Stand out, even on the move. Is there a rule that says all SUVs have to look and feel the same? Not for the Tiguan. Sure, it’s versatile, but feels solid. Crafted. And the Tiguan even has something extra under the hood—a turbocharged engine that comes standard. See, going your own way really is the way to go. That’s the Power of German Engineering.
The Tiguan brings out the inner driver in every driver.

Performance. Most people expect an SUV to be versatile, but rarely do they expect one to be fun to drive. Unless, of course, they’re driving a Tiguan. It has the same 200-hp turbocharged engine that they’ll find in some of our sports cars. And with available sport suspension and 4MOTION® all-wheel drive, the Tiguan shows how versatile it can be on and off the road.

4MOTION all-wheel drive

With all-wheel drive systems in place, your Tiguan can help you navigate all types of road conditions with ease. When the system senses the wheels aren’t rotating equally, it instantly delivers more torque to the wheels that need it for better grip, handling, and peace of mind.

2.0L TSI® engine

This turbocharged engine is the same one that’s won awards for its design and performance. But you don’t have to pop the hood to understand what it does. A simple step on the gas will do.

*Always obey speed and local laws.
Can quality have a sound?

Quality. Did you hear that? Close the door and you’ll hear a solid “thunk.” That’s proof of the quality we engineered into the Tiguan, like the laser seam welds for sturdy construction, the available panoramic sunroof, the premium soft-touch dash, and the leather-wrapped steering wheel. It’s German engineering you can appreciate every time you get inside the Tiguan. As soon as you close the door.
It’s all about personal space.

Interior. Sit inside the Tiguan and you’ll feel right at home. That’s because we spent a lot of time making sure it fits perfectly into your life, while also letting you fit more in. It’s why we gave it 40/20/40-split folding rear seats, so it’s easier to change things up for carrying friends or all your stuff. And with the available fold-flat front passenger seat, you can make short work of loading extra-long items.

Panoramic sunroof. Things are definitely looking up with the 12.7-square-foot panoramic sunroof.* Open it up to let in the sunshine, ocean breezes, and sky-high view.

Glovebox with adjustable cooling feature. Forget to bring a cooler? That’s OK, because the Tiguan has a glovebox that can help keep your drinks and snacks from overheating. Now every road trip will be even cooler.

40/20/40-split folding rear seats. There are times when a 60/40 split just isn’t enough. The Tiguan lets you fold down one or both rear seats, or even just the middle one, to help maximize flexibility and cargo space.

Panoramic sunroof. Things are definitely looking up with the 12.7-square-foot panoramic sunroof.* Open it up to let in the sunshine, ocean breezes, and sky-high view.

Dual-zone automatic climate control* Heated front seats* 56.1 cu. ft. of cargo space** Sliding rear seats 12-way power-adjustable front seats* *Feature available on select models. **With rear seats folded down.
Technology shouldn't just be for technology's sake. That's why we gave the Tiguan features you'd actually use. A lot. Like a rearview camera and a color touchscreen sound system. Or Volkswagen Car-Net® connected car features, so you can stay connected to your Tiguan while also connecting to the outside world. Of course, the available Fender® Premium Audio System proves that technology can also be music to your ears.

High tech meets high fidelity.

400 watts

With VW Car-Net, you can communicate and stay in touch with your Tiguan and the outside world by using your computer or app on a compatible smartphone.* With available keyless access you don't have to reach for your remote to lock, unlock, or even start your Tiguan. Just keep it in your pocket or purse, and leave your hands on the wheel.

Rearview camera
We're always preparing for what's coming ahead. It's also nice to know what's coming from behind. This rearview camera can help with that by letting you see any obstacles in your path when backing up. And when it comes to parallel parking, we're sure the benefits will be easy to see.

Keyless access with push-button start
With available keyless access you don't have to touch your remote to lock, unlock, or even start your Tiguan. Just keep it in your pocket or purse, and leave your hands on the wheel.

Volkswagen Car-Net connected car features
With VW Car-Net, you can communicate and stay in touch with your Tiguan and the outside world by using your computer or app on a compatible smartphone. This looks like the start of a beautiful relationship.

*VW Car-Net services provided by Verizon Telematics, Inc. Available on select trims. Trial or paid subscription required. Always pay careful attention to the road, and do not drive while distracted. See Terms of Service, Privacy Policy, and other details at www.vw.com/carnet/info.
Safety. We can’t always predict what’s going to happen down the road. That’s why we’ve engineered the Tiguan with advanced safety systems, like our Intelligent Crash Response System (ICRS). It’s also why the Tiguan has a roof that can support over five times its own weight, for best-in-class roof strength. When you drive a Tiguan, it’s safe to say you’ve got a strong ally.

And the outside.

Safety cage
Adaptive airbags
Intelligent Crash Response System (ICRS)*
Seven stability-enhancing systems
Tire Pressure Monitoring System (TPMS)
Brake disc drying

You’ll feel safe on the inside.

Safety cage
Adaptive airbags††
Intelligent Crash Response System (ICRS). This system can automatically disable the fuel pump, unlock all the doors, and turn on the hazard lights in the event of a collision that activates the airbags. It’s how your Tiguan looks after you when you can’t.

Intelligent Crash Response System (ICRS). This system can automatically disable the fuel pump, unlock all the doors, and turn on the hazard lights in the event of a collision that activates the airbags. It’s how your Tiguan looks after you when you can’t.

Tire Pressure Monitoring System (TPMS). The Tiguan is sensitive, especially when it comes to its tires. To stay efficient and safe, the Tire Pressure Monitoring System alerts you to a loss of tire pressure so you know when to put more air in.

Seven stability-enhancing systems. Electronic Stability Control (ESC) can help the Tiguan maintain control by applying corrective forces at each wheel in unsafe driving situations. It’s nice to be in control.

Safety cage with heat-formed B-pillars. Our safety cage not only helps protect you in front, side, and rear impacts, but the Tiguan’s roof and trunk are incredibly strength-yielded, helping put the Tiguan at the top of its class for roof strength.

Adaptive airbags. Our airbags are designed to adapt to crash severity, and special sensors in the doors deploy the side airbags faster in the event of a side impact. We’re always thinking ahead, from every angle.††

Brake disc drying. When it’s raining outside, this system wipes water off the disc brakes to help them remain dry and always have their full stopping power. And it’s activated simply by turning the windshield wipers on.
