic transmission available in the Audi A4 offers night-optimized, carefully chosen gear ratios. Selected automatically or via its console-mounted shifter or steering wheel with available shift paddles, precise shifts are delivered without sacrificing the smooth action of the Tiptronic® automatic. A high first drive ratio allows optimization of lower gears, yet the transmission’s upper range emphasizes fuel economy—particularly at highway speeds.

We shed light on your blind spots.

With a suite of available driver assist options, we strive to constantly up the ante on driver convenience. Available Audi side assist helps inform you of other vehicles in the lanes next to you, while available Audi adaptive cruise control helps monitor the distance between you and the vehicle ahead, and adjusts your speed appropriately to keep you moving smoothly. There are also the simple things, like parking system plus, which adds a rear view camera and rear acoustic parking sensors to help ease you into that spot. It’s another testament to the effort that Audi puts into helping ensure that you’re not the only one keeping an eye on the road.

Audi adaptive cruise control

Everyone has their own comfort zone. The available Audi adaptive cruise control helps maintain a driver-selected distance from the vehicle in front by using a special long-range radar sensor. The system constantly measures the space between your vehicle and the vehicle ahead and helps maintain it by automatically adjusting your speed. Once the road ahead is clear, the vehicle effortlessly resumes the previously preset speed, helping to make your drive that much more relaxing.

Audi side assist

The available Audi side assist uses radar sensors and two different optical warnings to help keep the driver informed about what is approaching from hard-to-see angles behind and to the side of the vehicle.
We don’t see safety as an option, or a luxury.

We decided that, regardless of size, strong should be a more flexible concept. High-strength steel helps add a measure of security while enhancing overall handling and performance. The six standard airbags feature technology that is designed to deploy airbags based on seat position, while specially constructed crumple zones give way upon impact to help mitigate potential injury in a collision. All of this, combined with the rigidity of laser seam-welded joints that enhance the strength of every Audi we make, helps diminish the impact of an unavoidable event.

---

**Brakes**

Whether you’re on the open road or off the beaten path, ESC with ABS helps to keep the vehicle traveling in its intended direction by moderating brake pressure at all four wheels to help maintain traction, minimize skids and optimize control.

---

**Six standard airbags**

With six standard airbags, including front-impact and thorax side airbags for both driver and front passenger, and available rear passenger thorax side airbags, you’ll feel practically surrounded. And that’s a good thing.

---

**High-strength steel**

High-strength steel in the chassis rail side-member and B-pillar helps protect the driver and passengers in the event of a collision.

---

**Crumple zones**

**Crumple zones**

Six standard airbags, including front-impact and thorax side airbags for both driver and front passenger, and available rear passenger thorax side airbags, you’ll feel practically surrounded. And that’s a good thing.
We believe intelligence is key to a higher form of luxury. You can see this philosophy fully represented in the available Audi MMI® system. Simply put, it’s an intuitive system that intimately connects you to almost every facet of the vehicle. It’s the nerve center of your vehicle, allowing you to control virtually every interior function of your Audi with a simplified source control button system. From the Audi MMI Navigation plus, to the sound system, to media, MMI helps you access information with a few easy clicks. And even without it, you can pair your compatible phone with the vehicle for added convenience. With this kind of brainpower onboard, you can leave the little stuff to us, and just concentrate on how good it feels to drive.

SiriusXM® Satellite Radio
Go ahead. Crisscross the country. We assure you, you’ll never run out of entertainment options, with over 130 channels of music, talk, sports and news.1

Audi MMI Navigation plus
Count on the available advanced navigation system to home in on your destination with stunning precision while putting a little more depth in your journey with help from the available Audi connect®.1

BLUETOOTH® wireless technology
Unlock your mobile phone’s potential through the MMI system. Simply pair them up and start enjoying near complete control at the touch of a button.3

Audi media
The media function opens up a world of options when equipped with the Audi MMI Navigation plus, allowing you to control the Audi music interface, Secure Digital (SD) card slots, hard disk drive (HDD) audio jukebox or DVD, and BLUETOOTH® streaming audio.2

Audi MMI® System
We’ve brought the backseat driver front and center.

1 See Infotainment /Technology section of the Featured Content page for important information regarding Audi MMI® Navigation plus and required SiriusXM® subscriptions.
2 Always pay full attention to the road, and do not drive while distracted. The features and technologies described above are optional. Check region by region for additional subscriptions with separate terms and conditions, and obliged for use only when it’s safe and appropriate. For MMI® features enabled for passenger use only.1 Requires compatible phone.
Don’t reach—relax. While touchscreens are seemingly everywhere, they don’t need to be in your vehicle. With available Audi connect®, you may never have to reach out again. Thanks to Google Voice™ Local Search, Audi connect allows you to search Google™ by simple voice commands. The crisp display is nestled farther up, closer to the windshield, so your eyes don’t have to focus and refocus between the screen and the road ahead of you. For those times when you are feeling tactile, we’ve placed toggle buttons near the gear shifter, where your hand naturally rests while you drive. So while other automobile manufacturers still want you to reach out, we’ve found a few ways for you to make information a lot more accessible while your hands are on the wheel.

MyAudi Features
Plan travel from your personal computer. Send your desired destinations to your vehicle ahead of time and access your routes from your vehicle later.

Mobile Wi-Fi Hotspot
Get traffic information overlaid onto available 3D satellite imagery to visualize a true aerial view of your route, and let the Audi Navigation Plus system reconfigure your route to avoid traffic.

Voice Control
Don’t reach—relax. While touchscreens are seemingly everywhere, they don’t need to be in your vehicle. With available Audi connect®, you may never have to reach out again. Thanks to Google Voice™ Local Search, Audi connect allows you to search Google™ by simple voice commands. The crisp display is nestled farther up, closer to the windshield, so your eyes don’t have to focus and refocus between the screen and the road ahead of you. For those times when you are feeling tactile, we’ve placed toggle buttons near the gear shifter, where your hand naturally rests while you drive. So while other automobile manufacturers still want you to reach out, we’ve found a few ways for you to make information a lot more accessible while your hands are on the wheel.

Google Earth™ with 3D Satellite Imagery
With Google Earth™ integration, you’ll enjoy 3D satellite imagery, including Google Maps Street View, displayed right on the Audi MMI display.

Travel Info
Simply tell your Audi where you are in the mood for, then let the cloud processing power of Google™ speech recognition interpret your request and bring up a list of destinations in the area of your choice.

Google™ Street View
Search for parking in your area of interest, check space availability, and set your selection as a destination to navigate directly to the garage entrance.

City Events
Get information about current events, exciting locations and places of interest at your travel destination, current location or other chosen location instantly.

Travel Info
Driving landmarks in your area of interest, set them as your destinations, and let your vehicle lead the way as you explore the world around you.

Weather Information
Contact local conditions and forecasts for your destination can help you prepare for your trip.

Navigation Plus System
Reconfigure your route, and let the Audi MMI Navigation Plus system reconfigure your route to avoid traffic.

When even a German lullaby is an ode to sound engineering.

It would be an interesting challenge, a note-perfect Brahms’ Lullaby delivered through the tuned speakers of an Audi concert radio system versus the exhilaration of the passing lane. Either way, performance wins. But it goes way beyond the gentle tones of a German composer. Audi sound engineers don’t simply make the cabin acoustics sound perfect for your music, they make the drivetrain sing. Or, if not sing, then put it in harmony with every other element of the driving experience. From the sound of a shutting door, to the click of a turning knob, to the full integration of an available Bang & Olufsen® Sound System, there’s an orchestra of engineering that fills your cabin with faithfully rendered, thrilling sound. Whatever it is you are looking for, Audi sculpts sounds in a way that matches your mood, even when you need soothing while in traffic.

Bang & Olufsen® Sound System

Dedicated to the idea of “honest music reproduction,” Bang & Olufsen® is a sound engineer’s dream. Through an available 505-watt, 14-speaker system perfectly integrated within your Audi, Bang & Olufsen® is set on transcending the limits of audio technology. By automatically adjusting volume and timbre balance to changing ambient noise levels, and offering richly tuned acoustics, you’ll hear the truth about how good life can sound in your Audi.

Optimized sound flows through strategically placed speakers around the cabin. Hear it, and you’ll instantly become engrossed in the tiniest detail and warmth of the sound.

14 speakers
It’s a difficult challenge to add to the precision driving of an Audi A4, but we’ve found a way. The Audi S4 is everything the A4 is, but with a proverbial B12 boost. The powerful Audi TFSI V6 that’s encased under the hood of the S4 produces a thrilling 333 horsepower while delivering the kind of suspension and performance enhancements to ensure that driving the S4 is much more than a run-of-the-mill performer. And with your choice of six-speed manual transmission or the available seven-speed Audi S tronic® dual-clutch transmission, you’ll have control over exactly what helps move the S4 to move you. It is proof of the ironclad law of more being a net plus.

Addition by addition.

The story doesn’t stop here. There’s more on the full range of S, RS, and R8 Audi performance models in the 2014 Audi Sport brochure. See your dealer or go to audiusa.com for details.

S4

ENGINE // 3.0-liter supercharged FSI® V6 developing 333 hp and 325 lb-ft of torque

DRIVETRAIN // Audi quattro® all-wheel drive, available sport differential, six-speed manual transmission or an available seven-speed Audi S tronic® dual-clutch transmission

CHASSIS // S4 tuned sport suspension, Audi drive select and available dynamic steering

BRAKES // 13.6" ventilated front disc brakes with S4 logo, 13.0" ventilated rear disc brakes

PERFORMANCE // Top track speed of 155 mph, acceleration from 0 to 60 in 4.9 seconds

Top track speed is electronically limited to the U.S., obey all speed and traffic laws.

Audi Sport

Piano Black inlay

1. These are supplied and warranted by their manufacturer. High-performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy or icy climates. If you drive under these circumstances, you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. Please consult your tire dealer or a qualified mechanic to determine if your vehicle is equipped with high-performance tires. Please refer to your owner’s manual for tire pressure recommendations. It is important to maintain the proper tire pressure for optimum performance and handling; too little pressure decreases traction and handling, while too much pressure damages the tread. A tire’s load-carrying ability decreases at high speeds, so it is important to adjust tire pressure to accommodate these changes. Please refer to your owner’s manual for recommended tire pressures. Please consult your tire dealer or a qualified mechanic to determine if your vehicle is equipped with high-performance tires. Please refer to your owner’s manual for tire pressure recommendations. It is important to maintain the proper tire pressure for optimum performance and handling; too little pressure decreases traction and handling, while too much pressure damages the tread. 1. Audi MMI® Navigation plus depends on a signal from the worldwide Global Positioning Satellite network. The vehicle’s electrical system and existing wireless and satellite technologies must be available and operating properly for the system to function. The system is designed to provide you with suggested routes in locating addresses, destinations and other points of interest. Changes in road names, road closures and other road changes beyond the control of the vehicle’s electrical system can require manual correction of the system. The system cannot ensure that the route suggested is the most direct or most efficient route.  
2. Optional. Audi connect® requires a 3G data plan for wireless access.  
3. SiriusXM® Traffic service will only work in the United States including Alaska and Hawaii, except where prohibited by law. SiriusXM® Traffic service is available with all SiriusXM® Satellite Radio subscriptions. Please see the SiriusXM® Customer Agreement and the SiriusXM® Traffic Service Agreement for full details.  
4. Requires compatible phone.  
5. Some Audi models are equipped with a keyless ignition feature. The details as to how the system works can vary, and Audi owners should consult their owner’s literature or an authorized Audi dealer if they have further questions about the operation of this feature. Please note that Audi warns against leaving the vehicle unattended with the engine running, particularly in enclosed spaces.  
6. Delayed availability.

### Featured Content

#### Standard   —— Not applicable

*Looks can’t be deceiving.*

We can all agree that Audi makes the most beautifully designed vehicles on the road. Even the competition has a complex, but we’ve gone a step further to make the Audi A4 S line® Interior package and Black Optic package an exciting departure from an already perfectly designed sport sedan. So while many have relied on their looks to compensate for their performance, we just took another step to make your car look a little closer to how it feels.
Accessories

Aluminum bike rack
This locking holder fits 20- to 24-inch bikes with both wheels as the bike and helps keep the bike upright at all times.3

Skis and snowboard rack
Ski run, keep the skis open and close easily. Rubber-covered aluminum bars hold securely. Standard attachment (shown) holds two sets of skis or two snowboards. Deluxe attachment holds up to three sets of skis or four snowboards.4

Small cargo carrier
Extra storage capcity. 33 x 20 comes in a small size. 33" long, 35" wide, 14" high.

20" 15-arm hollow-spoke wheels
An impressive, clean, drop-center, deep-dish design makes this 18" wheel the perfect complement to the Audi A4. Metallic silver spokes with polished lip. Also available with Ibis White spokes.

Audi Genuine Alloy Wheels
Under the perfect balance between breathing design and overengineering performance with Audi Genuine Alloy Wheels, Audi ex- perts have meticulously designed these wheels especially for each Audi model. They’reengineered to the highest standards and ex- tend rigorous testing to help ensure long-term quality. Experience eye-watching design of your Audi vehicle further.

Audi Tubeless Tire Accessory System
You go almost everywhere. Give your Audi the proper invitation to be part of your adventures. Have equipped necessary your car to- ward. Bring it with Audi Tubeless Tire Accessory System. The kit includes tire valve, 10-valves, a variety of watersports equipment carriers and various size of cargo carriers. Whenever you, make sure almost everything fits with a variety of intelligent and innova- tive solutions. Accessories designed for your life—the passionate, self-express.

Audi Genuine Electronics Accessories
The illuminating technology that graces each Audi vehicle pro- vides the inspiration for Audi Genuine Electronics Accessories. Similarity, all these accessories are impressively advanced and inspiring. Our audio options let you enhance your listening plea- sure. Similarly, all of these accessories are impressively advanced and inspiring. Our audio options let you enhance your listening plea- sure. Both are designed and tested to help ensure compatibility with your Audi. Tell us what you enjoy every aspect of Audi technology with almost all your senses. Demand the best and drive with added confidence.

Audi Guard Comfort and Protection Accessories
Help protect what you love. Audi Guard Comfort and Protection Accessories offer functional, practical items that help keep your Audi in pristine condition. Choose from such useful items as trunk mats that help keep cargo out of the back seat, or an easy-to-clean storage cover that helps shield the vehicle. Use them all to help reduce wear and tear on your vehicle's interior. Like any other facet and suit. All are engineered to stringent Audi standards, so you can be assured of their quality and durability.

Audi Genuine Sport and Design Accessories
Your Audi vehicle features a bold, aggressive stance and strong, distinctive lines. Emblazoned with the iconic Audi rings, these handsome caps give the A4 an even sportier stance.

19" 5-arm hollow-spoke wheels
Experience the high-performance beauty of this eye-catching design. The hollow-spoke feature results in a lightweight wheel. The five-spoke design features a finishing touch with this dramatic design. Five-spoke de- sign gives the 19" an even sportier stance.

16" 5-spoke wheels
Audi five-spoke cap fits 20- to 24-inch wheels. Experience the high-performance beauty of this eye-catching design. The hollow-spoke feature results in a lightweight wheel. The five-spoke design features a finishing touch with this dramatic design. Five-spoke de- sign gives the 19" an even sportier stance.

Aluminum bike rack
