< A standard 317-horsepower 5.6-liter V8 churns out 385 lb-ft of torque to pull up to 9,500 lbs. of just about anything.³

> Configure even the most complex, cumbersome loads. The bed has more usable cargo space and load-carrying versatility than the average half-ton, thanks to five C-channel rails running the length of the bed's floor and walls.

> For heavy-duty hauling and towing, the steel-reinforced ladder frame is made with full-length box-section rails enclosed on four sides.

< The 5-speed automatic transmission features gear ratios that can take full advantage of its massive low-end torque and optimize fuel economy in higher gears.
