A singular ambition drives the S-Class: to be the best car in the world. It’s why each of the five 2015 S-Class Sedans is the one car that all others look up to.

S 550. The standard-bearer of the automotive world teams a 449-hp biturbo V-8 with a choice of rear-wheel drive or 4MATIC® all-wheel drive.

S 550 Plug-In HYBRID. Enter a new era of eco-friendly luxury with a 329-hp biturbo V-6 plus an 80-kW (107-hp) motor that can go 18 miles on electricity alone. The lithium-ion battery recharges on the go, or in just 2.5 hours when plugged in.

S 63 AMG 4MATIC. Crafted by hand to be quick on its feet, a 577-hp biturbo V-8 and AMG performance all-wheel drive deliver agility with authority.

S 600. Sumptuous, seamless and superlative describe its 523-hp biturbo V-12 and its extraordinarily outfitted cabin.

S 65 AMG. Elegance takes a decidedly extreme turn at the exquisitely appointed helm of a 621-hp biturbo AMG V-12.
S 550 Sedan shown on cover with Anthracite Blue metallic paint, and optional Premium Package and Sport Package with 20" AMG multispoke wheels. S 550 Sedan shown above with Iridium Silver metallic paint, and optional Driver Assistance and Premium Packages. Please see endnotes at back of brochure.
It’s not what it goes for, but what it stands for.

Many cars are born from inspiration. The S-Class is born to serve as one—not just to other automakers, but for its own driver. Its mission is to elevate every dimension of capability, confidence and comfort to levels never before achieved by an automobile.
The true worth of a car does not come from the value of its standard features. It comes from the values and standards it upholds. You feel it in the sense of well-being it inspires. And the experiences that cannot be duplicated at any price. For decades, only one sedan has continually set the pace of leadership for all automobiles. And for 2015, the S-Class establishes five new pinnacles among luxury sedans.

What every S-Class Sedan has in common is precisely what sets each of them apart from every other car on the road. Their presence and identity are unmistakable, defined by proportions that are both majestic and athletic. Every detail is modern yet elegant, from the iconic grille to the all-LED lighting—one of countless industry firsts. But as always, the surface of an S-Class is shaped by the substance within.

An S-Class can engage, protect and indulge its occupants in ways that only recently seemed beyond imagination. A new era of technology watches the world around you, so it can help you avoid danger, or even react autonomously to avoid it on your behalf. Its performance breakthroughs accelerate progress itself. And its cabin innovations can not only satisfy your senses, they can soothe and stimulate them, too.

When you’re the leader, the only thing you can follow is your imagination. With so many first-of-their-kind innovations, an S-Class offers a visionary preview of the car of tomorrow. More importantly, it delivers a one-of-a-kind experience that you can enjoy today.

*With real innovation, change embraces you.*
At Mercedes-Benz, the rich tradition of luxury is something that’s rooted firmly in the future. With every new generation, the S-Class Sedan has introduced bold new ways to attend to the well-being of its occupants, without sacrificing the qualities that never go out of fashion. For example, its clever power seat controls—intuitively shaped like the seat itself—were first patented for the S-Class in 1979. Whenever you use its pushbutton KEYLESS-START, gaze skyward through its Panorama roof, or bask in the glow of its ambient cabin lighting, you’re enjoying innovations that made their world premieres under the Three-Pointed Star. The 2015 S-Class once again seats its passengers at the very forefront of luxury. A network of nearly 300 LEDs encircles the cabin, highlighting its flowing design while soothing its inhabitants. Seven hues, three zones and five levels of brightness let the driver further tailor the mood. The S-Class can purify its cabin air three different ways—including activated charcoal filtration and electric ionization—and then infuse it with the rejuvenating subtlety of aromatherapy. Information comes to life on a pair of animated 12.3" widescreens. Web-linked audio and navigation respond to your fingertip gestures and handwriting, thanks to a new touchpad controller, or to your natural voice. Best of all, these innovative luxuries don’t just set a new standard. Every one of them actually is standard.
Sometimes by years, sometimes milliseconds, but always ahead.

When innovations reach the road first in a Mercedes-Benz, they do more than break new ground. They cover ground more quickly, cling to it more surely, and reshape it more smoothly. The performance legacy that began at history’s first auto race only sped up from that victory—bringing the world the multivalve engine, all-wheel drive, fuel injection, the independent suspension, electronic throttle, the driver-adaptive transmission, countless breakthroughs in braking, the lithium-ion hybrid car, and now, the only camera-based active suspension in production. Whether each innovation leaps forward to start a new generation, or hones the car’s response by mere milliseconds, together they help ensure that the driver of an S-Class is always ahead of the curve.
$ 600 Sedan shown with Palladium Silver metallic paint.
Its power is nearly as magical as its powers.

The seamless swell of acceleration. The nonchalant unraveling of a corner. The swift, silent dismissal of a bump. The way an S-Class performs comes from a network of components, each performing their own function brilliantly, and collaborating to create magic. In a single millisecond, its engine can conjure its fuel into a jet spray of near-molecular droplets, and spark it into action as many as four times. Its semi-active and active suspensions can speed-read the road, each in its own way, and translate it into moving poetry. Its brakes can predict when they’re about to be called upon urgently. And even though in your head you know it’s pure physics that makes your S-Class perform like no other, what you feel in your heart is the chemistry. That’s what makes it magical.
**Quick thinking.** Every S-Class engine is engineered to be leaner and greener. Each of the biturbo V-6, V-8 and V-12 powerplants turn less gasoline into more torque. An innovative rapid-multispark ignition can fire each spark plug up to four times in a millisecond, for cleaner, more complete combustion. Ancillary components that are engaged only when needed—along with electromechanical power steering—help increase efficiency while leaving more of the engine’s power output available for quick acceleration. And as you wait at red lights or in traffic, ECO Start/Stop can automatically shut off the engine, helping to save fuel and emissions. When you’re ready to go, the engine instantly and seamlessly restarts.

**Gas-free driving.** A new S 550 Plug-In HYBRID teams a biturbo gasoline V-6 and an electric motor. It can travel up to 18 miles at highway speed on 100% electricity—with zero local emissions. An E-BOOST feature combines gasoline and electric power for even stronger acceleration. The lithium-ion battery can be recharged by the car’s gas engine and regenerative brakes while you drive—or just plug it in at home or at a public EV charging station to replenish the battery in just 2.5 hours or less.

**Cleaner power.** On the V-6 and V-8 engines, high-pressure Direct Injection atomizes the fuel into a fine spray, and can adjust it within one millisecond to maximize power and minimize waste.

**Swift shifting.** A sporty, smooth and efficient 7-speed automatic transmission features an elegant electronic selector and shift paddles—all fingertip-close with your hands on the steering wheel. At any time, a tap of the paddles offers instant manual control of gear changes. Pushbutton Sport and Comfort modes let you tailor the automatic shift patterns to your driving mood of the moment.

**Poise under pressure.** Two advanced suspensions serve up silky comfort with sharp handling. Both offer 4-wheel level control, speed-based lowering for better highway stability and fuel-efficiency, plus Comfort and Sport modes. Semi-active AIRMATIC suspension teams precise sensors with pressurized air spring-struts. MAGIC BODY CONTROL—the world’s first proactive suspension—is standard on the V-12 models and optional on the S 550 Sedan. In Comfort mode, cameras scan the road surface ahead to prepare the suspension for bumps and dips. In real time, high-pressure active hydraulics generate counterforces to minimize body motions, for an uncannily smooth ride. In Sport mode, they actively counteract lean, for cornering that’s virtually flat.

**Year-round confidence.** Optional on the gasoline-only S 550 Sedan, 4MATIC all-wheel drive automatically sends the engine’s torque to the wheels with the best grip—whether that’s all four wheels, two of them, or even just one. Nimble, lightweight and fuel-efficient, 4MATIC enhances handling in any season.

---

Please see endnotes at back of brochure.
Highway authority.

For 47 years, AMG has been creating championship racecars and thoroughbreds for the street. Every trophy earned, and each experience learned, has shared the same starting line: an engine crafted by the hands of its own master. “One man, one engine” is more than a guiding philosophy—it’s a pedigree of performance that’s evident throughout the car. And it’s a promise made during the rigors of competition that every Mercedes-AMG fulfills even in the routine of a daily commute. Is it a racecar for the road? No. It’s an automobile that can conduct itself with absolute authority in any arena of driving.
S 65 AMG Sedan shown with Lunar Blue metallic paint, and optional AMG Carbon Ceramic Braking System. Please see endnotes at back of brochure.
A pledge that starts with hand on heart.

Crowning the engine of an S 63 AMG or S 65 AMG is a plaque bearing the signature of the man whose two hands carefully brought it to life. The same passion for exactitude courses throughout the vehicle, from its racing-derived chassis, drivetrain and bodywork, to its exclusive instruments, controls and appointments. The impeccable intensity of AMG engineering and craftsmanship puts a world of performance at your feet—and more importantly, directly into your hands.

**S 63 AMG 4MATIC.** A handcrafted AMG biturbo V-8 achieves staggering peaks of output: 577 hp and 664 lb-ft of torque. A lithium-ion battery and the strategic use of carbon fiber in its predominantly aluminum body help save nearly 220 lbs, for a class-leading ratio of weight to V-8 power. The 7-speed AMG SPEEDSHIFT® MCT transmission offers three driving programs. Its paddle-shifted Manual mode can upshift in 100 milliseconds, and rev-match every downshift.

AMG Performance 4MATIC® all-wheel drive features a 33:67 front/rear torque split and torque-vectoring ESP® Curve Dynamic Assist. Together they transmit power to pavement so effectively that 60 mph arrives in just 3.9 seconds. And yet they preserve the agility and driving fun for which AMG automobiles have long been treasured by enthusiasts.

The AMG Adaptive Sport Suspension teams the semi-active, self-leveling AIRMATIC® setup with exclusive AMG calibration and geometry. Selectable Sport and Comfort modes let the driver fine-tune the electronically controlled damping, for an ideal balance of crisp feedback and calm composure.

**S 65 AMG.** Among AMG engines, the handcrafted 621-hp biturbo V-12 is the all-time king of the torque hill, sending a thunderous 738 lb-ft to the rear wheels. New multispark ignition and high-speed engine management conspire with the 3-mode, 7-speed AMG SPEEDSHIFT PLUS transmission to thrust you to 60 in 4.2 seconds of rapid-paced refinement.

The groundbreaking, road-conquering MAGIC BODY CONTROL® is exclusively calibrated by AMG. The camera-based active suspension scans the road while in Comfort mode, or select Sport mode for a no-compromises blend of comfort and control. The S 65 AMG may be a flagship, but it goes like a speedboat.

**Distinctive details.** Aerodynamic AMG lower bodywork is set off by black and matte silver accents on the S 63, or by brilliant chrome or black on the S 65. Each model wears its own standard 20" AMG® wheel design, or one of several options. Racing-derived AMG Carbon Ceramic Brakes are available on either model. The interior options are no less exquisite: AMG-specific stitching tailors Nappa or designo semi-aniline leather. Exotic wood, piano lacquer or carbon fiber is liberally applied throughout the cabin. And the clock is modeled after the iconic IWC® *Ingenieur* sports watch.

---

Please see endnotes at back of brochure.
It’ll see you to your future now.

For more than 60 years, Mercedes-Benz engineers have been foretelling the future of automotive safety. From 1951’s crumple zone to the first stability control 20 years ago, countless breakthroughs have predicted the safety standards all cars eventually come to follow. Today’s S-Class doesn’t just imagine what’s next, it actually looks ahead—and all around the car—to detect imminent danger, and responds to help you avoid it. As history has shown, someday all automobiles will be able to do this. As for now, no car helps you see tomorrow the way an S-Class can.

S 550 Sedan shown with Iridium Silver metallic paint, and optional 4MATIC all-wheel drive, 20” 5-spoke wheels, Executive Rear Seat, Premium, Rear Seat and Warmth & Comfort Packages, and Executive Rear Seat Package PLUS.
It can see danger. And see you through it.

With Intelligent Drive, Mercedes-Benz introduces the next generation of safer driving, and its breakthroughs are truly visionary. Multipurpose cameras, multirange radar and a multitude of sensors continually survey your surroundings. An integrated network of systems can alert you to danger from almost any direction—because they’re able to see more at once than the human eye. They can adapt the car’s speed, steering, braking and exterior lighting to rapidly changing situations—because they can multitask more effectively. And they can even take action autonomously on your behalf—to ease your journey, help protect you, and look out for others, like never before.

Learn more about the many safety innovations in the S-Class at MBUSA.com/S

Detecting cross-traffic and pedestrians.

Included with DISTRONIC PLUS are systems that can help to detect an impending collision with a vehicle or pedestrian ahead—even while you aren’t using cruise control. If the sensors of Intelligent Drive detect cross-traffic or recognize pedestrians in your path, an alert sounds. The instant you apply the brakes, it can boost braking pressure precisely to the appropriate level. And if you fail to heed the alert for a stopped vehicle or a crossing pedestrian, it can automatically apply up to 100% braking force to help prevent or reduce the severity of an impact.15

Stereo multipurpose cameras.

While you drive, a set of multitasking cameras continuously captures a rapid series of images of the environment in front of the car. High-speed algorithms help the system’s “eyes” to recognize other vehicles, cycles and pedestrians, and then predict their movement in six dimensions of space and time. This ongoing perception helps the various systems of Intelligent Drive respond instantly as needed, when needed.

Radar-based autonomous braking.

When you’re driving above 5 mph, new COLLISION PREVENTION ASSIST PLUS uses multirange radar to monitor your speed and distance to the vehicle ahead. If it senses that a collision is likely, it alerts you to brake. As soon as you do, its Adaptive Brake Assist can automatically increase braking to the ideal level.16 And in certain situations, it can apply the brakes autonomously if you do not respond to an alert.
A watchful eye if it’s time for a rest. By continually monitoring a variety of driving behaviors, ATTENTION ASSIST® can alert you if it detects signs of drowsiness on long trips. It measures more than 70 variables, starting in the first minutes of a drive, to establish a profile for the warning thresholds. If the system issues an alert, the car’s navigation system will simultaneously offer to help find a nearby rest area.13

Multilane multitaskers. Two available systems make highway driving easier. Active Blind Spot Assist can alert you to some unseen vehicles in the adjacent lane.11 Active Lane Keeping Assist can vibrate the steering wheel if you start to drift across visible lane markings.16 It can even help detect an oncoming or overtaking vehicle in the next lane. If you disregard the alerts, both systems can gently brake selected wheels to help guide the car back into its lane.

Cruise control that steers and stops. Available DISTRONIC PLUS® adaptive cruise control, a Mercedes-Benz first, uses radar-based technology to adapt your set speed in response to the flow of traffic ahead. It can automatically slow the vehicle—or even brake it to a halt—until your path clears, and then resume with just a tap. As you cruise, its Steering Assist feature uses the cameras to help keep you centered in your lane, even around mild curves.12

Virtual vision for driving after dark. Available Night View Assist PLUS uses invisible infrared beams to display a supplemental view of the road in the instrument panel. Infrared and thermal imaging helps it identify and point out pedestrians and animals. It can even try to alert pedestrians with a focused flash from the LED headlamps. To make using the system even easier, you can set the display to turn on only when it senses a pedestrian or an animal.13

A better view of what’s around you. A standard rearview camera shows a live view of what’s just behind your vehicle on the central in-dash screen. Active steering guidelines help you back smoothly into a parking space. The available Surround View System uses four cameras to create a single live “birds-eye” view of your immediate surroundings. It helps you maneuver more easily in tight spaces, whether you’re moving forward or backing up.14

5. Earlier or autonomous braking helps to prevent a collision or reduce its severity.

6. With a collision averted, driver and pedestrian continue on their way. Intelligent Drive continues to look ahead.
Inspiration, even for your respiration.

An S-Class wants you to feel more than comfortable within its flowing spans of artful design and spacious comfort. It wants you to enjoy the benefits of its thoughtfulness, and feel special in its care. That’s why it can heat not just its seats but its armrests and door panels. Why its seats can offer you a gentle massage, a vigorous massage, or a “hot stone” massage that might make driving to the spa more refreshing than the spa itself. And why it can electrically ionize impurities, spores and even viruses out of its cabin air, to boost your lung capacity by up to 15%. Of course you want a luxury sedan’s cabin to take your breath away. The S-Class would also like to give it back.
**Mode keys.** The COMAND system makes it easy to select, access, adjust and personalize an enormous number of in-car features— from seating to settings to songs on your smartphone. An arc of keys lets you jump directly to a mode, paralleling the top menu on the in-dash screen.

**Rotary controller.** COMAND’s clear, animated on-screen menus use an intuitive “carousel” layout. Turn the knob, and your selection options rotate exactly the same way, with tactile “clicks” adapting to the number of items in each menu.

**Touchpad.** The new fingertip interface responds much like the tablet you use at home, but is easy to master by feel alone. You can swipe left–right or up–down to navigate maps and menus, and pinch to zoom on a map. You can even handwrite letters and numbers on it, with each one shown on-screen and confirmed by the system out loud.

**Quick-access keys.** Three keys on the touchpad let you call up the main audio menu, go back one step, or access your programmable favorites.

**Drive modes.** A variety of pushbutton driving options surround the COMAND controls, to minimize hand movement. Transmission and suspension Sport modes, ride height, and the ECO Start/Stop system are all easy to adjust, often without taking your eyes off the road.
Easy to reach, simple to grasp.

This is not a touchscreen. But it does respond to your touch—on a big, vivid 12.3" screen placed high in the dash. Mercedes-Benz engineers have studied human behavior and the human body for decades. And even as they keep dreaming up new technology, certain facts remain constant: Your eyes are up there, and your hands are down here. The new COMAND® touchpad controller connects with human nature more naturally than ever before—and more comfortably, too. It responds to fingertip gestures and even handwriting. In addition, a rotary controller and dedicated keys offer you multiple input options—so you can use whichever method you prefer for many of the functions. An S-Class will not make you reach for a touchscreen—nor wipe fingerprints from one. An S-Class will reach out to you, to make sure its technological firsts quickly become your own second nature.
A sensation for all your senses.

An S-Class can immerse you in euphoric sound. Fill the air with the freshness of a summer storm. Turn pixels, color and motion into knowledge, enjoyment and convenience. It will listen to your voice. And give you 360° of perception and clarity. It’s a car that gives all of your senses a new sense of well-being.

**Instrumentation for a new generation.** Fully electronic instruments and intuitive controls make technology easy to reach, and to grasp. Twin 12.3” color screens and a new touchpad central controller unify most every in-car feature. The primary screen teams analog-style gauges with graphic displays for key driving functions. At center stage in the dash, a second widescreen unites entertainment, navigation and many convenience systems, using lifelike illustrated menus.

**Eyes on the road.** The available new Head-Up Display can project an 8”-wide high-resolution virtual image a few feet in front of the windshield. Color graphics show your speed, the next navigation instruction and more, well within your natural field of vision. The display is adjustable for brightness and height, with the position stored in the driver-seat memory.

**Music from around the world.** Listening knows no limits in the S-Class. Start with local HD Radio® stations, nationwide SiriusXM Radio with a 6-month All Access plan trial, and global, Internet-based Tuneln® Radio. You can set up alerts for your favorite artists and sports teams on SiriusXM, and tag songs for later purchase. Or bring your own music via DVD, SD card, two USB ports, Bluetooth® audio streaming, and a 10GB in-dash Music Register. The optional SPLITVIEW front-seat entertainment system can play a DVD movie on the in-dash screen that only the front passenger can see.

**Home-quality high fidelity.** Germany’s Burmester®, known for handcrafted home audio, brings S-Class audio to a new crescendo. The standard 590-watt Surround Sound System’s 9-channel digital/analog amplifier feeds 13 high-performance speakers. The available Burmester High-End 3D Surround Sound System delivers an audio experience likely unmatched in the industry. A 1,540-watt, 24-channel amplifier drives its 24 ultra high-performance speakers, including 3D speakers in the ceiling plus two rotating, illuminated tweeters. A trunk-mounted subwoofer is powered by its own 400-watt amp. Both systems delight the eye with exquisite aluminum speaker grilles, while the award-winning FrontBass® enriches the sound by utilizing the car’s front body structure as bass enclosures.

**Easy navigation of the road, or the Internet.** The standard navigation® features a fast 80GB hard drive, 3D maps with building profiles, three years of map updates, and three years of SiriusXM Traffic and Weather. The Cloud-based apps of Mercedes-Benz mbrace® bring the Internet to your dash, so you can search for places via Google®, Yelp and other familiar tools in the car, and be on your way with a few clicks. You can also send destinations from your smartphone or computer. And mbrace even makes your S-Class its own WiFi hotspot.

**A team of virtual valets.** At the driver’s left, a cluster of switches unifies access to the many available driving assists. In addition to such visionary systems as Night View Assist Plus and the 360° Surround View System, the PARKTRONIC system includes Active Parking Assist. Its sensors measure open parallel and perpendicular parking spaces as you drive by them, and let you know which ones are a good fit. Choose a spot, and Active Parking Assist can automatically back the car in, expertly steering and braking the car on your behalf.

**Create a mood, or a microclimate.** It’s possible that no automobile has ever offered such extensive control of its cabin’s atmosphere. Multizone LED ambient lighting, a glass Panorama roof and up to five power sunshades let you suit the sunshine, starlight and shade to your state of mind. You can finely tune the dual-zone and 4-zone climate control systems, or bask in their thoughtful automation. You can enhance the purified air with subtle scents. And while the front and rear seats are available with comforts ranging from soothing heat to cooling ventilation to multicontour support, you can also heat the steering wheel, armrests and doors.

Please see endnotes at back of brochure.
**A well-earned upgrade from first class.**

The S-Class wraps five-star luxury in the ingenuity and thoughtfulness that earn it the shining star on its hood. Its rear cabin welcomes you with expansive space and exquisitely crafted furnishings, then treats you to amenities that perhaps only room service could make more fulfilling. Four available cabin configurations progressively add upgrades from power recliners to twin seats with folding tables. And unlike other forms of first-class travel, there’s never a line at check-in.

**Warmth & Comfort Package.** A power rear seat is the starting point for a dazzling array of rear-cabin comforts. Each power seat offers its own memory system, and reclines up to 37° without reducing legroom. In addition to heated and ventilated rear seats, the package includes heating of the steering wheel and all of the armrests and door panels. The lavishly outfitted S 600 and S 65 AMG Sedans include all of these amenities as standard.

**Rear Seat Package.** The next upgrade (standard on the V-12 models) adds 4-zone climate control and plush detachable pillows for the outboard rear head restraints. The passenger in the right rear seat can slide the front seat an extra 3 inches forward, and fold down a power footrest. Both outboard rear seats include innovative seat-belt air bags with LED-illuminated active buckles that automatically rise when you open a rear door, to facilitate buckling up.
Executive Rear Seat Package. The motoring equivalent of a corner office—and a standard V-12 perk—adds active multicontour outboard rear seats. Along with pneumatic adjustment of your lumbar, thigh and shoulder supports, six massage programs include two “hot stone” treatments. The right rear seat reclines farther, to 43°, and offers a power-operated calf rest. Many features are operated via the Rear Seat Entertainment screens and wireless remotes.

Executive Rear Seat Package PLUS. For the ultimate in travel by land, a pair of individual power seats are divided by a functional console. Elegantly trimmed in hand-finished wood and shimmering metal, the console’s multiple compartments open to reveal lined storage and a pair of LED-illuminated cupholders that can be heated and cooled. A pair of sleek aluminum writing tables can be raised from within the console, or folded and stowed away with ease.
Mercedes-Benz mbrace can make any trip easier, safer, more productive and more enjoyable. It brings you a world of security and convenience. It brings the Internet to your dashboard. It connects you to your car, from your smartphone or computer. It even updates over the air.

**mbrace Package** 6-month trial included

**Advanced features you'll enjoy every day.**
Support you can count on when you need it most.

**Safety and Security**
From Roadside Assistance to antitheft measures to emergency aid, mbrace looks after you, your passengers and your Mercedes-Benz.

- Call for assistance after an accident or in any emergency situation. If an air bag is activated, your Mercedes-Benz can place an SOS call automatically, even if you can't.
- Directly connect with Mercedes-Benz Roadside Assistance for help with a dead battery, flat tire or other car trouble.
- Get notified if your car's alarm is set off, and let your car's built-in GPS help authorities with stolen vehicle recovery.
- If you ever find yourself unable to drive, let an mbrace specialist help arrange alternate transportation home.

**Remote Connections to Your Vehicle**
Interact with your vehicle's features, and send addresses to its navigation system, from your iPhone, Android or computer.

- Send destinations and even exact routes to your car's COMAND navigation system from your computer or smartphone.
- Locate your vehicle from the Mobile App on your phone when you can't remember where you parked.
- Remote-lock and unlock your car's doors.
- Sound your car's horn and flash its lights to help you spot it in a crowded parking lot, or to call attention to a hazardous situation.

**mbrace PLUS** 3-month trial included

**Personal Concierge**
Enjoy virtually unlimited assistance from an actual person with the knowledge and resources to help with almost any request.

- Let an expert Concierge help you stay more productive on the road, or from the Mobile App on your smartphone.
- Get expert recommendations and reservations for dining out, tickets to events, and answers to most any question.

**Family Driver Monitoring**
Let mbrace add to your peace of mind when the secondary drivers in your household use the family Mercedes-Benz.

- Set speed limits and be notified if they're exceeded.
- Set up virtual boundaries and be alerted if they're crossed.
- Receive an alert if the car is started after curfew.
- See where your vehicle's been driven on an online map.

**Advanced Travel Assistance**
Keep your eyes on the road with agent-assisted route guidance based on where you are, or plan a trip to somewhere far away.

- Receive spoken assistance in your car with weather and traffic conditions, Point of Interest information, and turn-by-turn driving directions to your destination.
- Let your Concierge book and change airline, hotel and rental car reservations from your car or the Mobile App.

**Mercedes-Benz Apps** 3-month trial included

**In-Vehicle Internet** An ever-growing variety of in-car apps, offering Internet-based connections to the interests you enjoy, the information you need, and the world you call your own.

- Search restaurant and business reviews with Yelp, and navigate directly to them with just a few clicks.
- Listen to Internet radio stations from around the globe with TuneIn® Radio.
- Create an in-car hotspot to connect up to 4 devices to the Web.
- Stay connected to friends with Facebook, and navigate directly to places where they've checked in.
- Find and view local Points of Interest with Google Local Search with Street View and Panoramio images.
- Keep up-to-date on the latest news from around the world.
- Follow your favorite stocks through Morningstar®.
- Access your Mercedes-Benz Financial Services account.
- View local traffic cams in many major metropolitan areas.
- Search for hotel rooms by distance and price, and book them, provided by HRS—Hotel Reservation Service.
- Check weather locally and around the world.
- Compare fuel prices at nearby filling stations.
- Check the status of flights and airport conditions.
- Look up showtimes at local movie theaters.
- Enjoy your daily commute or any trip with audio books.
- Check out local deals when you're shopping, dining and more.
- Share your location and ETA on social media via Glympse®.
- Enjoy a variety of music curated by Mercedes-Benz via Mercedes-Benz Radio®.
- Keep up with your RSS feed and more.
- Enjoy even more new apps whenever they become available.

---

*For more information and a complete list of mbrace services, visit MBUSA.com/mbrace*

Please see endnotes at back of brochure.
Genuine Mercedes-Benz Accessories are exclusively engineered to fit your car as well as they fit your life. A wide selection of accessories lets you enhance your vehicle’s appearance, expand its versatility, or offer it some extra protection in everyday use. From stylish wheels to clever storage innovations to scintillating scents, they’re a great way to make your S-Class unmistakably yours while keeping it genuinely Mercedes-Benz.

See the entire accessory selection at MBUSA.com/S

Atomizer scents.
Four distinctive aromas are available for the standard cabin atomizer. Each scent comes in its own elegant glass vial, with the vial backlit by LED illumination when placed into its receptacle in the glovebox. Scent choices include the warm and woodsy Nightlife Mood, clean and refreshing Sports Mood, soft and calming Downtown Mood, and the rejuvenating clarity of Freeside Mood.

Rear spoiler.
Aerodynamically contoured to accentuate the lines of the S-Class Sedan, the rear spoiler is designed for secure attachment without drilling and to provide a perfect fit with the trunklid.

20” 10-spoke two-tone wheels.
Enhance your car’s poise and performance while preserving its precise engineering. Ten spokes, polished to a high-sheen finish, each feature a chiseled groove inlaid in contrasting Himalaya Grey paint. Their elegant design and generous size accent the athletic profile of the S-Class.

Comfort box.
Help keep smaller items from rolling around the trunk with a clever bin that folds up and retracts out of the way to maximize cargo room. The bin can also be easily removed from the trunk. (Not available in combination with refrigerator box.)

Basic carrier and ski/snowboard rack.
Easily mounting to factory fittings in the car’s roof, the basic carrier lets you attach a variety of racks and containers—each available separately. The ski and snowboard rack features a clever pull-out function to ease loading and unloading.

All-season floor mats.
Deep channels help keep water, mud and melting snow away from your car’s carpeting. Each rubber mat is precisely contoured to fit the footwells of your S-Class. Easy to remove and clean, they’re available as front and rear sets in Beige or Black. (Remove standard floor mats before installing.)

Endnotes

1 Introduction dates vary. 100% electric driving range may vary based on terrain, temperature, driving style and other factors. Charging times are estimated and may vary by location and equipment. 25-hour charge time requires 240V charger. Charging stations must be J1772-compatible. See your dealer for more information.

2 Internet-based features require an active subscription to mbrace Mercedes-Benz Apps Package. Connection may be limited by cellular signal.

3 No system, regardless of how advanced, can overcome the laws of physics or correct careless driving. Please always wear your seat belt. Performance is limited by available traction, which snow, ice and other conditions can affect. Always drive carefully, consistent with conditions. Best performance in snow is obtained with winter tires.

4 Obey local speed and traffic laws.

5 Not available with 4MATIC all-wheel drive or on S 550 Plug-In HYBRID. Road Surface Scan active only at driving speeds below 80 mph while in Comfort mode, and may be limited by weather, lighting and road surface conditions. Obey local speed and traffic laws.

6 Lower aspect ratio tires and accompanying wheels provide substantially increased treadwear, increased tire noise and reduced ride comfort. Serious wheel and tire damage may occur if the vehicle is operated on rough or damaged road surfaces or upon encountering road debris or obstacles. These tires are not designed for use on snow and ice. Winter tires mounted on appropriately sized and approved wheels are recommended for driving in those conditions.

7 Stated rates of acceleration are estimated based upon manufacturer’s track results and may vary depending on model, environmental and road surface conditions, driving style, elevation and vehicle load.

8 The carbon-ceramic brakes are designed expressly for high-performance braking. It is a characteristic of their materials and design that brake noise/squeal may result, along with differing brake pedal feel at lower brake temperatures compared to higher operating temperatures.

9 COLLISION PREVENTION ASSIST PLUS may not be sufficient to avoid an accident. It does not react to certain stationary objects, nor recognize or predict the curvature and/or lane layout of the road or every movement of vehicles ahead. It is the driver’s responsibility at all times to be attentive to traffic and road conditions, and to provide the steering, braking and other driving inputs necessary to retain control of the vehicle. Drivers are cautioned not to wait for the system’s alerts before braking, as that may not afford sufficient time and distance to brake safely. Autonomous braking is available at speeds between approximately 5 and 65 mph.

10 Driving while drowsy or distracted is dangerous and must be avoided. ATTENTION ASSIST® and/or Lane Keeping Assist may be insufficient to alert a fatigued or distracted driver of lane drift and cannot be relied on to avoid an accident or serious injury. Lane Keeping Assist operates at speeds above approximately 20 mph.

11 Blind Spot Assist may not be sufficient to avoid all accidents involving vehicles in your blind spot and does not estimate the speed of approaching vehicles. It must not be used as a sole substitute for driver awareness and checking of surrounding traffic conditions.

12 DISTRONIC PLUS® adaptive cruise control is no substitute for active driving involvement. It does not adapt cruising speed in response to stationary objects, nor does it predict the curvature and lane layout of the road ahead or the movement of vehicles ahead. It is the driver’s responsibility at all times to be attentive to traffic and road conditions, and to provide the steering, braking and other driving inputs necessary to retain control of the vehicle. Drivers are cautioned not to wait for the DISTRONIC Proximity Warning System before braking, as that may not afford sufficient time and distance to brake safely.

13 Night View Assist PLUS does not replace the use of headlamps and must not be used as the primary visual source for the driver.

14 Rearview camera and Surround View System do not audibly notify driver of nearby objects and are not a substitute for actively checking around the vehicle for any obstacles or people. Images displayed may be limited by camera field of view, weather, lighting conditions and the presence of dirt, ice or snow on the cameras.

15 Braking effectiveness also depends on proper brake maintenance, and tire and road conditions.

16 Head-Up Display may not be visible with certain eyewear, including polarized glasses.

17 The purchase of a new, satellite radio enabled vehicle includes a 6-month trial of the Sirius All Access package, and three years of SiriusXM.
The personal rewards of striving to be the best are even more meaningful in the development of young people than they are for automobiles. Instilling the values of leadership, goal-setting, discipline and teamwork in youth is an investment in everyone’s future. It’s why Mercedes-Benz USA is collaborating with the Laureus Sport for Good Foundation, with an ongoing commitment to train and place hundreds of coaches for after-school and in-school sports programs in communities around the country. Sports offer kids more than the chance to be physically active and have fun. It’s also an opportunity to have a mentor who can guide them, help them learn how to deal with major life issues, and help them grow stronger not just physically but in their character. As a Mercedes-Benz driver, you become a part of this effort to give hundreds of thousands of kids a better life today, and all of us a brighter tomorrow.

Learn more about how Mercedes-Benz USA believes in giving back at MBUSA.com/community
