²Hill Start Assist Control (HAC) is a complex electronic and mechanical system designed to help minimize backward rolling on steep ascents. It is not a substitute for safe driving judgment and practices. Factors including grade, surface conditions and driver input can all affect whether HAC will be effective in preventing a loss of control. Please see your Owner's Manual for further details.

³Downhill Assist Control (DAC) is a complex electronic and mechanical system designed to help the driver maintain vehicle control and speed on steep downhill descents. It is not a substitute for safe driving judgment and practices. Factors including speed, grade, surface conditions and driver input can all affect whether DAC will be effective in preventing a loss of control. Please see your Owner's Manual for further details.

⁴Color-keyed with Dorado Gold Pearl.

⁵For weight-carrying towing only with V6 models; weight-distributing on V8 models.

⁶Not available with third-row seat.

⁷Requires leather-wrapped steering wheel and shift lever with integrated cruise and audio controls and rear-seat audio system with remote control and wireless headphone capability on SR5 models.

⁸Requires rear-seat audio system with remote control and wireless headphone capability on Sport Edition models.

⁹The Toyota touch-screen DVD navigation system is designed to assist in locating an address or point of interest. Discrepancies may be encountered between the system and your actual location. Changes in street names, road closures, traffic flow or other road

system changes may affect the accuracy of the mapping software. Rely upon your common sense to decide whether or not to follow a specified route. Detailed coverage not available in every city. Optional periodic geographical updates available at an additional cost. See your Navigation System Owner's Manual and your Toyota dealer for further details.

¹⁰The backup camera is designed to capture a photographic image within the limited frame capabilities of the camera's lens and is not intended to provide a comprehensive view of the entire rear area of the vehicle. This system should not be exclusively relied upon to confirm rearward clearance.
