

2012 Mitsubishi i-MiEV

100% electric. And we're not just talking about its power source.

Say hello to the all-new 2012 Mitsubishi i, the fully-electric EV that's as electric to drive as it is to charge. With zero on-road emissions and an astonishing 112 combined MPGe¹ (that's miles per gallon equivalent, the new EPA ranking system for electric and alternative energy vehicles), the Mitsubishi i was named "The Greenest Vehicle of 2012" by the ACEEE (American Council for an Energy-Efficient Economy). Think that's good news? It gets even better. Because at a price as low as \$21,625² after federal tax incentives, it's also the most affordable EV in America.

No tailpipe, zero on-road emissions

EPA-leading 112 MPGe¹

Ranked "Greenest Vehicle of 2012" by ACEEE

Most affordable EV in America²

Being environmentally conscious has never been this much fun.

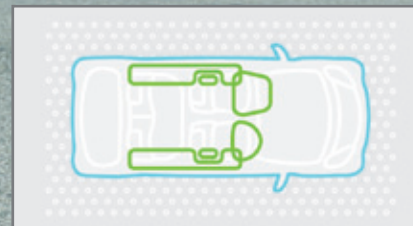

Hop in, put your foot down and discover surprising acceleration thanks to Mitsubishi innovative Electric Vehicle (MiEV) technology—our groundbreaking integrated management system that delivers an exhilarating blend of performance and economy. And to help keep more power on tap, the Mitsubishi i comes with a brake energy regeneration system that captures kinetic energy during deceleration to recharge the battery as you drive. Add to that the safety of an advanced airbag system³, the security of knowing your main drive lithium-ion battery is covered for 8 years or 100,000 miles, and the Mitsubishi i could be the ideal solution for those who want to drive as many green miles as possible.

MiEV (Mitsubishi Innovating Electric Vehicle) technology

Brake energy regeneration system

Advanced six-airbag system³

8-year/100,000-mile main drive lithium-ion battery limited warranty

Three ways to charge: fast, faster, and fastest.

The Mitsubishi i's custom 16 kWh lithium-ion battery pack delivers responsive power, a long air-cooled life and convenient charging when you use the included Level 1 charging cable,⁴ which plugs into a standard 120V outlet and produces a full charge in about 22 hours. For faster charging, we recommend the optional home charging dock, which provides a full charge in just 7 hours. Plus, your Mitsubishi i can be equipped with an available public quick-charger port that connects to CHAdeMO Level 3 public chargers to deliver an 80% charge in as little as 30 minutes.

Custom Mitsubishi 16 kWh battery pack

Standard Level 1 (120V) portable charging cable⁴

Optional Level 2 (240V) EVSE home charging dock

Available Level 3 (CHAdeMO) public quick-charge port

ROADSIDE ASSISTANCE

We're so confident in the quality, reliability and durability of the Mitsubishi i that we back it with extensive warranties designed to give you thousands of miles of worry-free driving. This list is headed by an 8-year/100,000 mile limited warranty for the main drive lithium-ion battery pack, as well as a 5-year/60,000-mile Powertrain Limited Warranty, a 3 year/36,000 mile Basic New Vehicle Limited Warranty and a 3-year/36,000 mile Roadside Assistance.⁸ All coverage terms are transferable to subsequent owners.

Additionally, you're eligible for one complimentary out of energy tow per year for three years if you drain the battery while on the road. Because peace of mind is knowing that we're looking out for you. Today, tomorrow, and long into the future.

Technical data, equipment pricing and options shown are based on the latest information available at the time of printing and are subject to change without notice. Colors may vary due to the printing process. Exterior and interior lights on vehicles shown may be illuminated for illustration purposes only. Vehicles are shown with optional equipment. Not all equipment is available on every model. For complete details about equipment configuration and Mitsubishi Genuine Accessories, please contact your Mitsubishi retailer.

LEGAL

¹ Based on 2012 EPA Annual Fuel Economy Guide mileage estimates for electric vehicles. Actual mileage equivalents may vary.

² The Mitsubishi i is the most affordable electric vehicle in America. And with a federal tax incentive, it's even more affordable. ES TRIM: \$29,125 MSRP - \$7,500 federal tax credit = \$21,625 after tax credit. SE TRIM: \$31,125 MSRP - \$7,500 federal tax credit = \$23,625 after tax credit. Manufacturer's Suggested Retail Price. Excludes destination/handling, tax, title, license etc. Retailer price, terms and vehicle availability may vary. See your Mitsubishi retailer for details. Destination/handling charges for Mitsubishi i \$850; Alaska/Hawaii \$975. Tax savings subject to rules and availability. Taxpayer must incur federal tax liability to receive full benefit. Consult your tax professional. Actual prices set by retailer.

³ Airbags are part of a Supplemental Restraint System (SRS). To decrease the risk of injury from a deploying airbag, always wear your seatbelt, sit upright in the middle of the seat and do not lean against the door. Always place children 12 and under in the rear seat and use appropriate child restraints. Never place a rear facing infant restraint in the front seat. See your owner's manual and instructions provided with your child restraint for additional information.

⁴ Before your first charge, we require a site inspection of your garage to ensure that your electrical infrastructure is adequate and that you have a dedicated 15A outlet.

⁵ \$300 MSRP extra charge for 2-tone.

⁶ Based upon various EPA testing methods using different driving conditions and climate controls; the EPA rated the Mitsubishi i with a driving range of 62 miles per charge. Actual range will vary depending on driving/charging habits, speed, conditions, weather, temperature, use of A/C and heater and battery age. Gradual loss of battery capacity will result with time and use.

⁷ Safety is a two-way street. It requires your attention and cooperation. Please remember to fasten your safety belt, drive responsibly and obey all traffic laws.

⁸ All coverage terms are from the original in-service date. See retailer for limited warranty and roadside assistance terms and conditions.
